White,2021-04-21 The Crowley Millers were the talk of minor league baseball in the 1950s with crowds totaling nearly 10 times Crowley s population and earning Crowley the nickname of The Best Little Baseball Town in the World The Best Little Baseball Town in the World The Crowley Millers and Minor League Baseball in the 1950s tells the fun quirky story of Crowley Louisiana in the fifties a story that reads more like fiction than nonfiction The Crowley Millers biggest star was Conklyn Meriwether a slugger who became infamous after he retired when he killed his in laws with an axe Their former manager turned out to be a con man dying in jail while awaiting trial on embezzlement charges The 1951 team was torn to pieces after their young centerfielder was struck and killed by lightning during a game But aside from the tragedy and turmoil the Crowley Millers also played some great baseball and were the springboard to stardom for George Brunet and Dan Pfister two Crowley pitchers who made it to the majors Interviews with players from the team bring to light never before heard stories and inside perspectives on minor league baseball in the fifties including insight into the social and racial climate of the era and the inability of baseball in the fifties to help players deal with off the field problems Written by respected minor league baseball historian Gaylon H White The Best Little Baseball Town in the World is a fascinating tale for baseball fans and historians alike **Library Skills (eBook)** Sylvia J. Duncan,1989-09-01 This book demonstrates the usefulness of libraries and books by presenting a basic overview of how to find and use library materials Many of the exercises require visits to a school or public library Most of the worksheets can be completed with minimal assistance from the teacher The work study pages reflect the changing world of libraries and information centers New technology affecting present libraries and libraries of the future is introduced and explained on these pages **Managing eBook Metadata in Academic Libraries** Donna E Frederick,2016-01-07 Managing ebook Metadata in Academic Libraries Taming the Tiger tackles the topic of ebooks in academic libraries a trend that has been welcomed by students faculty researchers and library staff However at the same time the reality of acquiring ebooks making them discoverable and managing them presents library staff with many new challenges Traditional methods of cataloging and managing library resources are no longer

relevant where the purchasing of ebooks in packages and demand driven acquisitions are the predominant models for acquiring new content Most academic libraries have a complex metadata environment wherein multiple systems draw upon the same metadata for different purposes This complexity makes the need for standards based interoperable metadata more important than ever In addition to complexity the nature of the metadata environment itself typically varies slightly from library to library making it difficult to recommend a single set of practices and procedures which would be relevant to and effective in all academic libraries Considering all of these factors together it is not surprising when academic libraries find it difficult to create and manage the metadata for their ebook collections This book is written as a guide for metadata librarians other technical services librarians and ancillary library staff who manage ebook collections to help them understand the requirements for ebook metadata in their specific library context to create a vision for ebook metadata management and to develop a plan which addresses the relevant issues in metadata management at all stages of the lifecycle of ebooks in academic libraries from selection to deselection or preservation Explores the reasons behind creating records for our resources and challenges libraries to think about what that means for their context Discusses the complex nature of academic libraries and the electronic resources they require Encourages librarians to find their own way to manage metadata
