Third World Environmentalism Case Studies From The Global South:

Third World Environmentalism N. Patrick Peritore, 1999 An impressive tour de force in its analytical and theoretical foci It speaks with unique insight to the future of our world forging a powerful link between ideology politics and the environment Daniel G Zirker University of Idaho Enriches our understanding of global environmental beliefs and their place among the world's political elite Among the most theoretically based discussions of environmentalism founded on real data to date Steven R Brechin University of Michigan Focusing on seven developing countries India Korea Brazil Mexico Puerto Rico Romania and Iran where such data are rare Patrick Peritore presents a detailed look at the environmental attitudes and policies of leaders in government business and environmental groups The position that emerges one considerably more optimistic than ever previously presented rests outside old political poles of left and right thinking Leaders in all three sectors studied hold the balance of power between the more utopian Greens and the economically inclined promoters of sustainable development The author maintains that Third World decision makers hold international postmodern attitudes toward the environment that correspond closely to Western thought They seek consensus and scientific information as the basis for making decisions and are risk averse and highly concerned about the environment In addition he says their awareness of these issues is far in advance of their own public political parties and mass media The author creates a model of a new international environmental politics that flies in the face of much conventional wisdom and will be of keen interest to a range of scholars and policy makers N Patrick Peritore professor of political science at the University of Missouri Columbia is the author of *Socialism Communism and Liberation Theology in Brazil* An Opinion Survey Using Q Methodology and coeditor of *Biotechnology in Latin America Politics Impacts and Risks*

Security, the Environment and Emancipation Matt McDonald, 2011-08-24 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it

aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Historical Dictionary of Environmentalism

Peter Dauvergne, 2016-09-09 To capture the diversity within environmentalism this dictionary takes a global tack with a focus on ideas events institutions initiatives and green movements since the 1960s It strives to avoid a common error in many histories of environmentalism to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa Asia South and Central America and the Polar Regions It aims as well for a more comprehensive analysis than most histories of the modern environmental movement understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations but also from corporate governmental and intergovernmental organizations and initiatives This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources from corporate boardrooms to bureaucratic policies to international negotiations to activists Thus environmentalists are not only indigenous people blocking a logging road Greenpeace activists protesting a seal hunt or green candidates contesting an election an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies within the World Bank to assess the environmental impacts of loans within Wal Mart to green its purchasing practices or within intergovernmental forums to negotiate international environmental agreements This second edition of Historical Dictionary of Environmentalism contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important events issues organizations ideas and people shaping the direction of environmentalism worldwide This book is an excellent access point for students researchers and anyone wanting to know more about environmentalism

Comparative Environmental Politics Paul F. Steinberg, Stacy D. VanDeveer, 2012 Combining the theoretical tools of comparative politics with the

substantive concerns of environmental policy experts explore responses to environmental problems across nations and political systems *The A to Z of Environmentalism* Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries *Environment and Citizenship* Benito Cao, 2015-03-05 The increasing awareness of the human impact on the environment is having a profound effect on the concept and content of citizenship one of the fundamental institutions that structures human relations In what is the first introduction of its kind this book provides an accessible stimulating and multidimensional overview of the many ways in which concern for the environment driven primarily by the preoccupation with sustainability is reshaping our understanding of citizenship Environment and Citizenship is structured into three parts Part I introduces the reader to the concept and theories of citizenship and explores the impact that environmental concerns is having on contemporary formulations of citizenship both traditional e g national liberal and republican and emerging e g cosmopolitan ecological and ecofeminist Part II explores the practical manifestations of environmental citizenship with each chapter focusing on a particular actor citizens governments and corporations These chapters include references to examples and case studies from a wide range of countries broadly categorized as belonging to the Global North and the Global South Part III explores the making of green citizens and outlines the dominant articulations of environmental citizenship that emerge from formal education news media and popular culture The book concludes with a general reflection on the present and future of environmental citizenship The book contains a variety of illustrations boxed case studies links to online resources and suggestions for further reading This original and engaging text is essential reading for students and scholars of environmental politics sustainability studies and development studies as well as for environmental activists policy practitioners and environmental educators More broadly this book will appeal to anyone interested in and concerned with issues of sustainability social justice and citizenship in the twenty first century **Ideology, Social Theory, and the Environment** William D. Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we

