Theoretische Pedagogiek Over Opvoeden En Leren Weten En Geweten:

Theoretische pedagogiek Jan Dirk Imelman, 2002 *International Handbook of the Religious, Moral and Spiritual Dimensions in Education* Marian de Souza, Gloria Durka, Kathleen Engebretson, Robert Jackson, Andrew McGrady, 2007-06-04

Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it as today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world Religious Education in a World of Religious Diversity Wilna A.J. Meijer, Siebren Miedema, Alma Lanser-van der Velde, 2009 This volume brings together a selection of papers presented at the Fifteenth Session of the International Seminar on Religious Education and Values ISREV which took place in 2006 in Driebergen the Netherlands addressing the theme Religious Education in a World of Religious Diversity The authors were invited to combine the concept of diversity with the dimensions of temporality of time and history in reworking their contributions for this book This temporal aspect is in a sense inherent in educational thinking On the one hand education as intergenerational transmission has a conservative aspect tradition being what is actually and presently transmitted from the past and or what is considered worthwhile to be passed on On the other hand acknowledging the activity of students themselves as a prerequisite for any education to happen brings the open endedness and therefore the future into the pedagogical arena in terms of development learning reflection edification et cetera So the question answered in this volume is what does this inherent historicity mean for religious education as well as for the concept religion and religious diversity In answering this question the contributions represent the global character of the concern with religious diversity in relation to religious education and originate respectively from the following countries Canada Bhikkhu English United States Moran Latvia Ilishko Russia Kozyrev Germany Pirner South Africa Roux du Preez Ferguson Japan Omori Australia de Souza Turkey Sel uk and the Netherlands Meijer Miedema Het pedagogisch quotiënt Alexander Minnaert, Henk Iutje Spelberg, Hilda Amsing, 2009-02-02 De kernvraag van dit boek is wat is de pedagogische kwaliteit Is het mogelijk hiervoor normen te ontwikkelen Welke kwaliteitseisen kun je opstellen bij de beoordeling van gezinnen ouders agogische instellingen en hen die hierbij beroepshalve betrokken zijn Dit boek geeft antwoord op de vragen die betrekking
