

The background of the book cover is a photograph of a pond in autumn. The water is dark blue, and the surface is covered with fallen leaves in shades of orange, yellow, and red. The leaves are scattered across the water, some floating and some partially submerged. The overall scene is peaceful and evocative of the fall season.

A Greener Faith Roger S. Gottlieb, 2006-06-15 In a time of darkening environmental prospects frightening religious fundamentalism and moribund liberalism the remarkable and historically unprecedented rise of religious environmentalism is a profound source of hope In *A Greener Faith* Roger S. Gottlieb chronicles the promises of this critically important movement illuminating its principal ideas leading personalities and ways of connecting care for the earth with justice for human beings He also shows how religious environmentalism breaks the customary boundaries of religious issues in political life Asserting that environmental degradation is sacrilegious sinful and an offense against God catapults religions directly into questions of social policy economic and moral priorities and the overall direction of secular society Gottlieb contends that a spiritual perspective applied to the Earth provides the environmental movement with a uniquely appropriate way to voice its dream of a sustainable and just world Equally important it helps develop a world making political agenda that far exceeds interest group politics applied to forests and toxic incinerators Rather religious environmentalism offers an all inclusive vision of what human beings are and how we should treat each other and the rest of life Gottlieb deftly analyzes the growing synthesis of the movement's religious social and political aspects as well as the challenges it faces in consumerism fundamentalism and globalization Highly engaging and passionately argued this book is an indispensable resource for people of faith environmentalists scholars and anyone who is concerned about our planet's future

The Oxford Handbook of Religion and Ecology Roger S. Gottlieb, 2006-11-09 The last two decades have seen the emergence of a new field of academic study that examines the interaction between religion and ecology Theologians from every religious tradition have confronted world religions past attitudes towards nature and acknowledged their own faiths complicity in the environmental crisis Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the book's essays will reflect the three dominant dimensions of the field Part one will explore traditional religious concepts of and attitudes towards nature and how these have been changed by the environmental crisis Part II looks at larger conceptual issues that transcend individual traditions Part III will examine religious participation in environmental politics

Reading with Earth Anne Elvey, 2022-08-25 Winner of the 2023 ANZATS Award for the Best Monograph by an Established Scholar Applying a re-envisioned ecological feminist hermeneutics this book builds on two important responses to twentieth and

twenty first century situations of ecological trauma especially the complex contexts of climate change and cross species relations first ecological feminism second ecological hermeneutics in the Earth Bible tradition By way of readings of selected biblical texts this book suggests that an ecological feminist aesthetic bringing present situation and biblical text into conversation through engagement with activism and literature principally poetry is helpful in decolonizing ethics Such an approach is both informed by and speaks back to the new materialism in ecological criticism *Pilgrims and Pilgrimages as Peacemakers in Christianity, Judaism and Islam* Antón M. Pazos,2016-04-08 Pilgrimages can be analysed as acts of conflict such as the Crusades or also as platforms for relationship building and rapprochement between religions With a set of contributions from leading experts in the field this book explores the concept of pilgrimage in Christianity Judaism and Islam Some specific examples of pilgrimages that helped to strengthen links between different religions or civilisations are explored ranging from Europe to Asia and from the Middle Ages to the twentieth century Even though every pilgrimage that is investigated here has helped to link different worlds the case studies show that this relationship rarely led to a better inter understanding Nowadays peaceful coexistence seems to be its greatest achievement

Seaweeds and their Role in Globally Changing Environments Alvaro Israel,Rachel Einav,Joseph Seckbach,2010-06-18 Global warming is accelerating faster than the ability for natural repair and environmental stresses are damaging ecosystems all affecting physical and biological systems on Earth A new Nasa led study shows that human activity has caused climate changes resulting in permafrost thawing acid rain and lower productivity in lakes as well as increased emissions of greenhouse gases including CO₂ N₂O CH₄ CF₃ and CFC Marine plants play a vital role in maintaining the balance of marine environments while serving as a source of food for humankind and important chemical compounds Microalgae and seaweed have enormous potential for reducing global warming and climate change During photosynthesis algae grow draw CO₂ from the atmosphere release oxygen and produce solar biofuel Experts in the life of marine plant ecosystems in globally changing environments contributed chapters to this book The target readers are phycologists ecologists atmospheric scholars conservationists environmentalists and ecologically aware laymen *Christianity and Ecological Theology* E. M. Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa

