Thinking about Nature (Routledge Revivals) Andrew Brennan, 2014-07-16 Ecology unlike astronomy physics or chemistry is a science with an associated political and ethical movement the Green Movement As a result the ecological position is often accompanied by appeals to holism and by a mystical quasi religious conception of the ecosystem In this title first published in 1988 Andrew Brennan argues that we can reduce much of the mysticism surrounding ecological discussions by placing them within a larger context and illustrating that our individual interests are bound with larger community interests Using an interdisciplinary approach which bridges the gap between the sciences philosophy and ethics this is an accessible title which will be of particular value to students with an interest in the philosophy of environmental science and ethics

Engaging Nature Peter F. Cannavò, Joseph H. Lane Jr., 2014-12-19 Contemporary environmental political theory considers the implications of the environmental crisis for such political concepts as rights citizenship justice democracy the state race class and gender As the field has matured scholars have begun to explore connections between Green Theory and such canonical political thinkers as Plato Machiavelli Locke and Marx The essays in this volume put important figures from the political theory canon in dialogue with current environmental political theory It is the first comprehensive volume to bring the insights of Green Theory to bear in reinterpreting these canonical theorists Individual essays cover such classical figures in Western thought as Aristotle Hume Rousseau Mill and Burke but they also depart from the traditional canon to consider Mary Wollstonecraft W E B Du Bois Hannah Arendt and Confucius Engaging and accessible the essays also offer original and innovative interpretations that often challenge standard readings of these thinkers In examining and explicating how these great thinkers of the past viewed the natural world and our relationship with nature the essays also illuminate our current environmental predicament Publisher
