Theology on a Defiant Earth Jonathan Cole,Peter Walker,2022-11-01

Humanity operates like a force of nature capable of affecting the destiny of the Earth System

This epochal shift profoundly alters the relationship between humankind and the Earth presenting the conscious thinking human animal with an unprecedented dilemma

As human power has grown over the Earth so has the power of nature to extinguish human life

The emergence of the Anthropocene has settled any question of the place of human beings in the world we stand inescapably at its center

The outstanding question which forms the impetus and focus for this book remains

What kind of human being stands at the center of the world

And what is the nature of that world

Unlike the scientific fact of human centeredness this is a moral question a question that brings theology within the scope of reflection on the critical failures of human irresponsibility

Much of Christian theology has so far flunked the test of engaging the reality of the Anthropocene

The authors of these original essays begin with the premise that it is time to push harder at the questions the Anthropocene poses for people of faith

The Cultic Milieu Jeffrey Kaplan,Heléne Lööw,2002

In 1972 a period of social upheaval much like today sociologist Colin Campbell posited a cultic milieu

An underground region where true seekers test hidden forgotten and forbidden knowledge

Ideas and allegiances within the milieu change as individuals move between loosely organized groups but the larger milieu persists in opposition to the dominant culture

Jeffrey Kaplan and Helene Loow find Campbell s theory

Ecopoetics of Reenchantment Bénédicte Meillon, 2022-11-07 Ecopoetics of Reenchantment Liminal Realism and Poetic Echoes of the Earth tackles the reenchantment process at work in a part of contemporary ecoliterature that is marked by the resurfacing of the song of the earth topos and of Gaia images Focusing on the postmodernist braiding of various indigenous and ecofeminist ontologies close readings of the animistic and totemic dimensions of the stories at hand lead to the theorizing of liminal realism a mode that shares much with magical realism but that is approached through an ecopoetic lens specifically working an interspecies kind of magic situating readers in between human and other than human worlds This book promotes a worldview based on relationships of reciprocity and symbiosis It restores our capacity for

wonder together with our sensitive intelligence Liminal realism adopts a stance in between scientific mythical and poetic worldviews as it calls attention to the soundscapes odorscapes feelscapes and landscapes of the world This monograph offers an original transdisciplinary and cross Atlantic take on ecopoetics as it straddles the two academic worlds and sparks a conversation between artworks theories and studies emerging from the English speaking world as well as from Francophone contexts Entangling the materiality of language back within the flesh of the world this book and the texts under study provide insight into the fundamentally sympoietic dimension of ecopoiesis Heritage – Between and Beyond Nature, Culture and Agency Joanna Godlewicz-Adamiec, Monika Stobiecka, 2025-08-11 In an era of climate emergency and political upheaval heritage demands radical rethinking This volume confronts the Enlightenment rooted dualisms that fragment heritage into opposing categories By embracing posthumanist concepts like naturecultures and agency this volume explores entangled human and nonhuman pasts from the contested Bia owie a Forest to ancient sensory environments Through case studies spanning archaeology museum studies and literary analysis contributors unravel heritage as a dynamic more than human meshwork This collection is an urgent call to transcend reductive binaries fostering an ethical responsive and sustainable heritage practice attuned to our shared precarious futures **Faith, Hope and Poetry** Malcolm Guite, 2020-04-15 Faith Hope and Poetry explores the poetic imagination as a way of knowing a way of seeing reality more clearly Presenting a series of critical appreciations of English poetry from Anglo Saxon times to the present day Malcolm Guite applies the insights of poetry to contemporary issues and the contribution poetry can make to our religious knowing and the way we do theology This book is not solely concerned with overtly religious poetry but attends to the paradoxical ways in which the poetry of doubt and despair also enriches theology Developing an original analysis and application of the poetic vision of Coleridge Larkin and Seamus Heaney in the final chapters Guite builds towards a substantial theology of imagination and provides unique insights into truth that complement and enrich more strictly rational ways of knowing Readers of this book will return to their reading of poetry equipped with new insights and enthusiasm and will be challenged to integrate imaginative ways of knowing into their other academic and intellectual pursuits **Ecological Identity** Mitchell Thomashow, 1996-07-25 Through theoretical discussion as well as hands on participatory learning approaches Thomashow provides concerned citizens teachers and students with the tools needed to become reflective environmentalists Mitchell Thomashow a preeminent educator shows how environmental studies can be taught from different perspective one that is deeply informed by personal reflection Through theoretical discussion as well as hands on participatory learning approaches Thomashow provides concerned citizens teachers and students with the tools needed to become reflective environmentalists What do I know about the place where I live Where do things come from How do I connect to the earth What is my purpose as a human being These are the questions that Thomashow identifies as being at the heart of environmental education Developing a profound sense of oneself in relationship to natural and social ecosystems is necessary grounding for the difficult work of

environmental advocacy In this book he provides a clear and accessible guide to the learning experiences that accompany the construction of an ecological identity using the direct experience of nature as a framework for personal decisions professional choices political action and spiritual inquiry Ecological Identity covers the different types of environmental thought and activism using John Muir Henry David Thoreau and Rachel Carson as environmental archetypes but branching out into ecofeminism and bioregionalism issues of personal property and consumption political identity and citizenship and integrating ecological identity work into environmental studies programs Each chapter has accompanying learning activities such as the Sense of Place Map a Community Network Map and the Political Genogram most of which can be carried out on an individual basis Although people from diverse backgrounds become environmental activists and enroll in environmental studies programs they are rarely encouraged to examine their own history motivations and aspirations Thomashow s approach is to reveal the depth of personal experience that underlies contemporary environmentalism and to explore interpret and nurture the learning spaces made possible when people are moved to contemplate their experience of nature

Witnessing a Wounded World Timothy Middleton, 2025-11-04 A crucial intervention at the intersection of ecotheology and trauma theology We are in the midst of a global ecological crisis At times the scale of the suffering involved can be hard to fully comprehend The whole planetary ecosystem feels out of kilter Meanwhile trauma theorists and society at large have become increasingly aware of the incidence of trauma in a growing variety of contexts In *Witnessing a Wounded World* Timothy Middleton asks what might be gained by viewing ecological suffering through the lens of trauma By bringing

concepts and methodologies from trauma theology to bear on questions that arise within ecotheology Middleton engages a series of pressing questions What kind of traumas are being precipitated by anthropogenic climate change and accelerating biodiversity loss What would it mean to envisage the Earth itself as traumatized And how might a Christian theologian respond From large scale deforestation and opencast mining to rampaging wildfires and fracturing ice sheets the Earth itself is subject to intense devastation Witnessing a Wounded World analyzes such phenomena in terms of three traumatic ruptures to communication to flesh and to time Drawing on practices of witnessing and the insights of deep incarnation Christologies Middleton proceeds to offer a theological account of this ecological trauma For Christians a model of Christic witnessing can bring the Earth s suffering to light As the first sustained treatment of ecological trauma to address the trauma of the Earth itself Witnessing a Wounded World makes a profound contribution to discussions of suffering faith and the present ecological emergency
