Third Language Learners Second Language Acquisition:

Cross-linguistic Influence in Third Language Acquisition Jasone Cenoz, Britta Hufeisen, Ulrike Jessner, 2001-01-01

Third language acquisition is a common phenomenon which presents some specific characteristics as compared to second language acquisition. This volume adopts a psycholinguistic approach in the study of cross linguistic influence in third language acquisition and focuses on the role of previously acquired languages and the conditions that determine their influence.

Third language acquisition Camilla Bardel, Laura Sánchez, 2020-11-19 This book deals with the phenomenon of third language L3 acquisition. As a research field L3 acquisition is established as a branch of multilingualism that is concerned with how multilinguals learn additional languages and the role that their multilingual background plays in the process of language learning. The volume points out some current directions in this particular research area with a number of studies that reveal the complexity of multilingual language learning and its typical variation and dynamics. The eight studies gathered in the book represent a wide range of theoretical positions and offer empirical evidence from learners belonging to different age groups and with varying levels of proficiency in the target language as well as in other non native languages belonging to the learner's repertoire. Diverse linguistic phenomena and language combinations are viewed from a perspective where all previously acquired languages have a potential role to play in the process of learning a new language. In the six empirical studies contexts of language learning in school or at university level constitute the main outlet for data collection. These studies involve several language backgrounds and language combinations and focus on various linguistic features. The specific target languages in the empirical studies are English, French and Italian. The volume also includes two theoretical chapters. The first one conceptualizes and describes the different types of multilingual language learning investigated in the volume: i) third or additional language learning by learners who are bilinguals from an early age and ii) third or additional language learning by people who have previous experience of one or more non native languages learned after the critical period. In particular issues related to the roles played by age and proficiency in multilingual acquisition are discussed. The other theoretical chapter conceptualizes the grammatical category of aspect reviewing previous studies on second and third language acquisition of aspect. Different models for L3 learning and their relevance and implications for representations of aspect and for potential differences in the processing of second and third language acquisition are also examined in this chapter. As a whole the book presents current research into third or additional language learning by young learners or adults considering some of the most important factors for the complex process of multilingual language learning: the age of onset of the additional language and that of previously acquired languages, social and affective factors, instruction, language proficiency and literacy, the typology of the background languages and the role they play in shaping syntax, lexicon and other components of a L3. The idea for this book emanates from the symposium 'Multilingualism, language proficiency and age' organized by Camilla Bardel and Laura Sánchez at Stockholm University Department of Language Education in December.

2016 **Third or Additional Language Acquisition** Gessica De Angelis, 2007-08-09 Third or Additional Language Acquisition examines research on the acquisition of languages beyond the L2 withing four main areas of inquiry crosslinguistic influence multilingual speech production models the multilingual lexicon and the impact of bi multilingualism on cognitive development The book critically examines the evidence available keeping two main questions in mind The first is whether multilinguals should be considered as learners and speakers in their own right and consequently whether the distinction between Second Language Acquisition and Bilingualism and Third or Additional Language Acquisition and Multilingualism is fully warranted The second is how proficient in a non native language learners are supposed to be before they can begin to be classified as multilingual learners in empirical research *Multilingualism and third language acquisition* Jorge Pinto, Nélia Alexandre, 2021-02-12 The purpose of this book is to present recent studies in the field of multilingualism and L3 bringing together contributions from an international group of specialists from Austria Canada Germany Portugal Spain Switzerland Turkey and United States The main focuses of the articles are three language acquisition language learning and teaching A collection of theoretical and empirical articles from scholars of multilingualism and language acquisition makes the book a significant resource as the papers present a wide perspective from main theories to current issues reflecting new trends in the field The authors focus on the heterogeneity and complexity that characterize third language acquisition multilingual learning and teaching As the issues addressed in this book intersect it represents an asset and therefore the texts will be of great relevance for the scientific community Part I presents different topics of L3 acquisition such as syntax phonology working memory and selective attention and lexicon Part II comprises texts that show how the research on language acquisition informs pedagogical issues For instance the role of the knowledge of previous languages in the teaching of L3 the attitudes of multilingual teachers to plurilingual approaches and the benefits of crosslinguistic pedagogy versus classroom monolingual bias In sequence Part III consists of texts on individual learning strategies such as motivation and attitudes crosslinguistic awareness and students perceptions about teachers plurilingual nonnativism All these chapters include several different languages in contact in an acquisition learning context Basque English French German Italian Latin Portuguese Russian Spanish and Turkish **English in Europe** Jasone Cenoz, Ulrike Jessner, 2000-01-01 This book emerges as a response to the increasing use of English as a lingua franca in the multilingual European context It provides an up to date overview of the sociolinguistic psycholinguistic and educational aspects of research on third language acquisition by focusing on English as a third language **Processes in Third Language Acquisition** Bjorn Hammarberg, 2009-08-20 This volume brings together six case studies of an adult multilingual speaker who acquires a new language through social interaction The book deals especially with the multilingual situation the learner s acquisitional activities and the involvement of background languages in the process of speaking It offers a coherent study of various linguistic phenomena in one individual including patterns and functions of language switching word search in

