The Wounded Storyteller Body Illness And Ethics:

The Wounded Storyteller Arthur W. Frank, 1997-05-15 Ill people are more than victims of disease or patients of medicine they are wounded storytellers Frank argues People tell stories to make sense of their suffering when they turn their diseases into stories they find healing Drawing on the work of authors such as Oliver Sacks Anatole Broyard Norman Cousins and Audre Lorde as well as on the stories of people he has met during years spent among different illness groups Frank recounts a stirring collection of illness narratives ranging from the well known Gilda Radner's battle with ovarian cancer to the private testimonials of people with cancer chronic fatigue syndrome and disabilities Their stories are more than accounts of personal suffering they abound with moral choices and point to a social ethic Frank identifies three basic narratives of illness stories of restitution chaos and quest Restitution narratives anticipate getting well and give prominence to the technology of cure In chaos narratives illness seems to stretch on forever with no respite or redeeming insights Quest narratives are about finding that illness can be transformed into a means for the ill person to become someone new Understanding these three narrative types helps us to hear the ill but ultimately illness stories are more Frank presents these stories as a form of testimony the ill person is more than a survivor she is a witness Schooled in a pedagogy of suffering the ill person reaches out to others offering a truth about living The truth is a starting point for a narrative ethics as private experiences become public voices Wounded storytellers teach more than a new way to understand illness they exemplify an emerging ethic of postmodern times

The Wounded Storyteller Arthur W. Frank, 1997 Narrative Medicine: Trauma and Ethics Anders Juhl Rasmussen, Morten Sodemann, 2024-05-14 This new volume repositions narrative medicine and trauma studies in a global context with a particular focus on ethics Trauma is a rapidly growing field of especially literary and cultural studies and the ways in which trauma has asserted its relevance across disciplines which intersect with narrative medicine and how it has come to widen the scope of narrative research and medical practice constitute the principal concerns of this volume This collection brings together contributions from established and emerging scholars coming from a wide range of academic fields within the faculty of humanities that include literary and media studies psychology philosophy history anthropology as well as medical education and health care studies This crossing of disciplines is also represented by the collaboration between the two editors Most of the authors in the volume use narrative medicine to refer to the methodology pioneered by Rita Charon and her colleagues at Columbia University but in some chapters the authors use it to refer to other methodologies and pedagogies utilizing that descriptor Trauma is today understood both in the restricted sense in which it is used in the mental health field and in its more widespread popular usage in literature This collection aspires to prolong deepen and advance the field of narrative medicine in two important aspects by bringing together both the cultural and the clinical side of trauma and by opening the investigation to a truly global horizon The Palgrave Handbook of Infertility in History Gayle Davis, Tracey Loughran, 2017-09-01 This ground breaking interdisciplinary volume provides an overdue assessment of how infertility has

been understood treated and experienced in different times and places It brings together scholars from disciplines including history literature psychology philosophy and the social sciences to create the first large scale review of recent research on the history of infertility Through exploring an unparalleled range of chronological periods and geographical regions it develops historical perspectives on an apparently transhistorical experience It shows how experiences of infertility access to treatment and medical perspectives on this condition have been mediated by social political and cultural discourses The handbook reflects on and interrogates different approaches to the history of infertility including the potential of cross disciplinary perspectives and the uses of different kinds of historical source material and includes lists of research resources to aid teachers and researchers It is an essential go to point for anyone interested in infertility and its history Chapter 19 is open access under a CC BY 4 0 license via link [springer.com](https://www.springer.com)

Falling into Now Claire Smith, 2018-10-19 When Claire reflects on her life now in the opening chapter she mentions that her right leg is in a brace Readers are left wondering what happened Why is she grateful to be able to walk only a few steps The answer is gradually revealed over the course of the memoir as Claire writes about her equestrian life and the years following its sudden end on September 13 1997 While she chronicles her past her story weaves into and out of the now Although Claire feels that she will never completely let go of the successes or of the crushing disappointments that accentuated her time in the equestrian world this memoir is about so much more It s about being driven to pursue a goal It s about a life changing loss It s about arduous recovery It s about a life evolving into something completely unexpected A compelling story of determination resilience and persistence in the face of tremendous loss this memoir is bound to be inspiring particularly for the many individuals who are forced to confront life altering challenges

