Nine Lives of Neoliberalism Philip Mirowski, Dieter Plehwe, Quinn Slobodian, 2020-05-05 Untangling the long history of neoliberalism Neoliberalism is dead Again Yet the philosophy of the free market and the strong state has an uncanny capacity to survive and even thrive in times of crisis Understanding neoliberalism s longevity and its latest permutation requires a more detailed understanding of its origins and development This volume breaks with the caricature of neoliberalism as a simple unvariegated belief in market fundamentalism and homo economicus It shows how neoliberal thinkers perceived institutions from the family to the university disagreed over issues from intellectual property rights and human behavior to social complexity and monetary order and sought to win consent for their project through the creation of new honors disciples and networks Far from a monolith neoliberal thought is fractured and occasionally even at war with itself We can begin to make sense of neoliberalism s nine lives only by understanding its own tangled and complex history

Meanings of the Market James G. Carrier, 2020-05-28 For almost twenty years the Free Market has been a central feature of public debate in the West Eastern Europe and elsewhere In the name of the Market and its supposed benefits governments and international agencies have imposed massive changes on peoples lives Curiously scholars have paid little attention to the ways that the idea of the Market is invoked to what it might mean and how it is being used This book helps correct that state of affairs Focusing on the United States where the Market model is strongest authors analyze portrayals of the Market its values and the people within it as a way of teasing out its assumptions and contradictions They also describe extensions and practical applications of the Market model in policy making in the United States and in explaining how firms work show its political strengths and conceptual limitations In bringing rigor and sustained critical analysis to a topic of growing global significance this truly interdisciplinary study represents a coherent and incisive contribution to anthropology sociology politics history and economics as it challenges

and Right Ana Rita Ferreira, João Cardoso Rosas, 2014-01-08 The great dichotomy between left and right has been a feature of pluralist politics since its emergence in modern times Left and right are also central to the understanding of the political history of the twentieth century and may be gaining renewed visibility in the context of the current economic crisis both in Europe and beyond Should scholars think once again with and within the dichotomy or can they think better beyond its strictures The contributions to this volume provide answers to these and other questions in ways that are theoretically sound and empirically informed Making Things Happen Gerald Frost, 2015-03-17 Before he was forty Nigel Vinson inventor

helped her establish This biography tells the story of a man whose influence both direct and indirect has been considerably greater than is widely realised He is a man who saw through the fashionable shibboleths of his day but was often ahead of the trend a man whose do as you would be done by moral philosophy enormously practical nature and infectious enthusiasm have been fundamental to his continued success Nigel Vinson is a man who has made things happen and he continues to do so to this day

explicates recurrent themes which cross the boundaries of the conventional periodisation of the history of British socialist thought themes which illustrate the sustained nature of the multifaceted ideological challenge presented by the accommodation of the consumer within socialist political economy This challenge necessitates an engagement with the character and priorities of a future socialist society As such it touches on some of the key issues which socialists have confronted in pursuit of their vision of a good society issues with a strong contemporary relevance such as the desirability of private as against social opulence the relationship between consumption and happiness the need to educate and or to liberate desire and in particular the environmental and social consequences of rising levels of consumer expectation and consumption The study also throws light on how the disparate ways in which these issues were addressed reflected and shaped the socialist political economies that emerged in the nineteenth and twentieth centuries while also engendering tensions between them

Unwitting Architect Julian Germann, 2021-01-05 The global rise of neoliberalism since the 1970s is widely seen as a dynamic originating in the United States and the United Kingdom and only belatedly and partially repeated by Germany From this Anglocentric perspective Germany's emergence at the forefront of neoliberal reforms in the eurozone is perplexing and tends to be attributed to the same forces conventionally associated with the Anglo American pioneers This book challenges this ruling narrative conceptually and empirically It recasts the genesis of neoliberalism as a process driven by a plenitude of actors ideas and interests And it lays bare the pragmatic reasoning and counterintuitive choices of German crisis managers that are obscured by this master story Drawing on extensive original archival research this book argues that German officials did not intentionally set out to promote neoliberal change Instead they were more intent on preserving Germany's export markets and competitiveness in order to stabilize the domestic compact between capital and labor Nevertheless the series of measures German policy elites took to manage the end of golden age capitalism promoted neoliberal transformation in crucial respects it destabilized the Bretton Woods system it undermined socialist and social democratic responses to the crisis in Europe it frustrated an internationally coordinated Keynesian reflation of the world economy and ultimately it helped push the US into the Volcker interest rate shock that inaugurated the attack on welfare and labor under Reagan and Thatcher From this vantage point the book illuminates the very different rationale behind the painful reforms German state managers have demanded of their indebted eurozone partners *The Oxford Handbook of Comparative Environmental Politics* Jeannie Lynn Sowers, Stacy D. VanDeveer, Erika Weinthal, 2023 Including 42 chapters organized across 9 sections The Oxford Handbook of Comparative Environmental Politics explores some of the most important environmental issues through the lens of comparative politics including energy climate change food health urbanization waste and sustainability The chapters delve into more traditional forms of comparative environmental politics CEP the political economy of natural resources and the role of corporations and supply chains while also showcasing new trends in CEP scholarship particularly the comparative study of environmental injustice and intersectional inequities The

Handbook highlights scholarship from a broader range of regions and includes approaches from political science anthropology sociology geography gender theory law human rights and development studies **New Earth Politics** Simon Nicholson, Sikina Jinnah, 2016-03-04 Prominent scholars and practitioners consider the role of global environmental politics in the face of increasing environmental stress Humanity's collective impact on the Earth is vast The rate and scale of human driven environmental destruction is quickly outstripping our political and social capacities for managing it We are in effect creating an Earth 2.0 on which the human signature is everywhere a new earth in desperate need of humane and insightful guidance In this volume prominent scholars and practitioners in the field of global environmental politics consider the ecological and political realities of life on the new earth and probe the field's deepest and most enduring questions at a time of increasing environmental stress Arranged in complementary pairs the essays in this volume include reflections on environmental pedagogy analysis of new geopolitical realities reflections on the power of social movements and international institutions and calls for more compelling narratives to promote environmental action At the heart of the volume is sustained attention to the role of traditional scholarly activities in a world confronting environmental disaster Some contributors make the case that it is the scholar's role to provide activists with the necessary knowledge and tools others argue for more direct engagement and political action All the contributors confront the overriding question What is the best use of their individual and combined energies given the dire environmental reality Contributors Erik Assadourian Frank Biermann Wil Burns Ken Conca Peter Dauvergne Daniel Deudney Navroz Dubash Richard Falk Joyeeta Gupta Maria Ivanova Peter Jacques Sikina Jinnah Karen T Litfin Michael F Maniates Elizabeth Mendenhall Simon Nicholson Kate O'Neill Judith Shapiro Paul Wapner Oran R Young
