Walvoord, Virginia Johnson Anderson, 2011-01-13 The second edition of Effective Grading the book that has become a classic in the field provides a proven hands on guide for evaluating student work and offers an in depth examination of the link between teaching and grading Authors Barbara E Walvoord and Virginia Johnson Anderson explain that grades are not isolated artifacts but part of a process that when integrated with course objectives provides rich information about student learning as well as being a tool for learning itself The authors show how the grading process can be used for broader assessment objectives such as curriculum and institutional assessment This thoroughly revised and updated edition includes a wealth of new material including Expanded integration of the use of technology and online teaching A sample syllabus with goals outcomes and criteria for student work New developments in assessment for grant funded projects Additional information on grading group work portfolios and service learning experiences New strategies for aligning tests and assignments with learning goals Current thought on assessment in departments and general education using classroom work

for program assessments and using assessment data systematically to close the loop Material on using the best of classroom assessment to foster institutional assessment New case examples from colleges and universities including community colleges When the first edition of Effective Grading came out it quickly became the go to book on evaluating student learning This second edition especially with its extension into evaluating the learning goals of departments and general education programs will make it even more valuable for everyone working to improve teaching and learning in higher education L Dee Fink author Creating Significant Learning Experiences Informed by encounters with hundreds of faculty in their workshops these two accomplished teachers assessors and faculty developers have created another essential text Current faculty as well as graduate students who aspire to teach in college will carry this edition in a briefcase for quick reference to scores of examples of classroom teaching and assessment techniques and ways to use students classroom work in demonstrating departmental and institutional effectiveness Trudy W Banta author Designing Effective Assessment Through the Eyes of a Child Donna E. Norton, Sandra E. Norton, 2007 CD ROM contains a database of children s literature George A. Kubler and the Shape of Art History Thomas F. Reese, 2023-04-04 An illuminating intellectual biography of a pioneering and singular figure in American art history Art historian George A Kubler 1912 1996 was a foundational scholar of ancient American art and archaeology as well as Spanish and Portuguese architecture During over five decades at Yale University he published seventeen books that included innovative monographs major works of synthesis and an influential theoretical treatise In this biography Thomas F Reese analyzes the early formation broad career and writings of Kubler casting nuanced light on the origins and development of his thinking Notable in Reese s discussion and contextualization of Kubler s writings is a revealing history and analysis of his Shape of Time a book so influential to students scholars artists and curious readers in multiple disciplines that it has been continuously in print since 1962 Reese reveals how pivotal its ideas were in Kubler s own thinking rather than focusing on problems of form as an ordering principle he increasingly came to sequence works by how they communicate meaning The author demonstrates how Kubler who professed to have little interest in theory devoted himself to the craft of art history discovering and charting the rules that guided the propagation of structure and significance through time **The Micro-historian's Guide to Research, Evidence, & Conclusions** Reginald W. Bacon, 2019-09-18 The Micro Historian s Guide to Research Evidence Conclusions imparts useful guidance to motivated historians genealogists special interest researchers and local history enthusiasts As long buried sources become available via the internet more regular folks without a Ph D in history are joining the fun of information gathering and shining new light on under explored history yet often with no foundation of method The author answers the call with this volume paying forward the guidance received from long ago mentors as well as from present day historians and archivists Topics include research planning execution evaluation of evidence formulation of conclusions and the crafting of a summary narrative Each topic is enriched by practical examples from the author s experience The aim is to help the new practitioner build a foundation of research

skills that leads to evidence based conclusions The author s perspective of experience as a disciplined researcher but also with roots as a no nonsense old school newspaper reporter occasionally prompts a mild tease of the buttoned down genealogy proof standard or conversely a deflating poke at flabby interpretation and moribund academic writing wherever it may fester The Micro Historian s Guide to Research Evidence Conclusions draws theory from dozens of history genealogy historiography and research giants through the ages The book also pays tribute to that long ago cigar chomping newspaper editor who admonished a young reporter Yer mother sez she loves ya You still gotta check it out *Art History, Narratology, and Twentieth-Century Chinese Art* Lian Duan,2023-07-28 This study constructs a framework of narratology for art history and rewrites the development of twentieth century Chinese art from a narratological perspective Theoretically and methodologically oriented this is a self reflective meta art history studying the art historical narratives while narrating the story of modern and contemporary Chinese art Thus this book explores the three layers of narrative within the narratological framework the first hand fabula the secondary narration and the tertiary narrativization With this tertiary narrativization the reader author presents three types of narrative the grand narrative of the central thesis of this book the middle range narrative of the chapter theses and case analyses supporting these theses The focus of this tertiary narrativization is the interaction between Western influence on Chinese art and the Chinese response to this influence The central thesis is that this interaction conditioned and shaped the development of Chinese art at every historical turning point in the twentieth century The book will be of interest to scholars working in art history critical theory Chinese studies and cultural studies

