T O L E G A L R E A S O N I N G

This is a book about thinking and reasoning. More particularly, it is about the thinking, reasoning, and argumentative methods of lawyers and judges, which may or may not be different from the thinking, reasoning, and argumentative methods of ordinary people. Whether lawyers think, reason, and argue differently from ordinary folk is a question and not an axiom, but it is nonetheless the case that certain techniques of reasoning are thought to be characteristic of legal decision-making.

An Introduction to African Legal Philosophy John Murungi, 2013-04-11 A book on legal philosophy necessarily focuses attention on law In addition to this focus An Introduction to an African Legal Philosophy focuses attention on philosophy The link between law and philosophy is brought into relief which is done through an African context An attempt is made to spell out what is African about legal philosophy without being cut off of African legal philosophy from non African legal philosophy The book draws attention to the view that a basic component of African legal philosophy consists of an investigation of what it is to be an African and because an African is a human being among other human beings the investigation is about what it is to be a human being Ubuntuism is an African derived word that captures this mode of being human Moreover because human beings are cultural beings African cultural context guides the investigation Inescapably it is claimed that every legal philosophy is embedded in a culture African legal philosophy is not an exception It is deeply rooted in African culture a culture that is today shaped in part by a European colonialist culture One feature that will strike one as one reads the book is that the book approaches African legal philosophy as a means of decolonization of African culture African legal philosophy can accomplish this intelligently and effectively if it is itself decolonized In doing this it contrasts sharply with mainstream Western legal philosophy

The Future of Governance Roger Brownsword, 2024-08-02 This book offers a radically different introduction to law one that reflects the challenges and opportunities presented by the rapid technological developments of

our time Traditionally law has been about historic principles and rules and their application to a particular set of facts and courts judges and disputes have been central to the legal enterprise Against this approach this book highlights four radical and revisionist ideas by bringing modern technologies into the foreground by presenting law as one particular mode of governance in a larger picture of governance that now includes technological modalities by insisting that we have to think outside the traditional doctrinal box to engage with a broad range of governance questions and by emphasising that human communities cannot flourish without good governance to which both lawyers and law are central These four radical threads are woven into a discussion of the modern landscape of law and together they offer a distinctly contemporary contribution to the quest for good governance The challenge for lawyers now the book maintains is to contribute to thinking both locally and globally about how we take advantage of the opportunities presented by the newest technology without compromising the essential conditions for human life and co existence and without losing what we value in law s governance This book is aimed at students who are studying law at university and legal academics and others interested in the current and future impact of technology on law

Beyond Legal Reasoning: a Critique of Pure Lawyering Jeffrey Lipshaw,2017-03-27 The concept of learning to think like a lawyer is one of the cornerstones of legal education in the United States and beyond In this book Jeffrey Lipshaw provides a critique of the traditional views of thinking like a lawyer or pure lawyering aimed at lawyers law professors and students who want to understand lawyering beyond the traditional warrior metaphor Drawing on his extensive experience at the intersection of real world law and business issues Professor Lipshaw presents a sophisticated philosophical argument that the pure lawyering of traditional legal education is agnostic to either truth or moral value of outcomes He demonstrates

Failures of American Civil Justice in International Perspective
