Three Lectures On Post Industrial Society:

Three Lectures on Post-Industrial Society Daniel Cohen, 2008-08-29 A noted economist analyzes the upheavals caused by revolutions in technology labor culture financial markets and globalization In this pithy and provocative book noted economist Daniel Cohen offers his analysis of the global shift to a post industrial era If it was once natural to speak of industrial society Cohen writes it is more difficult to speak meaningfully of post industrial society The solidarity that once lay at the heart of industrial society no longer exists The different levels of large industrial enterprises have been systematically disassembled tasks considered nonessential are assigned to subcontractors engineers are grouped together in research sites apart from the workers Employees are left exposed while shareholders act to protect themselves Never has the awareness that we all live in the same world been so strong and never have the social conditions of existence been so unequal In these wide ranging reflections Cohen describes the transformations that signaled the break between the industrial and the post industrial eras He links the revolution in information technology to the trend toward flatter hierarchies of workers with multiple skills and connects the latter to work practices growing out of the culture of the May 1968 protests Subcontracting and outsourcing have also changed the nature of work and Cohen succinctly analyzes the new international division of labor the economic rise of China India and the former Soviet Union and the economic effects of free trade on poor countries Finally Cohen examines the fate of the European social model with its traditional compromise between social justice and economic productivity in a post industrial world

Entrepreneurial Seoulite Mihye Cho, 2019-02-01 Entrepreneurial Seoulite might be read as a memoir on Hongdae based on the author s observations as a member of South Korea s Generation X During the 1990 s Hongdae became widely known as a cool place associated with discourses on alternative music independent labels and club culture Today Hongdae is well known for its youth culture and nightlife as well as its gentrification Recent research on Korean culture approaches the K wave phenomenon from the perspectives of cultural consumption media analysis and cultural management and policy Meanwhile studies on Seoul have centered on its transformation as a global creative city Rather than examining the K wave or the city itself this book explores the experience of living through the city in transition focusing on the relationship between the ideology that justified engagement in capitalism and the subjectification process The book aims to understand the project to institutionalize a cultural district in Hongdae as a demonstration of the coevolution of ideologies and citizenship in a society undergoing rapid liberalization politically culturally and economically A cultural turn took place in Korea during the 1990s amid the economic prosperity driven by state led industrialization and the collapse of the military dictatorship due to democratization movements Cultural critiques emerging as an alternative to social movements proliferated to assert the freedom and autonomy of individuals against regulatory systems and institutions The nation was hit by the Asian financial crisis in 1997 and witnessed massive economic restructuring including layoffs stakeouts and a prevalence of contingent employment As a result the entire nation had to find new engines of economic growth while

experiencing a creative destruction At the center of this national transformation Seoul has sought to recreate itself from a mega city to a global city equipped with cutting edge knowledge industries and infrastructures By juxtaposing the cultural turn and cultural creative city making Entrepreneurial Seoulite interrogates the formation of new citizen subjectivity namely the enterprising self in post Fordist Seoul What kinds of logic guide individuals in the engagement of new urban realities in rapidly liberalized Seoul culturally and economically In order to explore this query Mihye Cho draws on Weber s concept of the spirit of capitalism on the formation of a new economic agency focusing on the re configuration of meanings and seeks to capture a transformative moment detailing when and how capitalism requests a different spirit and lifestyle of its participants Likewise this book approaches the enterprising self as the new spirit of post Fordist Seoul and explores the ways in which people in Seoul internalize and negotiate this new enterprising self
