The SAGE Handbook of Globalization Manfred Steger, Paul Battersby, Joseph Siracusa, 2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities In the Australian context the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change Through the Global Studies Consortium GSC this new discipline is forming around an impressive body of international scholars who define their expertise in global terms The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale Mark Juergensmeyer and Helmut Anheier's forthcoming *Encyclopaedia of Global Studies* with SAGE is evidence of this growing international collaboration while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally Given these developments the time is right for a book series that draws together diverse scholarship in global studies This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology anthropology history media and cultural studies economics and governance environmental sustainability international law and criminal justice Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core global concerns of narrative praxis space and place This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century Global Governance Lisa L. Martin, 2008 The process of globalization while not entirely new has created new challenges for policymakers attempting to reap its benefits and manage its effects This volume brings together work on global governance that examines these challenges and looks at the patterns of governance that emerge **GLOBAL ENVIRONMENTAL CHANGE AND INTERNATIONAL GOVERNANCE**, 1996

International Governance Oran R. Young, 1994 How can the global environment be safeguarded in the absence of a world government In the vanguard of efforts to address this critical question Oran R Young draws on environmental issues to explore the nature of international governance Young's analysis invokes the distinction between governance a social function involving the management of interdependent individuals or groups and government a set of formal organizations that makes and enforces rules **Global Governance and the Role of Non-state Actors** Gunnar Folke Schuppert, 2006 This book represents a conference organized by the Social Science Research Centre Berlin WZB the Alfred Herrhausen Society The International Forum of the Deutsche Bank and the Centre for the Analysis of Risk and Regulation CARR at the London School

of Economics and Political Science LSE in November 2004 in London Changes in statehood are one of the main indicators of a shift in the focus of governance onto the global level This is manifested most clearly in the emergence and growing importance of actors that are no longer tied to national or state contexts in the traditional way as with national parliaments government ministries or administrative bodies The age of global governance is an age of international actors such as the WTO and of non state actors such as non governmental organizations NGOs and transnational corporations TNCs The aim of the conference was to take a closer look at these non state actors the scope of their activities the way they operate and the extent to which they are perhaps more appropriately classified as governance actors given their function as regulators and standard setters tasks more traditionally associated with the state **Toward Genuine Global Governance** Errol E.

Harris,James A. Yunker,1999-06-30 Nine well known authors associated with the world federalist movement critique the 1995 Report of the Commission on Global Governance entitled Our Global Neighborhood Although the contributors manifest a variety of viewpoints styles and approaches they are unanimous in condemning the Report as insufficiently imaginative and visionary Despite repeated calls in the Commission Report for a radically new way of thinking the substance of the Report mindlessly rubber stamps the legitimacy of the sovereign nation state system of today by means of summarily and peremptorily dismissing even the possibility of a supernational government qualitatively beyond the United Nations According to the contributors the concept of genuine world government is sufficiently advanced and the circumstances of the present day are conducive so that this concept is deserving of the most careful and serious attention by the general public and the political leadership Despite their unconventional conclusions these essays are lucid judicious and commanding
