Thoughts Papers On Mind Meaning And Modality Philosophical Papers:

Thoughts Stephen Yablo, 2008-11-27 *Thoughts* is a collection of twelve essays by Stephen Yablo which together constitute a modern day examination of Cartesian themes in the metaphysics of mind Yablo offers penetrating discussions of such topics as the relation between the mental and the physical mental causation the possibility of disembodied existence the relation between conceivability and possibility varieties of necessity and issues in the theory of content arising out of the foregoing The collection represents almost all of Yablo's work on these topics and features one previously unpublished piece

The Scope of Autonomy Katerina Deligiorgi, 2012-05-31 Katerina Deligiorgi offers a contemporary defence of autonomy that is Kantian in orientation but which engages closely with recent arguments about agency morality and practical reasoning Autonomy is a key concept in contemporary moral philosophy with deep roots in the history of the subject However there is still no agreed view about the correct way to formulate an account of autonomy that adequately captures both our capacity for self determination and our responsiveness to reasons The theory defended in *The Scope of Autonomy* is distinctive in two respects First whereas autonomy has primarily been understood in terms of our relation to ourselves Deligiorgi shows that it also centrally involves our relation to others Identifying the intersubjective dimension of autonomy is crucial for the defence of autonomy as a morality of freedom Second autonomy must be treated as a composite concept and hence not capturable in simple definitions such as acting on one's higher order desires or on principles one endorses One of the virtues of the composite picture is that it shows autonomy lying at the intersection of concerns with morality practical rationality and freedom Autonomy pertains to all these areas though it does not exactly coincide with any of them Proving this and so tracing the scope of autonomy is therefore essential Deligiorgi shows that autonomy is theoretically plausible psychologically realistic and morally attractive

Thinking of Necessity Jessica Leech, 2023 Jessica Leech sets out a Kant inspired theory of modality i.e. possibility and necessity She argues that we need logical modal concepts as a condition on our ability to think and metaphysical modal concepts as a condition on our ability to think about the world Necessity has its source in the laws of thought and the conditions of thought

Saul Kripke G. W. Fitch, 2014-12-18 Saul Kripke is one of the most original and creative philosophers writing today His work has had a tremendous impact on the direction that philosophy has taken in the last thirty years and continues to dominate some of its most fundamental aspects Given Kripke's importance it is perhaps surprising that there is no introduction to his philosophy available to the general student This book fills that gap As much of Kripke's work is highly technical the book's central aim is to provide clear exposition of Kripke's ideas in a form that is understandable to a beginning readership as well as a commentary on them that more advanced students will find useful The book begins with a

discussion of Kripke's early work on modal logic which provides the foundation for many of his later philosophical contributions before examining in detail Kripke's central ideas and arguments contained in *Naming and Necessity*. In further chapters Kripke's work on semantic paradoxes and his theory of truth are outlined as well as his controversial interpretation of Wittgenstein's famous private language argument. Kripke's ideas are situated alongside those of his precursors and some of the most important and interesting responses to them are explored. The reader is thus able to appreciate the path-breaking nature of Kripke's contributions, how they have challenged fundamentally traditional interpretations and how they have sparked some of the most important philosophical debates of recent years.

The Philosophy of P.F. Strawson Lewis Edwin Hahn, 1998. The twenty-sixth volume in the highly acclaimed *Library of Living Philosophers* series is devoted to the work of British philosopher of logic and metaphysician P. F. Strawson. Following the *Library of Living Philosophers* series format, the volume contains an intellectual autobiography, twenty critical and descriptive essays by leading philosophers from around the world, Strawson's replies to the essays, and a bibliography of Strawson's works. Born in 1919, Strawson was a leading proponent of ordinary language philosophy. He is the author of the early and extremely influential paper *On Referring* in which he criticized Russell's theory of definite descriptions. His most influential book *Individuals* helped to raise the status of metaphysics as a philosophical enterprise. Themes first addressed in this book continued to be of concern to him in his later work, including the possibility of objective knowledge, the subject-predicate distinction, the ontological status of persons, and the problem of individuation. Contributors to the book include Ruth Garrett Millikan, Susan Haack, E. M. Adams, Panayot Butchvarov, Richard Behling, John McDowell, Simon Blackburn, Tadeusz Szubka, David Frederick Haight, Joseph S. Wu, Andrew G. Black, David Pears, Robert Boyd, Hilary Putnam, Paul F. Snowdon, Arindam Chakrabarti, Wenceslao J. Gonzalez, Ernest Sosa, Chung M. Tse, John R. Searle, and P. F. Strawson.
