Thought In A Hostile World The Evolution Of Human Cognition:

Thought in a Hostile World Kim Sterelny, 2003-09-12 WINNER OF THE 2004 LAKATOS AWARD Thought in a Hostile World is an exploration of the evolution of cognition especially human cognition by one of today's foremost philosophers of biology and of mind Features an exploration of the evolution of human cognition Written by one of today's foremost philosophers of mind and language Presents a set of analytic tools for thinking about cognition and its evolution Offers a critique of nativist modular versions of evolutionary psychology rejecting the example of language as a model for thinking about human cognitive capacities Applies to the areas of cognitive science philosophy of mind and evolutionary psychology

A Natural History of Human Thinking Michael Tomasello, 2018-10-01 A Wall Street Journal Favorite Read of the Year A Guardian Top Science Book of the Year Tool making or culture language or religious belief ever since Darwin thinkers have struggled to identify what fundamentally differentiates human beings from other animals In this much anticipated book Michael Tomasello weaves his twenty years of comparative studies of humans and great apes into a compelling argument that cooperative social interaction is the key to our cognitive uniqueness Once our ancestors learned to put their heads together with others to pursue shared goals humankind was on an evolutionary path all its own Michael Tomasello is one of the few psychologists to have conducted intensive research on both human children and chimpanzees and A Natural History of Human Thinking reflects not only the insights enabled by such cross species comparisons but also the wisdom of a researcher who appreciates the need for asking questions whose answers generate biological insight His book helps us to understand the differences as well as the similarities between human brains and other brains David P Barash Wall Street Journal

The Rediscovery of Common Sense Philosophy S. Boulter, 2007-06-27 This book is a defence of the philosophy of common sense in the spirit of Thomas Reid and G E Moore drawing on the work of Aristotle evolutionary biology and psychology and historical studies on the origins of early modern philosophy It defines and explores common sense beliefs and defends them from challenges from prominent philosophers

Evolutionary Theory: Fringe or Central to Psychological Science Danielle Sulikowski, 2016-08-08 The computational theory of mind which views the brain as an information processor that operates on cognitive representations is central to modern cognitive psychology and is the dominant perspective from which brain function is conceptualized and studied Evolutionary Psychology EP is the application of evolutionary theory to understanding human behaviour and cognition Unlike other core Psychology topic areas such as Personality Learning or Developmental Psychology however EP is not defined by the subset of psychological phenomena it seeks to describe and understand It is instead defined by a specific meta theoretical perspective from which it seeks to potentially explain all psychological phenomena The central question posed by this volume is whether this overarching nature provides an opportunity for evolutionary approaches to offer an alternative meta theoretical perspective to the information processing representational view of brain function and behavior

The Routledge Handbook of Mindshaping

Tadeusz Wiesław Zawidzki, Rémi Tison, 2025-05-29 Of all species human beings are uniquely capable of coordinating on long term large scale cooperative projects with unfamiliar and genetically unrelated others According to the mindshaping hypothesis this relies on mechanisms and practices like imitation pedagogy normative cognition and narrative self constitution which shape us into expert coordinators without requiring time consuming and epistemically fraught attempts to read each other's minds Mindshaping has been applied to many areas of inquiry including game theory shared agency communication the ontogeny of human cognition the dissemination of scientific knowledge in popular media mental illness and the influence of social media technologies The Routledge Handbook of Mindshaping is the first volume of its kind Comprising 37 chapters by an international team of leading scholars this Handbook is organised into seven sections Mindshaping and coordination Mindshaping and cognitive psychology Mindshaping and normativity Mindshaping and epistemology Social and political dimensions of mindshaping Nonhuman mindshaping Mindshaping applied Within these sections key topics are addressed including game theory social signalling and shared agency folk psychology the emotions language acquisition and memory stereotyping and consciousness raising moral agency self knowledge rationality epistemic norms primate sociality human elephant relations artificial intelligence mental illness and neurodiversity aesthetic expression and politics An outstanding survey of a vibrant and emerging field The Routledge Handbook of Mindshaping will be of great interest to those studying and researching philosophy of psychology philosophy of cognitive science philosophy of mind and applied epistemology It will also be of interest to those in related disciplines such as cognitive psychology sociology and anthropology

