Name: _____ Date: _____

Instructions: In this test, you will be shown pictures. For each picture, create a story that explains what is happening, what led to this situation, and how the characters might feel. Feel free to be as creative as you like. There are no right or wrong answers; we are interested in your unique perspective. Take your time, and let your imagination guide you. When you're ready, begin the story for each picture below.

Notes: Please remember to be as descriptive as possible in your stories. The more information you provide, the better we can understand your unique thought processes and emotions. If you have any questions or need assistance, don't hesitate to ask. Enjoy the journey of self-exploration through storytelling!

Leopold Bellak,1975 **Understanding Psychological Assessment** William I. Dorfman,Michel Hersen,2013-11-11

Introductory texts on psychological testing and evaluation historically are not in short supply Typically however such texts have been relatively superficial in their discussion of clinical material and have focused primarily on the theoretical and psychometric properties of individual tests More practical clinically relevant presentations of psychological instruments have been confined to individual volumes with advanced and often very technical information geared to the more sophisticated user Professors in introductory graduate courses are often forced to adopt several advanced texts to cover the material at the same time helping students wade through unnecessary technical information in order to provide a basic working knowledge of each test Understanding Psychological Assessment is an attempt to address these concerns It brings together into a single volume a broad sampling of the most respected instruments in the psychologist s armamentarium along with promising new tests of cognitive vocational and personality functioning Additionally it presents the most updated versions of these tests all in a practical clearly written format that covers the development psychometrics administrative considerations and interpretive hypotheses for each instrument Clinical case studies allow the reader to apply the interpretive guidelines to real clinical data thereby reinforcing basic understanding of the instrument and helping to insure that both the student and practitioner can actually begin to use the test Understanding Psychological Assessment includes cognitive and personality tests for adults children and adolescents as well as chapters on the theory of psychological measurement and integrated report writing Journal of Projective Techniques ,1962 **Monographs in Psychiatry** Lafayette Clinic (Detroit, Mich.),1972
