Theatre for Women's Participation in Sustainable Development

Beth Osnes, 2013-11-26 Though development researchers have proven that the participation of women is necessary for effective sustainable development, development practitioners still largely lack culturally appropriate gender sensitive tools for including women, especially women living in poverty. Current tools used in the development approach often favour the skill set of the development practitioner and are a mismatch with the traditional gendered knowledge and skills many women who are living in poverty do have. This study explores three case studies from India, Ethiopia and the Guatemala that have successfully used applied theatre for women's participation in sustainable development. This interdisciplinary book has the opportunity to be the first to bring together the theory, scholarship and practice of theatre for women's participation in sustainable development in an international context. This work will be of great interest to scholars and practitioners in a wide variety of fields who are looking for creative solutions for utilizing the contributions of women for solving our global goals to live in a sustainable way on this one planet in a just and equitable manner.
