Worship Britain Ireland Historic Environment:

The Oxford Handbook of Early Christian Archaeology David K. Pettegrew, William Rodney Caraher, Thomas W. Davis, 2019 This handbook brings together work by leading scholars of the archaeology of early Christianity in the Mediterranean and surrounding regions The 34 essays to this volume ground the history culture and society of the first seven centuries of Christianity in the latest currents of archaeological method theory and research Villas, Sanctuaries and Settlement in the Romano-British Countryside Martin Henig, Grahame Soffe, Kate Adcock, Anthony King, 2023-03-02 This volume brings together a range of papers on buildings that have been categorised as villas mainly in Roman Britain from the Isle of Wight to Shropshire It comprises the first such survey for almost half a century **Bruton Parish Church Restored and Its Historic Environment** William Archer Rutherford Goodwin, 1907 **Saints, Cure-seekers and Miraculous Healing in Twelfth-century England** Ruth J. Salter, 2021 The cults of the saints were central to the medieval Church These holy men and women acted as patrons and protectors to the religious communities who housed their relics and to the devotees who requested their assistance in petitioning God for a miracle Among the collections of posthumous miracle stories miracula accounts of holy healing feature prominently and depict cure seekers successfully securing their desired remedy for a range of ailments and afflictions What can these miracle accounts tell us of the cure seekers experiences of their journey from ill health to recovery and how was healthcare presented in these sources This book undertakes an in depth study of the miraculous cure seeking process through the lens of Latin miracle accounts produced in twelfth century England a time both when saints cults particularly flourished and there was an increasing transmission and dissemination of classical and Arabic medical works Focused on shorter miracula with a predominantly localised focus and thus on a select group of cure seekers it brings together studies of healthcare and pilgrimage to look at an alternative to medical intervention and the practicalities and processes of securing saintly assistance Insular Iconographies Meg Boulton, Michael D. J. Bintley, 2019 Essays on aspects of iconography as manifested in the material culture of medieval England Professor Jane Hawkes has devoted her career to the study of medieval stone exploring its iconographies symbolic significances and scholarly contexts and shedding light on the obscure and understudied sculpted stone monuments of Anglo Saxon England This volume builds on her scholarly interests offering new engagements with medieval culture and the current scholarly methodologies that shape the discipline The contributors approach several significant objects and texts from the early and later Middle Ages working across several disciplinary backgrounds and periods largely focusing on the Insular World as it intersects with wider global contexts of the period The chapters cover a wide range of subjects from the material culture of baptism to the material symbolic and iconographic consideration of the artistic outputs of the Insular world with essays on sculpture metalwork glass and manuscripts to ideas of stone and salvation in both material and textual contexts to intellectual puzzles and patterns both material and mathematic to consideration of the ways in which the conversion to Christianity played out on the landscape

 Thomas Philippa Turner Carolyn Twomey **Formative Britain** Martin Carver, 2019-01-14 Formative Britain presents an
 account of the peoples occupying the island of Britain between 400 and 1100 AD whose ideas continue to set the political
 agenda today Forty years of new archaeological research has laid bare a hive of diverse and disputatious communities of
 Picts Scots Welsh Cumbrian and Cornish Britons Northumbrians Angles and Saxons who expressed their views of this world
 and the next in a thousand sites and monuments This highly illustrated volume is the first book that attempts to describe the
 experience of all levels of society over the whole island using archaeology alone The story is drawn from the clothes faces
 and biology of men and women the images that survive in their poetry the places they lived the work they did the ingenious
 celebrations of their graves and burial grounds their decorated stone monuments and their diverse messages This ground
 breaking account is aimed at students and archaeological researchers at all levels in the academic and commercial sectors It
 will also inform relevant stakeholders and general readers alike of how the islands of Britain developed in the early medieval
 period Many of the ideas forged in Britain's formative years underpin those of today as the UK seeks to find a consensus
 programme for its future **Health and Architecture** Mohammad Gharipour, 2021-05-06 Health and Architecture offers a
 uniquely global overview of the healthcare facility in the pre modern era engaging in a cross cultural analysis of the
 architectural response to medical developments and the formation of specialized hospitals as an independent building
 typology Whether constructed as part of Chinese palaces in the 15th century or the religious complexes in 16th century
 Ottoman Istanbul the healthcare facility throughout history is a built environment intended to promote healing and caring
 The essays in this volume address how the relationships between architectural forms associated with healthcare and other
 buildings in the pre modern era such as bathhouses almshouses schools and places of worship reflect changing attitudes
 towards healing They explore the impact of medical advances on the design of hospitals across various times and
 geographies and examine the historic construction processes and the stylistic connections between places of care and other
 building types and their development in urban context Deploying new methodological interdisciplinary and comparative
 approaches to the analysis of healthcare facilities Health and Architecture demonstrates how the spaces of healthcare
 themselves offer some of the most powerful and practical articulations of therapy Material Change Jan De Maeyer, Peter
 Jan Margry, 2021-12-17 The long nineteenth century c 1780 c 1920 in Western Europe saw an unprecedented rise in the
 production and possession of material goods The material culture diversified and led to a rich variety of expressions
 Dovetailing with a process of confessionalisation that manifested itself quite simultaneously material religion witnessed its
 heyday in this period from church buildings to small devotional objects The present volume analyses how various types of

