Thousand-Mile Song David Rothenberg, 2010-05 In Thousand Mile Song musician and philosopher David Rothenberg uses the enigma of whale sounds to explore whether we can truly understand nonhuman minds Interviewing scholars around the world as they attempt to decipher underwater music Rothenberg tells the story of scientists and artists confronting an unknown as vast as the ocean

Along the way he plays his clarinet live with whales in their native habitats from Russia to Hawaii making interspecies music that appears on the included CD Richly detailed and deeply entertaining Thousand Mile Song is an imaginative look at the most intriguing creatures of the ocean

The Sounding of the Whale D. Graham Burnett, 2022-12-22 This wonderful book documents the interplays among science conservation and politics in the evolving career of the whale over the last century William Perrin Senior Scientist for Marine Mammals at the Southwest Fisheries Science Center NOAA Fisheries Service From biblical times whales have breached in the human imagination as looming figures of terror power confusion and mystery In the twentieth century however our understanding of and relationship to these superlatives of creation underwent some astonishing changes and with The Sounding of the Whale D Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research The Sounding of the Whale tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below

Bug Music David Rothenberg, 2013-04-16 In the spring of 2013 the cicadas in the Northeastern United States will yet again emerge from their seventeen year cycle the longest gestation period of any animal Those who experience this great sonic invasion compare their sense of wonder to the arrival of a comet or a solar eclipse This unending rhythmic cycle is just one unique example of how the pulse and noise of insects has taught humans the meaning of rhythm from the whirr of a cricket's wings to this unfathomable and exact seventeen year beat In listening to cicadas as well as other humming clicking and thrumming insects Bug Music is the first book to consider the radical notion that we humans got our idea of rhythm synchronization and dance from the world of insect sounds that surrounded our species over the millions of years over which we evolved Completing the trilogy he began with Why Birds Sing and Thousand Mile Song David Rothenberg explores a unique part of our relationship with nature and sound the music of insects that has provided a soundtrack for humanity throughout the history of our species Bug Music continues Rothenberg's in depth research and spirited writing on the relationship between human and animal music and it follows him as he explores insect influences in classical and modern music plays his saxophone with crickets and other insects and confers with researchers and scientists

nationwide This engaging and thought provoking book challenges our understanding of our place in nature and our relationship to the creatures surrounding us and makes a passionate case for the interconnectedness of species **The Power of Music** Elena Mannes,2011-05-31 The award winning creator of the documentary The Music Instinct traces the efforts of visionary researchers and musicians to understand the biological foundations of music and its relationship to the brain and the physical world 35 000 first printing *Digital Audio and Acoustics for the Creative Arts* Mark Ballora,2017 Designed for introductory courses in electronic music and multimedia Digital Audio and Acoustics for the Creative Arts presents the fundamental concepts of musical acoustics psychoacoustics electronics digital audio audio recording and communication among devices via the Musical Instrument Digital Interface MIDI and Open Sound Control OSC The Sounds of Life Karen Bakker,2024-03-12 When we think of animal sounds we tend to think about birds or other highly sonic animals However scientists are learning that a much wider range of animals and even plants use sound and they are figuring this out with the help of AI and other digital technologies This book tells the stories of scientists who are using these digital technologies to decode the hidden world of nonhuman sound The author shows how digital technology so often associated with our alienation from nature is offering an opportunity to listen to plants and animals in powerful ways changing our understanding of nonhuman communication and reviving our connection to the natural world This book is a story of discovery Early chapters describe early 20th century discoveries about whale noise while subsequent chapters describe how digital technologies have revealed the surprising sonic worlds of elephants turtles corals and plants Through these stories we learn that many more plants and animals can make and sense sound and that these sounds are linked to complex communication and social behavior But as we learn this science is not merely about listening to nature in new ways it also creates new possibilities for both conservation and interspecies communication In the book s later chapters the author describes fascinating breakthroughs aided by robotics and AI that may enable people to communicate with other species She ends the book by exploring how conservationists are using bioacoustics to protect endangered species address the threat of noise pollution and create innovative responses to biodiversity loss and climate change Throughout the book the author describes the research of a diverse range of scientists with a particular emphasis on female and indigenous scientists And while she ultimately champions the potential of digital technology she is not naive to its limitations and is careful throughout to highlight the limits of technology Ultimately we see that bioacoustics aided by digital tech offers humanity a powerful window into the nonhuman world **Is Birdsong Music?** Hollis Taylor,2017-05-01 A ground breaking study of the songs of the pied butcherbird intellectually engaging and also very entertaining as a fieldwork memoir The Music Trust How and when does music become possible Is it a matter of biology or culture or an interaction between the two Revolutionizing the way we think about the core values of music and human exceptionalism Hollis Taylor takes us on an outback road trip to meet the Australian pied butcherbird Recognized for their distinct timbre calls and songs both sexes of this songbird sing in

