Classical Approaches to the Study of Religion Jacques Waardenburg, 2017-01-23 Waardenburg's magisterial essay traces the rise and development of the academic study of religion from the mid nineteenth to the mid twentieth century outlining the establishment of the discipline its connections with other fields religion as a subject of research and perspectives on a phenomenological study of religion Furthermore a second part comprises an anthology of texts from 41 scholars whose work was programmatic in the evolution of the academic study of religion Each chapter presents a particular approach theory and method relevant to the study of religion The pieces selected for this volume were taken from the discipline of religious studies as well as from related fields such as anthropology sociology and psychology to name a few

Theory and Method in the Study of Religion Carl Olson, 2003 This anthology provides students with a useful collection of theoretical essays concerning the nature of religion and the methodological means by which scholars analytically approach the subject Organized in a point counterpoint fashion this volume will foster in class discussion and the honing of a student's own critical perspectives

The Sacred and Its Scholars Thomas A. Idinopulos, Edward A. Yonan, 1996 This volume of essays is devoted to a careful examination of the importance of methodology in the study of primary religious data The essays focus on the Sacred as an ultimate object of descriptive analysis and critical scrutiny on the part of a select number of North American and European methodologists in the study and teaching of the history of religions and its allied disciplines The central question to which the contributors respond are these What is the Sacred Is it a being or a concept of a being is it a mental state or an objective reality or something else entirely Can the Sacred be described as an empirical fact or as a formal rule for religious inquiry If the Sacred is a valid category in the study and teaching of religion then what can be said about the antithesis of the sacred namely the profane or the secular This volume probes these questions with great care in order to justify a number of ways the Sacred can be construed as an indispensable notion for the study and teaching of religion

Muslims as Actors Jacques Waardenburg, 2012-02-13 This book deals with Islamic studies and with the question how the scholarly study of religion can contribute to the study of Islam The author advocates studying Islamic phenomena as signs and symbols interpreted and applied in diverse ways in existing traditions He stresses the role of Muslims as actors in the ongoing debate about the articulation of Islamic ways of life and construction of Islam as a religion A careful study of this debate should steer clear of political religious and ideological interests Research in this area by Muslims and non Muslim scholars alike should address the question of what Muslims have made of their Islam in specific circumstances Current political contexts have created an unhealthy climate for pursuing an open approach to Islam based on reading observing listening and reflecting Yet precisely nowadays we need to look anew at ways of Muslim thinking and acting that refer to Islam and to avoid certain schemes of interpreting Muslim realities that are no longer adequate for present day Muslim life situations Muslim recourse to Islam can be studied as human constructions of value and meaning and relations between Muslims and others can be seen in terms of human interaction without blame always falling on Islam as such

Führding,2017-07-03 Since the downfall of the phenomenology of religion as the leading paradigm in the study of religion in the 1960s theoretical and methodological discussions surrounding the nature and identity of the study of religion as an academic discipline have proliferated The essays included in this volume approach these debates from a variety of angles Based on a series of talks held at the University of Hannover over the last few years the essays are intended to be understood as diagnostic works in progress and thus as working papers all of which strive to point out important problems and perspectives in the field of theories and methodology and to draw attention to the future of the discipline Using developments in Hanover as a launch pad the volume forms the basis for further insights into the direction of the study of religion as a discipline at large **Methodological Issues in Religious Studies** Wilfred Cantwell Smith,1975 **The Cumulative**