reform state societal and ecclesiastical that were part of the process of modernisation affected the material devotional culture within Protestantism Anglicanism and Roman Catholicism Although the contributions in this book start from a comparative European perspective the case studies mostly focus on individual countries in North West Europe namely Germany Belgium the Netherlands the United Kingdom Ireland Norway Sweden and Denmark The concept of material religion is approached in a very inclusive way The volume discusses amongst others parish infrastructures and religious buildings that are part of land and cityscapes but also looks into interior design and decorations of chapels churches monasteries cemeteries and educational charitable and health institutions It comprises the fine arts of religious painting and sculpture the applied arts and iconographic designs As far as private material culture is concerned this volume examines and presents objects related to private devotion at home including a great variety of popular devotional and everyday life objects such as booklets cards photographs and posters

Funding Religious Heritage Anne Fornerød, 2016-03-09 This collection brings together a group of highly respected law and religion scholars to explore the funding of religious heritage in the context of state support for religions The importance of this state support is that on the one hand it illustrates the potential tensions between secular and religious values whilst on the other it constitutes a relevant tool for investigating the question of the legitimacy of such financial support The funding logically varies according to the national system of state religion relationships and this is reflected in the range of countries studied including Belgium Bulgaria Denmark France Italy The Netherlands Spain Turkey and the United Kingdom The book provides clarity in the assignment of funds to religious heritage as well as seeking to define the limit of what relates to the exercise of worship and what belongs to cultural policy It is clear that the main challenge for the future lies not only in managing the dual purpose of religious monuments but also in re using these buildings which have lost their original purpose This collection will appeal to those interested in cultural heritage management as well as law and religion scholars The views expressed during the execution of the RELIGARE project in whatever form and or by whatever medium are the sole responsibility of the authors The European Union is not liable for any use that may be made of the information contained therein

Critical Built Heritage Practice and Conservation

Johnathan Djabarouti, 2024-01-23 *Critical Built Heritage Practice and Conservation* Evolving Perspectives supports an alternative point of departure for engaging with the historic built environment by critically questioning the legitimacy of dominant conservation concepts and methods that are often taken for granted within building conservation architecture and adaptive reuse The meaning of heritage is changing From pastness to presentness from preservation to participation and from tangible to intangible heritage is increasingly understood as a dynamic social and intangible process across many disciplines Consequently the role and remit of the built heritage practitioner and in particular the architectural conservationist is becoming progressively complex and in need of a critical gaze Is restoration really a falsehood from beginning to end Should the condition of existing materials determine the conservation method Is authenticity really an

inherent quality within old buildings By engaging with a critical interpretation of heritage this book makes space for practitioners to consider the evolution of their own role within a rapidly changing context of built heritage practice Reinforced by a shift in emphasis from materials to meanings a socio material outlook is proposed which champions an enhanced focus on intangible heritage within the built heritage sector whilst still acknowledging the physical condition of old buildings is a priority for many stakeholders This book has been written with practitioners students and educators of architectural conservation in mind although will also be of relevance to the broader built heritage industry as well as academics researchers and heritage students with a passion for contemporary dialogues in heritage studies
