Braille Book Review ,2015-03 **Shakespearean Perspectives** David Lucking,2017-03-14 David Lucking sees

Shakespeare's plays as negotiating tensions between a number of alternative and sometimes mutually antagonistic perspectives. Some of these perspectives are associated with particular languages, cultures, and texts, while others involve philosophical issues such as the nature of personal ontology and distinctions between reality and dream, being and nothingness. In elaborating his insights, Lucking draws extensive comparisons with Lucretius' *De Rerum Natura* and between Sophocles' Theban plays and *King Lear*, and he also pays close attention to *A Midsummer Night's Dream*, *Henry V*, *Julius Caesar*, *Hamlet*, and *Antony and Cleopatra*. Re-assessing a wide range of earlier commentary, his nine essays confirm the lasting value of apposite contextualization in tandem with detailed close reading.

Source Code Meditation Michael Cotton, 2018-05-22. Learn to mobilize latent energy in your body and direct it to energize and awaken your higher brain. Provides a simplified step-by-step guided process to the higher brain activation techniques of Source Code Meditation. Explains how to shift energy out of the lower survive brain into the higher thrive brain to bring confidence, clarity, and empowerment for transformative change in all areas of life. Reveals how the brain first techniques of SCM tune the brain to receive meditation, enabling access to deep flow states, transcendent states of consciousness, and higher brain potential. The human brain is like a flowing river of potential. Until now, that river has been blocked, barricaded, and diverted by the primitive lower brain. The lower brain hijacks our ability to experience deeper flow and higher transcendent states of consciousness. It also guards against the full expression of the passionate human heart. Source Code Meditation (SCM) with its nine summits of transformation effortlessly re-routes that lower brain diversion, allowing you to activate latent energy in your body, awaken your higher brain, enlighten your mind, and set your heart on fire to create a new world. With traditional meditation techniques, it often takes decades of practice, for hours each day, to confer significant changes in the mind and the higher brain. Few of us make it to these rarified states of mind due to the amount of time and the intensity of focus needed. With brain first SCM techniques, you mobilize latent energy in the body and direct it to energize and awaken the higher brain before meditation begins. With the higher brain prepped and tuned, meditation is efficiently received, leading to quantum breakthroughs in higher consciousness without years of practice, as well as access to deep flow states, transcendent states of consciousness, and higher brain potential. Providing a simplified step-by-step guided process to SCM, Dr. Michael Cotton explains how to shift energy out of the lower survive brain into the higher thrive brain to bring confidence, clarity, and empowerment for transformative change in all areas of life. Distilled from the world's most comprehensive philosophy, Integral Metatheory, SCM offers not only a way to create the brain state necessary to change the mind, but the crystal clarity needed to use these advanced meditative states to actualize your potential and live your destiny to the fullest.