The Oxford Handbook of Law and Humanities Simon Stern, Maksymilian Del Mar, Bernadette Meyler, 2020 How might law matter to the humanities How might the humanities matter to law In its approach to both of these questions The Oxford Handbook of Law and Humanities shows how rich a resource the law is for humanistic study as well as how and why the humanities are vital for understanding law Tackling questions of method key themes and concepts and a variety of genres and areas of the law this collection of essays by leading scholars from a variety of disciplines illuminates new questions and articulates an exciting new agenda for scholarship in law and humanities

[The Material Image](#) Donald H. Wacome, 2020-09-29 In The Material Image Donald H Wacome sets out to reconcile the Christian faith and contemporary science by embracing rather than evading its naturalistic implications The sciences are our best way to know ourselves and the world we inhabit Wacome argues but this does not make belief in miracles unreasonable The sciences reveal that we are fully material beings the product of unguided natural selection God created human persons for the vocation of sharing in the everlasting Triune life and work but this creation does not involve design The mind is the embodied socially situated brain There is no immaterial soul we are the material image of our transcendent Creator This materialist conception does not preclude the resurrection of the body The freedom that matters for the human creature is compatible with our being governed by the laws of nature Morality and religion are natural merely human legacies of our evolutionary history which

God employs in pursuit of fellowship with us Christians can faithfully and enthusiastically welcome the image of human beings given in contemporary science

The Philosophy of Metacognition Joëlle Proust, 2013-11-28 Does metacognition i.e. the capacity to form epistemic self evaluations about one's current cognitive performance derive from a mindreading capacity or does it rely at least in part on sui generis informational processes In *The Philosophy of Metacognition* Joëlle Proust provides a powerful defense of the second position Drawing on discussions of empirical evidence from comparative developmental and experimental psychology as well as from neuroscience and on conceptual analyses she purports to show that in contrast with analytic metacognition procedural metacognition does not need to involve metarepresentations Procedural metacognition seems to be available to some non humans some primates and rodents Proust further claims that metacognition is essentially related to mental agency i.e. cognitive control and monitoring Self probing is equivalent to a self addressed question about the feasibility of a mental action Am I able to remember this word Post evaluating is a way of asking oneself whether a given mental action has been successfully completed Is this word the one I was looking for Neither question need be articulated conceptually for a feeling of knowing or of being right to be generated or to drive epistemic control Various issues raised by the contrast of a procedural experience based metacognition with an analytic concept based metacognition are explored such as whether each is expressed in a different representational format their sensitivity to different epistemic norms and the existence of a variety of types of epistemic acceptance

Classification in the Wild Konstantinos V. Katsikopoulos, Ozgur Simsek, Marcus Buckmann, Gerd Gigerenzer, 2021-02-02 Rules for building formal models that use fast and frugal heuristics extending the psychological study of classification to the real world of uncertainty This book focuses on classification allocating objects into categories in the wild in real world situations and far from the certainty of the lab In the wild unlike in typical psychological experiments the future is not knowable and uncertainty cannot be meaningfully reduced to probability Connecting the science of heuristics with machine learning the book shows how to create formal models using classification rules that are simple fast and transparent and that can be as accurate as mathematically sophisticated algorithms developed for machine learning

Seeing the Future Kourken Michaelian, Stanley B. Klein, Karl K. Szpunar, 2016 Episodic memory is a major area of research in psychology Initially viewed as a distinct store of information derived from experienced episodes episodic memory is understood today as a form of mental time travel into the personal past Recent research has revealed striking similarities between episodic memory past oriented mental time travel and future oriented mental time travel FMTT *Seeing the Future Theoretical Perspectives on Future Oriented Mental Time Travel* brings together leading contributors in both empirical and theoretical disciplines to present the first interdisciplinary look at the human ability to imagine future scenarios Chapters focus on the challenging conceptual and theoretical questions raised by FMTT covering themes such as varieties of future oriented cognition relationships between FMTT and episodic memory subjective temporality in FMTT the self in FMTT and functional evolutionary and comparative

