Man vs Machine Technology continues to advance at a rapid pace. It may sound quaint today but not so long ago computers battled humans for supremacy at the game of chess. The challenge of building a computer program capable of defeating the best of human kind at chess was one of the original grand challenges of the fledgling field of artificial intelligence. On one side were dedicated scientists and hobbyists who invested decades of effort developing the software and hardware technology; on the other side were incredibly talented humans with only their determination and preparation to withstand the onslaught of technology. The man versus machine battle in chess is a landmark in the history of technology. There are numerous books that document the technical aspects of this epic story. The human side is not often told. Few chess players are inclined to write about their man-machine encounters other than annotating the games played. This book brings the two sides together. It tells the stories of many of the key scientists and chess players that participated in a 50-year research project to advance the understanding of computing technology. Grandmaster Karsten Müller and Professor Jonathan Schaeffer have managed to describe the fascinating history of the unequal fight of man against machine in an entertaining and instructive way. It evoked pleasant and not so pleasant memories of my own fights against the monsters. I hope that their work gives you as much pleasure as it has given me. From the Foreword by Vladimir Kramnik 14th World Chess Champion **Boys' Life**, 1942-10

Boys Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting. **How to Out-Prepare Your Opponent** Jeroen Bosch, 2022-06-23

The number of hours you can spend on opening preparation is endless. Books, videos, and databases offer hundreds of ever-widening variations. But how do you find your way through this labyrinth? Where do you start? And maybe even more importantly, where do you stop? International Master Jeroen Bosch provides a solution to those answers. He presents a structured approach to the study of openings and the preparation for a club match or a tournament game. Every time strapped chess improver will love Bosch's approach. Instead of studying more hours or memorizing more lines, he advises you to start making smart choices. The goal is not to reach a slight advantage in every possible line. The goal is to dictate what will happen on the board. You want to get a position you understand and are happy to play and make your opponent feel uncomfortable. Jeroen Bosch provides you with all the tools you need to dominate the opening phase of the game: how to use move order and how to use tactics. He explains when to play a main line, when to come up with an opening surprise, or when to risk a gambit. And much, much more.
