**Industry 4.0 and Climate Change** Rajeev Agrawal, J. Paulo Davim, Maria L.R. Varela, Monica Sharma, 2022-10-17 At present both Industry 4 0 and industrial engineering management developments are reshaping the industrial sector worldwide Industry 4 0 and sustainability are considered as the crucial emerging trends in industrial production systems The resulting transformations are changing production modes from traditional to digital intelligent and decentralized It is expected that Industry 4 0 will help drive sustainability in industries thanks to the implementation of advanced technology and a move towards social sustainability This book reflects on the consequences of the transition to Industry 4 0 for climate change The book presents a systemic overview of the current negative impacts of digitization on the environment and showcases a new outline of the energy domain and expected changes in environmental pollution levels under Industry 4 0 It also analyzes the ecological consequences of the growth and development of Industry 4 0 and considers Industry 4 0 as an alternative to fighting climate change in the sense of shifting the global community s attention from environmental protection to consolidation of the digital economy This book will be of interest to academicians

and practitioners in the fields of climate change and development of Industry 4.0 and it will contribute to national economic policies for fighting climate change and corporate strategies of sustainable development under Industry 4.0

**Information Control Problems in Manufacturing Technology 1989** E.A. Puente, L. Nemes, 2014-06-28 The Symposium presented and discussed the latest research on new theories and advanced applications of automatic systems which are developed for manufacturing technology or are applicable to advanced manufacturing systems The topics included computer integrated manufacturing simulation and the increasingly important areas of artificial intelligence and expert systems and applied them to the broad spectrum of problems that the modern manufacturing engineer is likely to encounter in the design and application of increasingly complex automatic systems

CAD/CAM Abstracts, 1986 Advanced Design and Manufacturing Based on STEP Xun Xu, Andrew Yeh Ching Nee, 2009-09-29 Design and manufacturing is the essential element in any product development lifecycle Industry vendors and users have been seeking a common language to be used for the entire product development lifecycle that can describe design manufacturing and other data pertaining to the product Many solutions were proposed the most successful being the Standard for Exchange of Product model STEP STEP provides a mechanism that is capable of describing product data independent from any particular system The nature of this description makes it suitable not only for neutral file exchange but also as a basis for implementing sharing and archiving product databases ISO 10303 AP203 is the first and perhaps the most successful AP developed to exchange design data between different CAD systems Going from geometric data as in AP203 to features as in AP224 represents an important step towards having the right type of data in a STEP based CAD/CAM system Of particular significance is the publication of STEP NC as an extension of STEP to NC utilising feature based concepts for CNC machining purposes The aim of this book is to provide a snapshot of the recent research outcomes and implementation cases in the field of design and manufacturing where STEP is used as the primary data representation protocol The 20 chapters are contributed by authors from most of the top research teams in the world These research teams are based in national research institutes industries as well as universities