duos trios and even larger choirs transforming their flute like songs annually While birdsong has long inspired artists writers musicians and philosophers and enthralled listeners from all walks of life researchers from the sciences have dominated its study As a field musicologist Taylor spends months each year in the Australian outback recording the songs of the pied butcherbird and chronicling their musical activities She argues persuasively in these pages that their inventiveness in song surpasses biological necessity compelling us to question the foundations of music and confront the remarkably entangled relationship between human and animal worlds Equal parts nature essay memoir and scholarship *Is Birdsong Music* offers vivid portraits of the extreme locations where these avian choristers are found quirky stories from the field and an in depth exploration of the vocalizations of the pied butcherbird Hollis Taylor has given us one of the most serious books ever written on animal music *Is Birdsong Music* is so engaging that all who care about humanity's place on Earth should read it We are certainly not the only musicians on this planet David Rothenberg author of *Why Birds Sing* **Orca** Jason M.

Colby, 2018-05-01 Since the release of the documentary *Blackfish* in 2013 millions around the world have focused on the plight of the orca the most profitable and controversial display animal in history Yet until now no historical account has explained how we came to care about killer whales in the first place Drawing on interviews official records private archives and his own family history Jason M Colby tells the exhilarating and often heartbreaking story of how people came to love the ocean's greatest predator Historically reviled as dangerous pests killer whales were dying by the hundreds even thousands by the 1950s the victims of whalers fishermen and even the US military In the Pacific Northwest fishermen shot them scientists harpooned them and the Canadian government mounted a machine gun to eliminate them But that all changed in 1965 when Seattle entrepreneur Ted Griffin became the first person to swim and perform with a captive killer whale The show proved wildly popular and he began capturing and selling others including Sea World's first Shamu Over the following decade live display transformed views of *Orcinus orca* The public embraced killer whales as charismatic and friendly while scientists enjoyed their first access to live orcas In the Pacific Northwest these captive encounters reshaped regional values and helped drive environmental activism including Greenpeace's anti whaling campaigns Yet even as Northwesterners taught the world to love whales they came to oppose their captivity and to fight for the freedom of a marine predator that had become a regional icon This is the definitive history of how the feared and despised killer became the beloved orca and what that has meant for our relationship with the ocean and its creatures **Species and Machines** Martyn Hudson, 2017-09-18 This book offers a re examination of the relationship between humans and nature with a new methodology by examining our entanglement with machines Using central ideas of critical theory it uncovers the suppression of nature through technology tools and engines It focuses on the ways in which human social forms have actively subjugated and destroyed other species in order to enhance their own social power and accumulation leading to a new Anthropocene epoch in which human intervention is signalled in the geological record Beginning with an account of the interactions between humans and other

species the book moves on to explore the hidden history of Marx and his obsession with machines as well as new attempts to rethink a Marxist ecology before proceeding to examine the manner in which technologies were used to suppress and destroy one particular species the Whale of what we call the Cetacean Holocaust Following this there are analyses of the emergence of the human encampments of the cities and the rise of mobile locomotive cultures and consideration of the relationship between machines of memory and the capturing of nature A radical rethinking of classical social theory that develops new ways of thinking about ecological catastrophe and nature this book will appeal to scholars of social theory and environmental sociology

Captured: The Animal within Culture M. Boyde, 2013-11-20 In 2008 the youtube video documenting the emotional reunion between two men and Christian the Lion became a worldwide sensation Key themes of the essays in **Captured the Animal within Culture** are encapsulated in Christian's story the implications of the physical and cultural capture of animals

