Future of Ethics Willis Jenkins, 2013-10-28 The Future of Ethics interprets the big questions of sustainability and social justice through the practical problems arising from humanity's increasing power over basic systems of life. What does climate change mean for our obligations to future generations? How can the sciences work with pluralist cultures in ways that will help societies learn from ecological change? Traditional religious ethics examines texts and traditions and highlights principles and virtuous behaviors that can apply to particular issues. Willis Jenkins develops lines of practical inquiry through prophetic pragmatism, an approach to ethics that begins with concrete problems and adapts to changing circumstances. This brand of pragmatism takes its cues from liberationist theology with its emphasis on how individuals and communities actually cope with overwhelming problems. Can religious communities make a difference when dealing with these issues? By integrating environmental sciences and theological ethics into problem-based engagements with philosophy, economics, and other disciplines, Jenkins illustrates the wide understanding and moral creativity needed to live well in the new conditions of human power. He shows the significance of religious thought to the development of interdisciplinary responses to sustainability issues and how this calls for a new style of religious ethics. **A Thinking Person's Guide to Our Times**

H.R.H. Prince Ghazi Bin Muhammad, 2020 The present book aims to take on this challenge by looking at the major problems from these various aspects as just mentioned. Obviously, one short book can hardly address all these problems and suggest solutions without certain simplifications and potentially controversial assertions. Nevertheless, it can hope to present a systematic analysis and suggested prognosis based on a coherent philosophy. As indicated above, nothing is more needed in our times and second to spiritual weakening, the greatest problem of all facing the Islamic World and indeed the whole world is lack of understanding of the true natures and essences of things. This book examines our times from an Islamic philosophical worldview, looking at the problems facing the Islamic World in the near past, present, and future respectively in three mutually complementary parts. At the end of each part, it suggests holistic and easily applied remedies to the problems it examines. In other words, and for those who enjoy sonorous German and Greek philosophical terms, it examines the *Zeitgeist* from the *Weltanschauung* of Islam and suggests panaceas. Prince Ghazi bin Muhammad has written a number of books and guides for thinking people, and this small but potent work before you sums up many of his most keen and cogent insights and conclusions. For that reason, this may be his most impactful and motivational work to date. *The World's Religions* William A. Young, 1995 This text enables introductory level readers to gain an understanding of the world's religions by discussing their history, stances on contemporary issues, and how they compare and contrast to each other. *Ninian Smart on World Religions: Traditions and the challenges of modernity. I. Individual traditions. Buddhism. 'Mysticism and scripture in Theravāda Buddhism'* Ninian Smart, 2009 Ninian Smart came to public prominence as the founding Professor of the first British university Department of Religious Studies in the late 1960s. His pioneering views on education in religion proved hugely influential at all levels, from primary schools to academic teaching and research. An unending string of publications

many of them accessible to the general public sustained a reputation that became worldwide Here for the first time a selection of Ninian Smart's wide ranging writings is organised systematically under a set of categories which both comprehend and also illuminate his varied output over a career spanning half a century The editor John Shepherd was Principal Lecturer in Religion and Philosophy at the University of Cumbria He first met Smart as a postgraduate student and recently helped establish the Ninian Smart Archive at the University of Lancaster

An Essay in the Logic of World-views Lauri Snellman, 2025-12-03 This book develops a logic of world views belief systems that shape how we know interpret and act in the world It explores how these frameworks function as sign systems models of reality and normative guides for thought and behavior This book starts with epistemological issues like the faith reason debates relativism and the Gettier problem It shows how they reflect deeper questions about the role of belief systems in knowledge This book then offers a conceptual structure of semiotics practices of seeking and finding frameworks and pragmatic circles of inquiry for understanding how world views operate through trust vision faithfulness and assent It argues that world views are not just abstract theories but lived frameworks guiding practices and shaping responses to reality It proposes ways to compare and assess incommensurable world views through dialogue Bridging philosophical logic semiotics epistemology and the philosophy of religion this book provides a new foundation for understanding belief systems and tools for world view studies
