Thinking Chinese Translation Pellatt Valerie:

Thinking Chinese Translation Valerie Pellatt, Eric T. Liu, 2010-06-10 Thinking Chinese Translation is a practical and comprehensive course for advanced undergraduates and postgraduate students of Chinese. Thinking Chinese Translation explores the ways in which memory, general knowledge and creativity summed up as schema contribute to the linguistic ability necessary to create a good translation. The course develops the reader's ability to think deeply about the texts and to produce natural and accurate translations from Chinese into English. A wealth of relevant illustrative material is presented taking the reader through a number of different genres and text types of increasing complexity including technical, scientific and legal texts, journalistic and informative texts, literary and dramatic texts. Each chapter provides a discussion of the issues of a particular text type based on up to date scholarship followed by practical translation exercises. The chapters can be read independently as research material or in combination with the exercises. The issues discussed range from the fine detail of the text such as punctuation to the broader context of editing, packaging and publishing translations. Major aspects of teaching and learning translation such as collaboration are also covered. Thinking Chinese Translation is essential reading for advanced undergraduate and postgraduate students of Chinese and translation studies. The book will also appeal to a wide range of language students and tutors through the general discussion of the principles and purpose of translation. *The Routledge Handbook of Chinese Translation* Chris Shei, Zhao-Ming Gao, 2017-10-16 The Routledge Handbook of Chinese Translation presents expert and new research in analysing and solving translation problems centred on the Chinese language in translation. In doing so it undertakes to synthesise existing knowledge in Chinese translation, develops new frameworks for analysing Chinese translation problems and explains translation theory appropriate to the Chinese context. Twentieth-Century Chinese Translation Theory Leo Tak-hung Chan, 2004-05-28 Past attempts at writing a history of Chinese translation theory have been bedeviled by a chronological approach which often forces the writer to provide no more than a list of important theories and theorists over the centuries Or they have stretched out to almost every aspect related to translation in China so that the historical political backdrop that had an influence on translation theorizing turns out to be more important than the theories themselves In the present book the author hopes to devote exclusive attention to the ideas themselves The approach adopted centers around eight key issues that engaged the attention of theorists through the course of the twentieth century in the hope that a historical account will be presented that is not time bound On the basis of 38 articles translated into English by teachers and scholars of translation the author has written four essays discussing the Chinese characteristics of this body of theory Separately they focus on the impressionistic the modern the postcolonial and the poststructuralist approaches deployed by leading Chinese theorists from 1901 to 1998 It is hoped that publication of this book will make possible cross cultural dialogue with translation academics in the West although the general reader will find much firsthand information on Chinese thinking about translation