developmental and clinical perspectives on FMTT With its focus on the conceptual issues at the heart of fast developing research on FMTT this edited volume will serve graduate students to senior scholars working on or interested in FMTT and related areas as a synthesis of current theoretical thinking and a source of questions for future FMTT research **Film, Art, and the Third Culture** Murray Smith, 2017 Murray Smith presents an original approach to understanding film He brings the arts humanities and sciences together to illuminate artistic creation and aesthetic experience His third culture approach roots itself in an appreciation of scientific innovation and how this has shaped the moving media **The World at Our Fingertips** Frédérique de Vignemont de Vignemont, Andrea Serino, Hong Yu Wong, Alessandro Farnè, 2021-04-01 What difference is there between the visual experience of watching the moon in the sky and the visual experience of seeing a snake slither by your foot It is easy to believe our interpretation of the world is split into a binary mode between the bodily self and everything outside it There is however a buffer zone in the immediate surrounding of the body known as peripersonal space in which boundaries are blurred The notion of peripersonal space calls into question not only our entrenched theories of perception but also has major implications on the way we perceive personal and social awareness Research has yielded a vast array of exciting discoveries on peripersonal space across a variety of disciplines ethology social psychology anthropology neurology psychiatry and cognitive neuroscience *The World at Our Fingertips A Multidisciplinary Exploration of Peripersonal Space* brings these perspectives together for the first time as well as introducing a philosophical dialogue to the questions Edited by a team of leading psychologists and philosophers in the fields of peripersonal space and bodily awareness this comprehensive volume presents the reader with a fresh accessible dialogue between authorities from vastly different areas of thought *Information Technology and Military Power* Jon R. Lindsay, 2020-07-15 Militaries with state of the art information technology sometimes bog down in confusing conflicts To understand why it is important to understand the micro foundations of military power in the information age and this is exactly what Jon R Lindsay s *Information Technology and Military Power* gives us As Lindsay shows digital systems now mediate almost every effort to gather store display analyze and communicate information in military organizations He highlights how personnel now struggle with their own information systems as much as with the enemy Throughout this foray into networked technology in military operations we see how information practice the ways in which practitioners use technology in actual operations shapes the effectiveness of military performance The quality of information practice depends on the interaction between strategic problems and organizational solutions *Information Technology and Military Power* explores information practice through a series of detailed historical cases and ethnographic studies of military organizations at war Lindsay explains why the US military despite all its technological advantages has struggled for so long in unconventional conflicts against weaker adversaries This same perspective suggests that the US retains important advantages against advanced competitors like China that are less prepared to cope with the complexity of information systems in wartime Lindsay argues convincingly that a better

understanding of how personnel actually use technology can inform the design of command and control improve the net assessment of military power and promote reforms to improve military performance Warfighting problems and technical solutions keep on changing but information practice is always stuck in between Evolutionary Criminology Russil Durrant, Tony Ward, 2015-03-12 In our attempts to understand crime researchers typically focus on proximate factors such as the psychology of offenders their developmental history and the social structure in which they are embedded While these factors are important they don't tell the whole story Evolutionary Criminology Towards a Comprehensive Explanation of Crime explores how evolutionary biology adds to our understanding of why crime is committed by whom and our response to norm violations This understanding is important both for a better understanding of what precipitates crime and to guide approaches for effectively managing criminal behavior This book is divided into three parts Part I reviews evolutionary biology concepts important for understanding human behavior including crime Part II focuses on theoretical approaches to explaining crime including the evolution of cooperation and the evolutionary history and function of violent crime drug use property offending and white collar crime The developmental origins of criminal behavior are described to account for the increase in offending during adolescence and early adulthood as well as to explain why some offenders are more likely to desist than others Proximal causes of crime are examined as well as cultural and structural processes influencing crime Part III considers human motivation to punish norm violators and what this means for the development of a criminal justice system This section also considers how an evolutionary approach contributes to our understanding of crime prevention and reduction The section closes with an evolutionary approach to understanding offender rehabilitation and reintegration Reviews how evolutionary findings improve our understanding of crime and punishment Examines motivations to offend and to punish norm violators Articulates evolutionary explanations for adolescent crime increase Identifies how this knowledge can aid in crime prevention and reduction and in offender rehabilitation **Handbook of Research on Reading**

is visually stunning philosophically profound and a provocative extension of the story in Ridley Scott's Blade Runner. Containing specially commissioned chapters by a roster of international contributors this fascinating collection explores philosophical questions that abound in Blade Runner 2049 including: What distinguishes the authentically human person? How might natality condition one's experience of being in the world? How might shared memories feature in the constitution of personal identities? What happens when created beings transcend the limits intended in their design? What if anything is it like to be a hologram? Can artificial beings participate in genuinely romantic relationships? How might developing artificial economics impact our behaviour as prosumers? What are the implications of techno-human enhancement in an era of surveillance capitalism? Including a foreword by Denis Villeneuve, Blade Runner 2049: A Philosophical Exploration is essential reading for anyone interested in philosophy, film studies, philosophy of mind, psychology, gender studies and conceptual issues in cognitive science and artificial intelligence.

