Non-Metaphysical Theology After Heidegger Peter S. Dillard, 2016-06-20 Using Martin Heidegger's later philosophy as his springboard Peter S Dillard provides a radical reorientation of contemporary Christian theology From Heidegger's initially obscure texts concerning the holy the gods and the last god Dillard extracts two possible non metaphysical theologies a theology of Streit and a theology of Gelassenheit Both theologies promise to avoid metaphysical antinomies that traditionally hinder theology After describing the strengths and weaknesses of each non metaphysical theology Dillard develops a Gelassenheit theology that ascribes a definite phenomenology to the human encounter with divinity This Gelassenheit theology also explains how this divinity can guide human action in concrete situations remain deeply consonant with Christian beliefs in the Incarnation and the Trinity and shed light on the Eucharist and Religious Vocations Seminal ideas from Rudolf Otto and Ludwig Wittgenstein are applied at key points Dillard concludes by encouraging others to develop an opposing Streit theology within the non metaphysical Heideggerian framework he presents

The Thinking University Søren S.E. Bengtson, Ronald Barnett, 2018-04-27 This book reinvigorates the philosophical treatment of the nature purpose and meaning of thought in today's universities The wider discussion about higher education has moved from a philosophical discourse to a discourse on

social welfare and service economics and political agendas This book reconnects philosophy with the central academic concepts of thought reason and critique and their associated academic practices of thinking and reasoning Thought in this context should not be considered as a merely mental or cognitive construction still less a cloistered college but a fully developed individual and social engagement of critical reflection and discussion with the current pressing disciplinary political and philosophical issues The editors hold that the element of thought and the ability to think in a deep and groundbreaking way is still the essence of the university But what does it mean to think in the university today And in what ways is thought related not only to the epistemological and ontological issues of philosophical debate but also to the social and political dimensions of our globalised age In many countries the state is imposing limitations on universities dismissing or threatening academics who speak out critically With this volume the editors ask questions such as What is the value of thought What is the university's proper relationship to thought To give the notion of thought a thorough philosophical treatment the book is divided into three parts The focus moves from an epistemological perspective in Part I to a focus on existence and values in higher education in Part II and then to a societal oriented focus on the university in Part III All three parts in their own ways debate the notion of thought in higher education and the university as a thinking form of being
