New and advanced features include an objectives grid at the end of each chapter which ties the objectives to examples within the sections, assessment exercises at the end of each section and relevant chapter problems at the end of each chapter. A new Math Check allows quick access to the needed basic skill. The first chapter now includes brief introductions to several fundamental chemical concepts and Chapter Synthesis Problems have been added to the end of each chapter to bring key concepts into one encompassing problem. Every concept in the text is clearly illustrated with one or more step-by-step examples. Making it Real essays have been updated to present timely and engaging real-world applications emphasizing the relevance of the material they are learning. Common chemicals are used whenever possible as examples in both theoretical discussions and in problems and exercises. Incorporates many pedagogical aids; each chapter begins with a brief table of contents and each section begins with a preview of topics covered. Chapters include frequent margin comments, figures, and photographs.