interaction hypothetical construction of words and articulatory settings in speaking The main languages involved are English L1 German L2 and Swedish L3 The activation of these languages in the learner's speech is examined in a cognitive perspective in relation to current models of the speaking process A longitudinal corpus of NNSNS conversations covering 21 months from the beginner stage provides the main data for these studies Key Features Presents an example of an active and purposeful language acquirer Explores cross linguistic influence in a multilingual setting Highlights the significance of prior L2 knowledge in L3 performance Useful for students and researchers interested in second and third language acquisition individual multilingualism and the human speaking process Third Language Acquisition and Universal Grammar Yan-kit Ingrid Leung, 2009-01-01 This volume presents studies which approach the relatively new field of third language L3 acquisition from the generative linguistic perspective It aims to bring together researchers who are interested in L3 acquisition and who are at the same time working within the generative framework i.e. Chomsky's Universal Grammar UG approach to language acquisition A total of nine contributions are included reporting research on L3 involving different combinations of source target languages and investigating various UG related properties Introducing Second Language Acquisition Muriel Saville-Troike, Karen Barto, 2017 Third edition of the leading interdisciplinary introduction to second language acquisition covering linguistic psychological and social aspects Linguistic Awareness in Multilinguals Ulrike Jessner, 2006-03-15 This book discusses cognitive and psycholinguistic aspects of third language acquisition and trilingualism and explores the key role of linguistic awareness in multilingual proficiency and language learning In view of the widespread acquisition of English by those who are already bilingual or are also acquiring a regional lingua franca this study will contribute to the current discussion of multilingualism with English in Europe and beyond as well as the understanding of multilingual speech processing The author supports a dynamic view of multilingualism by stressing the cognitive advantages that the contact with more languages can offer and uses this approach as the basis for future language teaching and learning Chapters cover topics such as performing in a third language metalinguistic awareness in multilinguals and in multilingual education and English as a third language in Europe **Third Language Acquisition in Adulthood** Jennifer Cabrelli Amaro, Suzanne Flynn, Jason Rothman, 2012 Provides an overview of present trends in the study of adult additive multilingualism from formal psycholinguistic and sociolinguistic perspectives adding new insights into adult multilingual epistemology This book includes critical reviews of L3 L2 morphosyntax phonology and the lexicon **Introducing Second Language Acquisition** Muriel Saville-Troike, Karen Barto, 2016-12-15 Providing a solid foundation in second language acquisition this book has become the leading introduction to the subject for students of linguistics psychology and education and trainee language teachers Now in its third edition the textbook offers comprehensive coverage of fundamental concepts including second language acquisition SLA in adults and children in formal and informal learning contexts and in diverse socio cultural settings and takes an interdisciplinary approach encouraging students to consider SLA from linguistic

