Reproducing images of people places events and objects from the unceded territories of the First Nations Inuit and Métis from British North America and from the Dominion of Canada and the Dominion of Newfoundland Langford asks where and when photographs were taken why and by whom How did the making and preservation of a photograph alter the circumstances in which it was produced and how did this affect individual and collective consciousness Alongside accomplished portraits landscapes still lifes and their vernacular counterparts the book draws glimmers of photographic experience from treatises and doggerel official reports and personal diaries newspapers magazines letters and travelogues Anticipation to Participation chronicles eight decades of reinvention and repurposing from a wondrous discovery to the wide adoption of a basic tool for knowledge gathering artmaking and journaling Langford's sweeping narrative rewrites the history of photography from the bottom up vividly expanding the definition of photographic experience

Semantics of Generics in Dutch and Related Languages Albert Oosterhof, 2008 This monograph is a comprehensive study of the various ways in which genericity can be expressed in Dutch dialects of Dutch and languages related to Dutch On the basis of empirical corpus and questionnaire based data a wide range of topics are discussed which have been addressed in the literature on the semantics and pragmatics of generics The empirical data presented in this book shed new light on issues crucial to the study of genericity A number of widely accepted ideas are shown to be problematic For example arguments are presented against the well known claim that progressive forms typically exclude characterizing interpretations Furthermore the author shows that speakers do not agree in their judgements of the acceptability of bare plurals as well as other noun phrase types in generic contexts Such data are a problem for the influential thesis that bare plurals refer to kinds unambiguously **US Department of State Dispatch**, 1990 Contains a diverse compilation of major speeches congressional testimony policy statements fact sheets and other foreign policy information from the State Dept

they battle it out to see who will be the winner of a life changing prize In watching this Maria realized that the contestants learned things about themselves that they might never have known before During the production of this show Maria realized that she could not be her true self until she stripped back the negativity that was clouding her life and made more self affirming actions that would lead her to what she truly wanted This book is Maria s insights about being happy learned from her time in the entertainment industry observing people and events traveling and studying wellbeing Within these pages is a practical guide for a creative path to happiness through taking photographs with your camera phone journaling about things that matter and being part of a supportive community You can create a healthier state of being and have fun doing it Even when your world turns upside down you can still be the writer director and producer of the life you want **Humanitarian**

Aftershocks in Haiti Mark Schuller,2016-01-12 The 2010 earthquake in Haiti was one of the deadliest disasters in modern history sparking an international aid response with pledges and donations of 16 billion that was exceedingly generous But now five years later that generous aid has clearly failed In *Humanitarian Aftershocks in Haiti* anthropologist Mark Schuller captures the voices of those involved in the earthquake aid response and they paint a sharp unflattering view of the humanitarian enterprise Schuller led an independent study of eight displaced persons camps in Haiti compiling more than 150 interviews ranging from Haitian front line workers and camp directors to foreign humanitarians and many displaced Haitian people The result is an insightful account of why the multi billion dollar aid response not only did little to help but also did much harm triggering a range of unintended consequences rupturing Haitian social and cultural institutions and actually increasing violence especially against women The book shows how Haitian people were removed from any real decision making replaced by a top down NGO dominated system of humanitarian aid led by an army of often young inexperienced foreign workers Ignorant of Haitian culture these aid workers unwittingly enacted policies that triggered a range of negative results Haitian interviewees also note that the NGOs planted the flag and often tended to just do something always with an eye to the photo op in no small part due to the competition over funding Worse yet they blindly supported the eviction of displaced people from the camps forcing earthquake victims to relocate in vast shantytowns that were hotbeds of violence *Humanitarian Aftershocks in Haiti* concludes with suggestions to help improve humanitarian aid in the future perhaps most notably that aid workers listen to and respect the culture of the victims of catastrophe *Photo-era Magazine*

The Harmful Feature of Generics Juan C. Abel,Thomas Harrison Cummings,Wilfred A. French,A. H. Beardsley,1919 **The Harmful Feature of Generics** Martina Rosola,2025-06-23 *The Harmful Feature of Generics* provides an in depth investigation into the role of generics in essentialization offering a thorough examination of its roots Generics sentences expressing generalizations about categories or their members are a common means to express stereotypes we typically say Philosophers are absent minded rather than Some Many Most philosophers are absent minded The present book shows that this correlation is no coincidence As emerged from robust empirical literature generics seem to foster social essentialism that is they lead people to believe that the

categories they are about possess an underlying essence In doing so generics dangerously contribute to stereotyping But what enables generics to essentialize The author untangles this puzzle thanks to an interdisciplinary approach encompassing philosophy linguistics and psychology She draws on Haslanger's 2011 2014 hypothesis that generics implicitly convey that the target category and predicated property are strongly connected Rosola refines this proposal and substantiates it through the linguistic tests for implicatures and presuppositions concluding that generics convey a generalized and particularized conversational implicatures which form the basis for essentialist beliefs The cover image was created by Photographer Andy Brown within the project The Image Speaks 2019 organized and funded by The University of Sheffield