Narrative Art and the Politics of Health Neil Brooks, Sarah Blanchette, 2021-03-15 As countless alterations have taken place in medicine in the twenty first century so too have literary artists addressed new understandings of disease and pathology Disability studies fat studies mad studies end of life studies and critical race studies among other fields have sought to better understand what social factors lead to pathologizing certain conditions while other variations remain normalized While recognizing that these scholarly approaches often speak to identities with radically different experiences of pathologization this collection of essays is open to all critical engagements with narratives of health in order to facilitate the messiness of cross disciplinary collaboration and interdisciplinarity As scientific advances provide insight into a wide range of well being issues and help extend life it is vital that we come to question the very categories of healthy and unhealthy This collection brings together analyses of cultural productions which probe those categorizations and suggest new psychological and philosophical understandings which will help better apply and guide the knowledge being rapidly developed within the life sciences Right of health is a widely accepted human right but in applying a right to healthcare what care and what sort of health are less universally agreed upon The contributors share an interest in addressing who controls answers to the questions of how do we define a healthy body and a healthy life and what are the political forces that

influence our definitions of health **Metagnosis** Danielle Spencer,2020-10-08 This book identifies and names the phenomenon of metagnosis the experience of newly learning in adulthood of a longstanding condition It can occur when the condition has remained undetected e g colorblindness and or when the diagnostic categories themselves have shifted e g ADHD More broadly it can occur with unexpected revelations bearing upon selfhood such as surprising genetic test results This phenomenon has received relatively scant attention yet learning of an unknown condition is frequently a significant and bewildering revelation subverting narrative expectations and customary categories **Maps and Meaning** Nancy H. In this work Botin begins by reflecting on the development of electronic records in the Danish healthcare system Richard Cooper takes the theme of electronic health records into the field of pharmacy On the face of it both of these would seem to provide a way of improving service However the more we use technology the more it is important to examine underlying values and ethical issues and this leads to an increased focus on developing and maintaining the autonomy and responsibility of the patient or customer Rolv Blaker Eileen Nafstad and Norman Andressen then take the focus to psychology Blaker directly addresses the ideology that may be predominant in a society and thus may be reflected in any professional practice whereas Norman Anderssen and Ingrid Dundas take this further in analyzing underlying ideologies in teaching research methodology in psychology Hilde Eileen Nafstad in the following chapter takes this theme to a more profound level by focusing on the ideology based assumptions in research on human suffering concretized by studies of Post Traumatic Stress Syndromes in relation to war experiences Simon Robinson invites us to look at the moral context of employability and Elizabeth Ozorak looks at the world views and values underlying the student experience of service or volunteer learning Bruce Macfarlane takes the debate further in chapter eight by focusing on the academic profession and the idea of academic citizenship Derek Sellman takes this theme and applies it to the profession of nursing while Joan Whitman Hoff in her chapter takes us into what still for many people is uncharted ethical territory the world of IT as it used in teaching Suzy Jagger s chapter focuses on the teaching of computer ethics Like Sellman she wants to focus on the moral development of the students and looks to how this might be charted Development ethical development or any other involves change and John Strain considers whether we ought to take history more seriously in the ethical education In an age which is persistently confronted with innovation it is understandable that ethics is regarded as something that people will find compelling on account of its innovative character This book then argues that Applied and Professional Ethics is not to be confined to any predetermined shape Along with the dilemmas and the theories there are those underlying values and world views that are of equal importance in creating ethos and community and in enabling creative response Such values are there at the heart of virtue ethics Because of the plurality of the educational and professional community values and perspectives and assessments of values differ and thus dialogue is at the heart such ethics This book suggests that the teaching of Applied and Professional Ethics has to engage at all these levels and thereby both take seriously all aspects of ethics for living and working All of these chapters began their life as either keynote lectures or papers at the Second International Conference on Teaching Applied and Professional Ethics in Higher Education the Real World Real People Conference Ethics in a Virtual World London 30th August to September 1st 2005 **The SAGE Encyclopedia of Qualitative Research Methods** Lisa M.

The Autobiography Effect Dennis Schep,2019-07-24 Since the advent of post structuralism various authors have problematized the modern conception of autobiography by questioning the status of authorship and interrogating the relation between language and reality Yet even after making autobiography into a theoretical problem many of these authors ended up writing about themselves This paradox stands at the center of this wide ranging study of the form and function of autobiography in the work of authors who have distanced themselves from its modern instantiation Discussing Roland Barthes Jacques Derrida H l l ne Cixous and others this book grapples with the question of what it means to write the self when the self is understood as an effect of writing Combining close reading intellectual history and literary theory The Autobiography Effect traces how
