World Studies: Asia and the Pacific Heidi Hayes Jacobs, Michal L. Levasser, 2004-05-01 **Prentice Hall World Studies**, 2005 *Resources in Education*, 2000 **Higher Education in the Asia-Pacific** Simon Marginson, Sarjit Kaur, Erlenawati Sawir, 2011-08-21 This survey provides unprecedented scope and detail of analysis on higher education in the Asia Pacific region In this era of global integration convergence and comparison the balance of power in worldwide higher education is shifting In less than two decades the Asia Pacific region has come to possess the largest and fastest growing higher education sector on Earth The countries of East and Southeast Asia and the Western Pacific together enrol 50 million tertiary students compared to 14 million in 1991 and will soon conduct a third of all research and development In China Hong Kong Taiwan Korea and Singapore world class universities are emerging at breakneck pace fostered by modernizing governments that see knowledge and skills as key to a future shaped equally by East and West and supported by families deeply committed to education But not all Asia Pacific countries are on this path not all reforms are effective and there are marked differences between nations in levels of resources educational participation research state controls and academic freedom Higher Education in the Asia Pacific Strategic responses to globalization provides an authoritative survey of tertiary education in this diverse and dynamic region Its 23 chapters written by authors from a dozen different countries focus successively on the Asia Pacific as a whole the strategies of individual universities and national policies and strategies in response to the global challenge *The International Handbook of Educational Research in the Asia-Pacific Region* J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular

methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

World Studies: Medieval Times to Today Heidi Hayes Jacobs, Michal L. LeVasseur, 2005

The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31

School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all

The Oxford Handbook of Higher Education in the Asia-Pacific Region Devesh Kapur, Lily Kong, Florence Lo, David M. Malone, 2023-01-20

Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID 19 pandemic Asia Pacific s share of the world s Gross Domestic Product GDP doubled from 15 per cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the world s population and three of the world s five largest economies Asia is soon poised to home half of the world s middle class a class that is both the driver and the product of higher education The quality of a country s system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects It is therefore natural that the putative Asian Century should generate interest in the region s higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among male students and business degrees while at the same time are also highly differentiated not only across countries but also within As such a better understanding of higher education achievements failings potential and structural limitations in the Asia Pacific Region is imperative This handbook presents a number of significant country case studies and documents cross cutting trends

relating to among other things the trilemma faced by governments juggling competing claims of access accessible cost and quality the balance between teaching and research the links between labour markets demand and higher education supply preferred fields of study and their consequences the rise of the research university in Asia the lure of institutions of international reputation within the region new education technologies and their effects and trends in government policy within the wider region and sub regions Higher Education Regionalization in Asia Pacific J. Hawkins,K. Mok,D. Neubauer,2012-10-25 Asia is rapidly developing a wide variety of regional organizations and interactive patterns reflecting in large part its increasing role in the global economic and political engagements Higher Education constitutes a distinct sphere of activity within this overall pattern of regionalization **Asia Journal of Global Studies** Derrick M. Nault,2010-10 The Asia Journal of Global Studies AJGS is the official journal of the Japan based Asia Association for Global Studies AAGS The journal features research articles on Asia and other world regions from an Asian regional perspective AJGS other regular offerings include guest columns by global studies experts in Asia reader commentaries and book reviews Multidisciplinary in scope AJGS accepts contributions from authors with backgrounds in the humanities and social sciences The journal encourages historians political scientists sociologists anthropologists linguists philosophers and others to submit their work for consideration It particularly welcomes research that dissolves academic boundaries looks beyond traditional notions of the nation state and aims for a holistic view of the past present and future
