Committee for Compounding with Delinquents (1643-1660)., Great Britain. Public Record Office, 1892 **I Saw Eternity the Other Night** Timothy Day, 2018-11-15 The sound of the choir of King's College Cambridge its voices perfectly blended its emotions restrained its impact sublime has become famous all over the world and for many the distillation of a particular kind of Englishness This is especially so at Christmas time with the broadcast of the Festival of Nine Lessons and Carols whose centenary is celebrated this year How did this small band of men and boys in a famous fenland town in England come to sing in the extraordinary way they did in the twentieth and early twenty-first centuries It has been widely assumed that the King's style essentially continues an English choral tradition inherited directly from the Middle Ages In this original and illuminating book Timothy Day shows that this could hardly be further from the truth Until the 1930s the singing at King's was full of high Victorian emotionalism like that at many other English choral foundations well into the twentieth century The choir's modern sound was brought about by two intertwined revolutions one social and one musical From 1928 singing with the trebles in place of the old lay clerks the choir was fully made up of choral scholars college men reading for a degree Under two exceptional directors of

music Boris Ord from 1929 and David Willcocks from 1958 the style was transformed and the choir broadcast and recorded until it became the epitome of English choral singing setting the benchmark for all other choral foundations either to imitate or to react against Its style has now been taken over and adapted by classical performers who sing both sacred and secular music in secular settings all over the world with a precision inspired by the King s tradition I Saw Eternity the Other Night investigates the timbres of voices the enunciation of words the use of vibrato But the singing of all human beings in whatever style always reflects in profound and subtle ways their preoccupations and attitudes to life These are the underlying themes explored by this book

Micro-residential Dynamics Shlomit Flint Ashery,2018-09-14 This book examines how non economic inter and intra group relationships were reflected in residential patterns around the first decade of the 21st century in Whitechapel an old yet attractive absorption neighbourhood in east London UK It sheds light on different levels of organisation that shape urban space and suggests an integrated understanding linking socio cultural religious norms and the urban environment that could be extrapolated to other cities It studies core methodologies through joining of detailed primary empirical research collected through direct engagement with the communities of interest with a wider theoretical and modelling framework This study identifies the main engines of organised neighbourhood change and the difficulties of planning It deals with individuals in the housing market and sheds light on similar processes occurring in other city centres with diverse population groups Based on residential records at the resolution of single family and apartment covering a period of 17 years the study reveals and analyses powerful mechanisms of residential relations at the apartment building and the near neighbourhood level Taken together these revealed mechanisms are candidates for explaining the dynamics of residential segregation in the area during the period 1995 to 2012 Whitechapel s communities are extremely diverse composed of 27 ethnic and religious groups and sub groups The residential preferences of group members are highly

affected by the need to live among friends other members of the same group How is it that the area has been so attractive for so many people to live in whilst at the same time being so diverse that people cannot achieve their stated preferences to live amongst friends

Evaluating Public Programs Patrick D. Larkey,2015-03-08 For effective program evaluation it is necessary to specify a counterfactual state i e what would have happened without the program Conventional approaches to program evaluation preoccupied with technical and value issues fail to address directly the need for counterfactual arguments They also fail to recognize the indispensable role of positive theories of technical and behavioral processes in making these arguments In order to understand the impact of the General Revenue Sharing GRS program on the fiscal behavior of municipal governments Patrick Larkey develops and demonstrates an unconventional approach to program evaluation that overcomes these failures Drawing on the positive theories of budgetary decisionmaking processes as well as longitudinal revenue and expenditure data from primary sources the author specifies estimates and tests four bureaucratic process models for each of five city governments receiving GRS funds Using these models to generate complex counterfactual hypotheses he then compares the counterfactual patterns with observed patterns to understand the fiscal effects of GRS Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 [1998 Higher Education Directory](#) Mary Pat Rodenhouse,1998 *Public School Salaries in 1924-1925* National Education Association of the United States.