Influence of Bilingualism on Third Language Acquisition Valeriya Tsybenova, 2017-10-30 Seminar paper from the year 2015 in the subject English Pedagogy Didactics Literature Studies grade 1 0 University of Potsdam Anglistik Amerikanistik course English as a Foreign Language language English abstract The paper focuses on a particular aspect of third language acquisition the influence of bilingualism on third language acquisition There are a number of reasons why it is considered to be an important area of investigation First and foremost it represents an area that demonstrates clearly the differences between second and third language acquisition Third language learners have already acquired two other languages either simultaneously or consecutively as first or first and second languages Therefore the knowledge of these two languages and the experience of the acquisition process of another language are likely to influence the acquisition of a third language Research that compares second language acquisition to third language acquisition is central in third language acquisition studies because it can contribute to the identification of specific characteristics in the process of third language acquisition which are not present in the process of acquiring a second language In this context it should also be remembered that while there is extensive research on the effect of bilingualism on cognitive development and metalinguistic awareness the particular effect of bilingualism on subsequent language learning has not received much attention

Key Terms in Second Language Acquisition Bill VanPatten, Alessandro G. Benati, 2010-01-04 Key Terms in Second Language Acquisition includes definitions of key terms within second language acquisition and also provides accessible summaries of the key issues within this complex area of study The final section presents a list of key readings in second language acquisition that signposts the reader towards classic articles and also provides a springboard to further study The text is accessibly written with complicated terms and concepts explained in an easy to understand way Key Terms in Second Language Acquisition is an essential resource for students

Turkish-German Bilinguals and Third Language Acquisition Mariam Ahmadi, 2015-10-26 Seminar paper from the year 2015 in the subject English Language and Literature Studies Linguistics grade 1 7 University of Hamburg course The Structure of English Linguistik Vertiefung language English abstract This paper deals with the process of third language acquisition by Turkish immigrants in Germany This process is unique and distinct from their first and second language acquisition as it is influenced by first and second language acquisition Cultural diversity in different societies around the world in the 21st century places a great emphasis on the value of language acquisition Whether it is in business politics or other international interactions and further aspects of life in particular education language acquisition has become more and more important As a result bilingualism is seen as a norm rather than an exception in many societies around the globe Although considered fairly recent linguistics have studied the acquisition of a first language by infants and second language acquisition in children and adults with varying approaches in the past decades However people are not only increasingly exposed to numerous languages in multilingual settings but

they are also learning them This is ascribed to the movement of people from one society to another resulting in an increased contact with different cultures Due to that fact researchers have begun to put an emphasis on studies about multilingualism and the distinct acquisition of languages past a second non native language While many researchers classified any non native language acquisition as second language acquisition in the past recent studies discuss the phenomenon of third language acquisition In this day and age it has become common that migrants who are proficient in their native language and have moved to or are born in a multicultural country will not only learn the official language of that same country but also an additional foreign language Because of this growing phenomenon bilingualism and its effects on third language acquisition have also gained more attention by researchers in linguistic studies According to the Federal Statistical Office of Germany and a microcensus which has been conducted in the year 2013 16.5 million out of the total population of roughly 81 million people in Germany had a migrant background The largest ethnic group of immigrants who either migrated to Germany or were born in Germany as second generation immigrants is comprised of Turks On this account language acquisition of Turks living in multicultural Germany and their integration in terms of language is significant to the study of third language acquisition

Second Language Acquisition Neal Snape, Tanja Kupisch, 2017-09-16 Exploring the canonical topics in second language acquisition this book introduces different theoretical perspectives and explores the types of research carried out in the field Individual chapters have been written so that they can stand alone giving instructors and students total control over the pace and order of study and the book is written in an accessible conversational style inviting engagement with this dynamic topic

Second Language Acquisition Surveys key studies in the acquisition of morphology syntax and phonology Features a whole chapter dedicated to bilingualism tying together two closely linked fields Examines the role and implications of pedagogy in language teaching contexts Employs end of chapter questions concept practice and suggestions for further reading to encourage deeper engagement with topic
