Sue Dale Tunnicliffe, Teresa J. Kennedy, 2022-06-16 This edited book provides an overview of unstructured and structured play scenarios crucial to developing young children's awareness, interest, and ability to learn Science, Technology, Engineering, and Mathematics (STEM) in informal and formal education environments. The key elements for developing future STEM capital, enabling children to use their intuitive critical thinking and problem-solving abilities, and promoting active citizenship and a scientifically literate workforce, begins in the early years as children learn through play, employing trial and error and often investigating on their own. Forty-seven STEM experts come together from 16 countries: Argentina, Australia, Belgium, Canada, England, Finland, Germany, Israel, Jamaica, Japan, Malta, Mauritius, Mexico, Russia, Sweden, and the USA, and describe educational policies and experiences related to young learners 3-4 years of age, as well as students attending formal nursery school, early primary school, and the early years classes post 5 years of age. The book is intended for parents seeking to provide STEM activities for their children at home and in playgroups; citizen scientists seeking guidance to provide children with quality educational activities; daycare practitioners providing educational structures for young children from birth to formal education; primary school teachers and preservice teachers seeking to teach preschool kindergarten or children typically aged 5-8 years old in grades 1-3; as well as researchers and policy makers working in science didactics with small children.

Women in Mechanical Engineering Margaret Bailey, Laura Shackelford, 2022-04-27 This book features influential scholarly research and technical contributions, professional trajectories, disciplinary shifts, personal insights, and a combination of these from a group of remarkable women within mechanical engineering. Combined, these chapters tell an important story about the dynamic field of mechanical engineering in the areas of energy and the environment, as seen from the perspective of some of its most extraordinary women scientists and engineers. The volume shares with the Women in Engineering and Science Series the primary aim of documenting and raising awareness of the valuable, multi-faceted contributions of women engineers and scientists past and present to these areas. Women in mechanical engineering and energy and the environment are historically relevant and continue to lead these fields as passionate risk takers, entrepreneurs, innovators, educators, and researchers. Chapter authors are members of the National Academies, winners of major awards, and recognition that include Presidential Medals, as well as SWE, SAE, ASME, ASCE, and IEEE Award winners and Fellows.

The EdTech Advocate's Guide to Leading Change in Schools Mark Gura, 2018-02-27 New and emerging tech coaches and technology leaders will get guidance in making decisions and taking the right steps to effectively manage change in a shifting education landscape. The education field is in the midst of a complete digital transformation. Accordingly, tech coaches and other school leaders must shift from simply bringing technology into schools to identifying how the various elements of this changing landscape fit together to form an improved version of education. These changes affect everyone in the school, and as entire school communities are impacted, informed individuals who can guide the transformation are needed. The problem is that there are not nearly enough certified tech coaches in schools, and those who are in place are not always

adequately prepared to handle this new mission This book aims to address these issues by offering Advice on planning and guiding change in digital age schools Examples of digital age schools and advice from change agents in the field Activities action plans templates checklists and other planning tools to help tech coaches and other leaders put what they learn into action This book helps tech coaches and school technology leaders embrace their roles and guides them as they make important decisions and take meaningful steps to effectively participate in this education transformation Audience