The Routledge Handbook of Philosophy of the Social Mind Julian Kiverstein, 2016-11-18. The idea that humans are by nature social and political animals can be traced back to Aristotle. More recently it has also generated great interest and controversy in related disciplines such as anthropology, biology, psychology, neuroscience and even economics. What is it about humans that enabled them to construct a social reality of unrivalled complexity? Is there something distinctive about the human mind that explains how social lives are organised around conventions, norms and institutions? The Routledge Handbook of Philosophy of the Social Mind is an outstanding reference source to the key topics and debates in this exciting subject and is the first collection of its kind. An international team of contributors present perspectives from diverse areas of research in philosophy drawing on comparative and developmental psychology, evolutionary anthropology, cognitive neuroscience and behavioural economics. The thirty-two original chapters are divided into five parts: The evolution of the social mind including the social intelligence hypothesis, co-evolution of culture and cognition, ethnic cognition and cooperation; Developmental and comparative perspectives including primate and infant understanding of mind, shared intentionality and moral cognition; Mechanisms of the moral mind including norm compliance, social emotion and implicit attitudes; Naturalistic approaches to shared and collective intentionality including joint action, team reasoning and group thinking; and social kinds. Social forms of selfhood and mindedness including moral identity, empathy and shared emotion, normativity and intentionality. Essential reading for students and researchers in philosophy of mind and psychology. The Routledge Handbook of Philosophy of the Social Mind is also suitable for those in related disciplines such as social psychology, cognitive neuroscience, economics and sociology.

Heroes and Philosophy David K. Johnson, 2009-07-23. The first unauthorized look at the philosophy behind Heroes, one of TV's most popular shows. When ordinary individuals from around the world inexplicably develop superhuman abilities, they question who they are, struggle to cope with new responsibilities and decide whether to use their new power for good or for evil. Every episode of Tim Kring's hit TV show Heroes is a philosophical quandary. Heroes and Philosophy is the first book to analyze how philosophy makes this

show so compelling It lets you examine questions crucial to our existence as thinking rational beings Is the Company evil or good Does Hiro really have a destiny Do we Is it okay to lie in order to hide your powers or save the world Heroes and Philosophy offers answers to these and other intriguing questions Brings the insight of history s philosophical heavyweights such as Plato and Nietzsche to Heroes characters and settings Adds a fun and fascinating dimension to your understanding of the show Expands your thinking about Heroes as the series expands from graphic and text novels to action figures and a video game Whether you re new to Heroes or have been a fan since day one this book will take your enjoyment of the show to the next level Handbook of Cognitive Archaeology Tracy B. Henley, Matt J. Rossano, Edward P. Kardas, 2019-07-24 The remains that archaeologists uncover reveal ancient minds at work as much as ancient hands and for decades many have sought a better way of understanding those minds This understanding is at the forefront of cognitive archaeology a discipline that believes that a greater application of psychological theory to archaeology will further our understanding of the evolution of the human mind Bringing together a diverse range of experts including archaeologists psychologists anthropologists biologists psychiatrists neuroscientists historians and philosophers in one comprehensive volume this accessible and illuminating book is an important resource for students and researchers exploring how the application of cognitive archaeology can significantly and meaningfully deepen their knowledge of early and ancient humans This seminal volume opens the field of cognitive archaeology to scholars across the behavioral sciences **Naturalized Epistemology and Philosophy of Science** Chienkuo Mi, Ruey-lin Chen, 2007 Much has happened in the field of contemporary epistemology since Quine s *Epistemology Naturalized* was published in 1969 Even before Ronald Giere published his article *Philosophy of Science Naturalized* naturalized philosophy of science had been influenced by the so called historical approach Kuhn Lakatos Feyerabend and Laudan all contributed importantly to this trend In this light it has emerged without a doubt that philosophy of science is closely related to epistemology This volume explores some of the relevant relations and will be of interest to epistemologist and philosophers of science