will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity

Environmentalism in the Muslim World Richard C. Foltz, 2005 This is the first book to provide an overview of how Muslim activists are responding on the ground to the global environmental crisis The detrimental effects of environmental degradation are felt most severely by the world's poor a disproportionate number of whom are Muslims Unfortunately governments of Muslim societies have been slow to respond to environmental problems while opposition movements as well have mostly chosen to focus on other issues Nevertheless environmental awareness and activism are growing throughout the Muslim world This book offers chapters by leading Muslim environmentalists which survey environmental initiatives in Egypt Turkey Iran Pakistan Nigeria and Malaysia Issues are detailed pointing out both successes and failures and describing the unique challenges facing the world's very diverse Muslim societies in striving to balance development and social justice with preserving the integrity of the earth's life support systems International Institutions in the New Global Economy Lisa L.

Martin, 2005 Selections of articles from various sources **International Environmental Cooperation** Paul G. Harris, 2002 Annotation As the twenty first century commences the countries of Pacific Asia are grappling with the impact of regional development industry and growth on their increasingly acute environmental problems *International Environmental Cooperation Politics and Diplomacy in Pacific Asia* brings together innovative and insightful studies of international environmental politics in this increasingly critical part of the world The first section of the book examines many of the issues and actors impacting international environmental cooperation highlighting important themes such as cooperation between developed and developing countries international justice and regional environmental security This section also illustrates key features of specific multilateral environmental agreements and the competing interests of important national bodies international organizations multinational corporations and nongovernmental entities The second section focuses on environmental diplomacy and regime building in Pacific Asia examining issues such as acid rain nuclear waste deforestation and conflict over regional seas Contributors from Asia Europe and North America bring an international perspective to

questions of environmental cooperation International Environmental Cooperation provides policymakers citizens scholars and students with essential information for understanding and addressing some of the world s most significant environmental problems

Environmental Law for Sustainability Benjamin J Richardson,2006-03 This book presents critical new scholarship on the state of law for sustainable development from an international and comparative perspective **ICSSR**

Journal of Abstracts and Reviews Indian Council of Social Science Research,2000 *Environmental Politics and Policy*

Brent Steel,Richard L. Clinton,Nicholas P. Lovrich,2003 This exciting new text for the Environmental Politics and or Policy course s does not just look at this subject from a U S perspective but an international one expanding upon and reflecting the globalization of this important area of study Using the comparative approach students will learn about environmental issues but not without a larger context Included in the comparative examination are post industrial countries developing countries post Communist countries and of course the U S In addition chapters on science what science is and how it fits into the political context international law and emerging issues such as women and the environment make this a strong and exciting text **The Journal of Developing Areas** ,1998 *Of Wolves and Worldviews* Kimberly Lynn Byrd,2004 **The New**

Regionalism in Africa J. Andrew Grant,Fredrik Söderbaum,2003 This edited volume transcends conventional state centric and formalistic notions of regionalism and theorizes conceptualizes and analyzes the complexities and contradictions of regionalization processes in contemporary Africa The collection not only unpacks and theorizes the African state society complex with regard to new regionalism but also explicitly integrates the often neglected discourse of human security and human development In so doing the book moves the discussion of new regionalism forward at the same time as it adds important insights to security and development It is organized into three parts Part I theorizes conceptualizes and analyzes the new regionalism in Africa from the point of view of the region e g West East Central and Southern Africa The national perspectives in Part II focus on the new regionalism in Africa from the point of view of particular countries or specific state society complexes such as Kenya the Democratic Republic of the Congo DRC the enclave of Cabinda Angola and Zambia Part III contains two concluding chapters that tie the main threads of the volume together theoretically and empirically and discuss the contribution of the analytical framework the new regionalism approach NRA to the larger study of regionalism

Citizenship, Sustainability and Environmental Research John Barry,John L. R. Proops,2000 In the study the authors use Q methodology a qualitative methodology for the systematic study of subjectivity and shared discourses and at the same time they evaluate its usefulness for social scientific environmental research **MicroFranchising** Jason S.

Fairbourne,Stephen Wallace Gibson,W. Gibb Dyer,2007 MicroFranchising brings together the ideas of researchers and social entrepreneurs at the heart of a movement to turn microfranchising into a mechanism for sustainable poverty reduction on a scale to match microfinance **Islam and Ecology** Richard C. Foltz,Frederick Mathewson Denny,Azizan Haji
