Development Centre Studies The World Economy Historical Statistics Maddison Angus, 2003-09-25 Following on from his *The World Economy a Millennial Perspective* published by the OECD in 2001 in this book Angus Maddison offers a rare insight into the history and political influence of national accounts and national accounting *The World Economy* Angus Maddison, 2003 Following on from his *The World Economy a Millennial Perspective* published by the OECD in 2001 Angus Maddison offers a rare insight into the history and political influence of national accounts and national accounting He demonstrates that such statistical data can enlighten the contemporary and later observer in the analysis of economic phenomena such as growth market formation and income distribution **The World Economy** Angus Maddison, 2007

World Economic Historical Statistics Carlos Sabillon, 2005 Since the earliest of times human beings have endeavored to uncover the causes of prosperity History is the best tool that society possesses for identifying and analyzing the factors that contribute to economic growth yet economic statistics that lend **Development Centre Studies The World Economy Volume 1: A Millennial Perspective and Volume 2: Historical Statistics** Maddison Angus, 2006-09-18 The *World Economy* brings together two reference works by Angus Maddison *The World Economy A Millennial Perspective* 2001 and *The World Economy Historical Statistics* 2003 This new edition contains Statlinks so that readers can access the underlying data in Excel format **The Cambridge Economic History of Modern Britain** Roderick Floud, Jane Humphries, Paul Johnson, 2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 2 tracks the development of the British economy from late nineteenth century global dominance to its early twenty first century position as a mid sized player in an integrated European economy Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and how to apply quantitative methods The chapters re examine issues of Britain's relative economic growth and decline over the long twentieth century setting the British experience within an international context and benchmark its performance against that of its European and global competitors Suggestions for further reading are also provided in each chapter to help students engage thoroughly with the topics being discussed **On the Causes of Economic Growth** Carlos Sabillon, 2008 In a sweeping review of economic history the author presents the salient facts of booms and slowdowns in the major economies of the world in 50 year intervals and demonstrates the weakness of orthodox theories The only factor that consistently causes growth he shows is centralized support for manufacturing which spurs the creation of new technologies which lead to wealth creation Since the earliest of times human beings have endeavored to uncover the causes of prosperity Step by step Sabillon tests the principal theories on the causes of economic growth against the facts of history Here economic statistics of the world are presented in a rationalized format that allows for comparison across countries and through time with a challenge to those who study them

to determine with an open mind what the statistics show and what are the trends beyond cherished theories that suit various political purposes Tested against the historical data textbook ideas and theories consistently come up short Such analyses are highly troubling because they reveal an absence of correlation between theory and reality The data statistics illustrating the development of the world economy during the last several centuries were extracted from economic history and economic history books from publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish Only decisive intervention in support of manufacturing and technological advancement can provide growth This systematic review of history and test of accepted dogma challenges economic theorists to consider one part of the equation of economic policy that has been wiped off the blackboard in today's politically correct debates

The New Comparative Economic History T. J. Hatton, Kevin H. O'Rourke, Alan M. Taylor, 2007 Essays by internationally prominent economists examine long run cross country economic trends from the perspective of New Comparative Economic History an approach pioneered by Harvard economist Jeffrey G Williamson The innovative approach to economic history known as the New Comparative Economic History represents a distinct change in the way that many economic historians view their role do their work and interact with the broader economics profession The New Comparative Economic History reflects a belief that economic processes can best be understood by systematically comparing experiences across time regions and above all countries It is motivated by current questions that are not nation specific the sources of economic growth the importance of institutions and the impact of globalization and focuses on long run trends rather than short run ups and downs in economic activity The essays in this volume offer a New Economic Comparative History perspective on a range of topics and are written in honor of Jeffrey G Williamson the most distinguished and influential scholar in the field The contributors prominent American and European economists consider such topics as migration education and wage convergence democracy and protectionism in the nineteenth century trade and immigration policies in labor scarce economies and the effect of institutions on European productivity and jobs

Research in Economic History Alexander J. Field, Gregory Clark, William A. Sundstrom, 2008-12-02 Contains six papers evenly divided between European and North American topics On the European side this title provides regional estimates of social overhead investment in Italy Turning west it studies conflicts between ranchers and miners over who should bear the burden of taxation in nineteenth century California

A Global History of Trade and Conflict since 1500 L. Coppolaro, F. McKenzie, 2013-11-20 This book explains the causes and consequences of the intersection of two transformative global forces trade and conflict since 1500 The nine historical case studies interspersed over 500 years and spanning the globe make a major historical contribution to the enduring debate about whether trade makes peace more likely