Sketching as Design Thinking Alma R. Hoffmann,2019-12-06 This book argues for the importance of sketching as a mode of thinking and the relevance of sketching in the design process design education and design practice Through a wide range of analysis and discussion the book looks at the history of sketching as a resource throughout the design process and asks questions such as where does sketching come from When did sketching become something different to drawing and how did that happen What does sketching look like in the present day Alongside an in depth case study of students teachers and practitioners this book includes a fascinating range of interviews with designers from a wide variety of backgrounds including fashion user experience and architecture *Sketching as Design Thinking* explains how drawing and sketching remain a prominent aspect in our learning and creative process and provides a rich resource for students of visual art and design *Organizing the Curriculum* ,2019-02-11 Contemporary American youth live in a culture that ignores or denigrates labor unions Mainstream media cover labor issues only sparingly and unions no longer play much of a role in popular culture texts films or images In our schools labor has been limited to a footnote in textbooks instead of being treated seriously as the most effective force for championing the rights of working people the vast majority of the citizenry Teachers have been convinced that to bring up class or to teach about the labor movement may be construed as taking sides while the all pervasive presence of corporate America in our schools is rarely questioned So for all the talk of schools preparing young

people for the work world we are failing to teach them even the basics of how that world is structured or how they can be empowered through collective action Organizing the Curriculum Perspectives on Teaching the US Labor Movement is the first book length treatment of this blind spot in contemporary curriculum and pedagogy Contributors to this collection unionists activists teachers teacher educators and academics interrogate the ways in which knowledge is constructed in school discourses conceptualize pedagogical strategies and curricula that open discussions around class analysis and political economy via studies of the labor movement and put forward an activist vision of education that truly engages young people beyond the classroom walls *The Bookseller*, 1858 Official organ of the book trade of the United Kingdom The Oxford Handbook of Qualitative Research Patricia Leavy, 2020-09-07 The Oxford Handbook of Qualitative Research Second Edition presents a comprehensive interdisciplinary overview of the field of qualitative research Divided into eight parts the forty chapters address key topics in the field such as approaches to qualitative research philosophical perspectives narrative inquiry field research and interview methods text arts based and internet methods analysis and interpretation of findings and representation and evaluation The handbook is intended for students of all levels faculty and researchers across the disciplines and the contributors represent some of the most influential and innovative researchers as well as emerging scholars This handbook provides a broad introduction to the field of qualitative research to those with little to no background in the subject while providing substantive contributions to the field that will be of interest to even the most experienced researchers It serves as a user friendly teaching tool suitable for a range of undergraduate or graduate courses as well as individuals working on their thesis or other research projects With a focus on methodological instruction the incorporation of real world examples and practical applications and ample coverage of writing and representation this volume offers everything readers need to undertake their own qualitative studies Teaching History for the Common Good Keith C. Barton, Linda S. Levstik, 2004-07-13 In Teaching History for the Common Good Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation s children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes

and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose *Teaching History for the Common Good* is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject **The Publishers' Trade List Annual** ,1979 History of Art Horst Woldemar Janson,Anthony F. Janson,2004 For forty years this widely acclaimed classic has remained unsurpassed as an introduction to art in the Western world boasting the matchless credibility of the Janson name This newest update features a more contemporary more colorful design and vast array of extraordinarily produced illustrations that have become the Janson hallmark A narrative voice makes this book a truly enjoyable read and carefully reviewed and revised updates to this edition offer the utmost clarity in contributions based on recent scholarship Extensive captions for the book s incredible art program offer profound insight through the eyes of twentieth century art historians speaking about specific pieces of art featured throughout Significantly changed in this edition is the chapter on The Late Renaissance in which Janson offers a new perspective on the subject tracing in detail the religious art tied to the Catholic Reform movement whose early history is little known to many readers of art history Janson has also rearranged early Renaissance art according to genres instead of time sequence and he has followed the reinterpretation of Etruscan art begun in recent years by German and English art historians With a truly

humanist approach this book gives written and visual meaning to the captivating story of what artists have tried to express and why for more than 30 000 years **The Mind at Hand** Michael J. Strauss,2013-01-01 The Mind at Hand explores how artists scientists writers and others students and professionals alike see their world record it revise it and come to know it It is about the rough drawn sketch diagram chart or other graphic representation and the focus these provide for creative work that follows from them Such work could involve solving a problem composing a musical score proposing a hypothesis creating a painting and many other imaginative and inventive tasks The book is for for visual learners of all kinds for scientists as well as artists and for anyone who keeps a journal notebook or lab book in order to think and create visually It is also a book for teachers and educational administrators interested in learning about new active learning strategies involving drawing and possible outcomes of these in classrooms The formulas and symbols of chemistry the diagrams and features of the landscape in geology and the organisms and structures in biology are all represented as images on pages or screens Students create them when studying problem solving and learning Once in front of their eyes they can be reconsidered revised and reconstructed into new images for further consideration and revision It is how artists often create a painting or a sculpture and how scientists come up with new hypotheses This is how learning occurs not only across disciplines but in all kinds of creative endeavors through a continuing process of creation revision and re creation It is drawing to learn