Pragmatic Legal and Policy Implications of Environmental Lawmaking Movahedian, Hussein,Norouzi, Nima,2023-05-01 The publication of environmental degradation statistics worldwide and the announcement of scientific assessments of the process of its destruction have attracted everyone's attention to the environment On the world stage international environmental laws and regulations must be formulated to protect the environment and humanity from further harm This book provides selective coverage of environmental and energy

law within the European Union EU and the United Kingdom as well as internationally It is crucial to examine environmental and energy law from a wide range of perspectives and approaches to gain insight into how the law is designed to tackle particular environmental problems arising in both professional and theoretical settings Pragmatic Legal and Policy Implications of Environmental Lawmaking bridges the knowledge gap between legal developments designed to achieve environmental and or energy objectives for example pollution control and conservation on the one hand and the practical scientific and technical considerations applicable to the same environmental problems on the other By adopting a multi disciplinary approach to environmental and energy law the book embraces all readerships and goes a step further to address the often difficult problem of improving communication between scientists and engineers and law and policymakers Covering topics such as environmental degradation energy law and international trade legislation the book will be useful to law students and professionals working in the fields of environmental and or energy law engineering and geo science students and professionals as well as others working in various other disciplines

Religion and the Environment Roger S. Gottlieb, 2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity's treatment of the environment have developed Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality poverty or war and peace is now a basic and compelling religious matter Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings Theologians from every religious tradition along with dozens of non denominational spiritual writers have confronted world religions past attitudes towards nature In the realm of institutional commitment public statements and actions by organized religions have grown dramatically In the context of political action throughout the U S and the world religiously oriented groups take part in environmentally oriented political action from lobbying and consciousness raising to activist demonstrations and civil disobedience This collection serves as a comprehensive introduction overview and in depth account of these exciting new developments The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy from new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded

Worldviews, Religion, and the Environment Richard C. Foltz, 2003 This text strives to be as inclusive as possible It attempts to give voice to as wide a range as possible of the diverse sources of contemporary worldviews throughout the globe Western and Eastern Northern and Southern women's

and men's Preface Envisioning Nature, Science, and Religion James D. Proctor, 2009-10-15 Contemporary scholarship has given rise to several modes of understanding biophysical and human nature each entangled with related notions of science and religion. *Envisioning Nature: Science and Religion* represents the culmination of three years of collaboration by an international group of fourteen natural scientists, social scientists, humanists, and theologians. The result is an intellectually stimulating volume that explores how the ideas of nature pertain to science and religion. Editor James D. Proctor has gathered sixteen in-depth essays each examining and comparing five central metaphors or visions of biophysical and human nature: These visions are evolutionary nature, emergent nature, malleable nature, nature as sacred, and nature as culture. The book's diverse contributors offer a wide variety of unique perspectives on these five visions spanning the intellectual spectrum and proposing important and often startling implications for religion and science alike. Throughout the essays, the authors do a great deal of cross-referencing and engaging each other's ideas, creating a cohesive dialogue on the visions of nature. *Envisioning Nature: Science and Religion* offers a blend of scholarly rigor and readable prose that will be appreciated by anyone engaged in the fields of religion, philosophy, and the natural sciences.

Indigenous Traditions and Ecology John Grim, 2001 The authors, a diverse group of indigenous and non-native scholars and environmental activists, address urgent questions facing indigenous communities as they struggle with threats to their own sovereignty, increased market and media globalization, and the conservation of endangered bioregions.

Religion and Ecology Mary Evelyn Tucker, 2001 *Religion and the Environment: Ectheology II: Islma, Asian traditions and indigenous traditions* Roger S. Gottlieb, 2010 In the last two decades, a new form of religiously motivated social action and a virtually new field of academic study, each based in recognition of the connections between religion and humanity's treatment of the environment, have developed. Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings, institutional commitment by organized religions, and environmental activism explicitly oriented to religious ideals. Clergy throughout the world, in virtually every denomination, have received word from leaders of their religion that the environment, no less than sexuality, poverty, or war and peace, is now a basic and compelling religious matter. Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition, profound criticisms of the past, and ecologically oriented visions of God, the Sacred, the Earth, and human beings. Theologians from every religious tradition, along with dozens of non-denominational spiritual writers, have confronted world religions' past attitudes towards nature. In the realm of institutional commitment, public statements and actions by organized religions have grown dramatically. In the context of political action throughout the U.S. and the world, religiously oriented groups take part in environmentally oriented political action, from lobbying and consciousness-raising to activist demonstrations and civil disobedience. This collection serves as a comprehensive introduction, overview, and in-depth account of these exciting new developments. The four volumes cover virtually every aspect of the field, from theological change and institutional commitment to innovation in liturgy, from

new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded **Environmental Education** ,2005 This title is intended as a manual for environmental education practitioners It provides theoretical background with the view of improving environmental education practitioners practice *Judaism and Ecology* Hava Tirosh-Samuelson,2002 This volume intends to contribute to the nascent discourse on Judaism and ecology by clarifying diverse conceptions of nature in Jewish thought and by using the insights of Judaism to formulate a constructive Jewish theology of nature CCAR Journal ,2001 *Christian Faith and the Environment* Brennan Hill,1998