On Active Grounds Robert Boschman, Mario Trono, 2019-04-17 **On Active Grounds** considers the themes of agency and time through the burgeoning interdisciplinary field of the environmental humanities Fourteen essays and a photo album cover topics such as environmental practices and history temporal literacy graphic novels ecocinema ecomusicology animal studies Indigeneity wolf reintroduction environmental history green conservatism and social ecological systems change The book also speaks to the growing concern regarding environmental issues in the aftermath of the 2015 Paris Climate Conference COP21 and the election of Donald Trump in the United States This collection is organized as a written and visual appeal to issues such as time how much is left and agency who is active what can be done what does and does not work It describes problems and suggests solutions **On Active Grounds** is unique in its explicit and twinned emphasis on time and agency in the context of the Environmental Humanities and a requisite interdisciplinarity

The Book of Barely Imagined Beings Caspar Henderson, 2022-12-22 Caspar Henderson takes us on an eye opening tour of real animals that no sane human could ever have invented Frans de Waal New York Times bestselling author With **The Book of Barely Imagined Beings** Caspar Henderson offers readers a fascinating beautifully produced modern day menagerie But whereas medieval bestiaries were often based on folklore and myth the creatures that

abound in Henderson's book from the axolotl to the zebrafish are with one exception very much with us albeit sometimes in depleted numbers. The Book of Barely Imagined Beings transports readers to a world of real creatures that seem as if they should be made up that are somehow more astonishing than anything we might have imagined. The yeti crab for example uses its furry claws to farm the bacteria on which it feeds. The waterbear meanwhile is among nature's extreme survivors able to withstand a week unprotected in outer space. These and other strange and surprising species invite readers to reflect on what we value or fail to value and what we might change. A powerful combination of wit, cutting edge natural history and philosophical meditation. The Book of Barely Imagined Beings is an infectious and inspiring celebration of the sheer ingenuity and variety of life in a time of crisis and change. The Book of Barely Imagined Beings is one that Pliny would have envied, Darwin applauded and Borges relished. In these days of doom and gloom I can think of nothing more rejoicing than Caspar Henderson's magical book. Alberto Manguel, author of *A History of Reading*. Magnificent bravura, beautiful and astoundingly interesting. The Sunday Times. Spell binding, brilliantly executed, extraordinary. The Guardian. [The Oxford Handbook of Sound and Imagination](#). Mark Grimshaw, Mark Grimshaw-Aagaard, Mads Hansen, Martin Knakkegaard, 2019. Ecomusicology. Mark Pedelty, 2011-06-15. Can musicians really make the world more sustainable? Anthropologist Mark Pedelty joined an eco-oriented band, the Hypoxic Punks, to find out. In his timely and exciting book *Ecomusicology*, Pedelty explores the political ecology of rock from local bands to global superstars. He examines the climate change controversies of U2's 360 Degrees stadium tour, deemed excessive by some, and the struggles of local folk singers who perform songs about the environment. In the process, he raises serious questions about the environmental effects and meanings on music. *Ecomusicology* examines the global, national, regional, and historical contexts in which environmental pop is performed. Pedelty reveals the ecological potentials and pitfalls of contemporary popular music in part through ethnographic fieldwork among performers, audiences, and activists. Ultimately, he explains how popular music dramatically reflects both the contradictions and dreams of communities searching for sustainability. [Resonant Matter](#). Lutz Koepnick, 2020-12-10. In *Resonant Matter*, Lutz Koepnick considers contemporary sound and installation art as a unique laboratory of hospitality amid inhospitable times. Inspired by Ragnar Kjartansson's nine-channel video installation *The Visitors* (2012), the book explores resonance, the ability of objects to be affected by the vibrations of other objects, as a model of art's fleeting promise to make

us coexist with things strange and other In a series of nuanced readings Koepnick follows the echoes of distant unexpected and unheard sounds in twenty first century art to reflect on the attachments we pursue to sustain our lives and the walls we need to tear down to secure possible futures The book s nine chapters approach The Visitors from ever different conceptual angles while bringing it into dialogue with the work of other artists and musicians such as Lawrence Abu Hamdan Guillermo Galindo Mischa Kuball Philipp Lachenmann Alvin Lucier Teresa Margolles Carsten Nicolai Camille Norment Susan Philipsz David Rothenberg Juliana Snapper and Tanya Tagaq With this book Koepnick situates resonance as a vital concept of contemporary art criticism and sound studies His analysis encourages us not only to expand our understanding of the role of sound in art of sound art but to attune our critical encounter with art to art s own resonant thinking
