Thinking About Political Psychology Cambridge Studies In Public Opinion And Political Psychology:

Thinking about Political Psychology James H. Kuklinski, 2002-03-04 In this 2002 volume political psychologists take a hard look at political psychology They pose and then address the kinds of tough questions that those outside the field would be inclined to ask and those inside should be able to answer satisfactorily Not everyone will agree with the answers the authors provide and in some cases the best an author can do is offer well grounded speculations Nonetheless the chapters raise questions that will lead to an improved political psychology and will generate further discussion and research in the field The individual chapters are organised around four themes Part I tries to define political psychology and provides an overview of the field Part II raises questions about theory and empirical methods in political psychology Part III contains arguments ranging from the position that the field is too heavily psychological to the view that it is not psychological enough Part IV considers how political psychologists might best connect individual level mental processes to aggregate outcomes

Unspoken Politics Efrén O. Pérez, 2016-02-24 This book explains why people acquire implicit attitudes how they affect political thinking and where in the mass public they have their strongest and weakest influences A theoretically ambitious book Unspoken Politics establishes that implicit attitudes exist outside the tightly controlled confines of the laboratory showing that they emerge in a public opinion survey setting which underlines their real world impact It also lays bare in painstaking detail the mechanics of a leading measure of implicit attitudes the implicit association test IAT Accordingly it outlines the strengths and limitations of this measure while providing an illustration of how to develop an IAT for one's own purposes By explaining how to analyze and interpret the data produced by the IAT this book leads to a better understanding of people's unspoken cognitions and the impacts these have on the politics that individuals openly profess **IBSS:**

Rationalizing Voter Milton Lodge, Charles S. Taber, 2013-04-22 Political behavior is the result of innumerable unnoticed forces and conscious deliberation is often a rationalization of automatically triggered feelings and thoughts Citizens are very sensitive to environmental contextual factors such as the title President preceding Obama in a newspaper headline upbeat music or patriotic symbols accompanying a campaign ad or question wording and order in a survey all of which have their greatest influence when citizens are unaware This book develops and tests a dual process theory of political beliefs attitudes and behavior claiming that all thinking feeling reasoning and doing have an automatic component as well as a conscious deliberative component The authors are especially interested in the impact of automatic feelings on political judgments and evaluations This research is based on laboratory experiments which allow the testing of five basic hypotheses hot cognition automaticity affect transfer affect contagion and motivated reasoning *Citizens and Politics* James H. Kuklinski, 2001-06-11

that many political actors reject the voice of the people as uninformed and nebulous relying instead on interest groups and the media for representations of public opinion Her important and original book forces us to rethink our assumptions about the meaning and place of public opinion in the realm of contemporary democratic politics *The Cambridge Handbook of Political Psychology* Danny Osborne,Chris G.
