Women Entrepreneurs Moving Beyond The Glass Ceiling:

Women Entrepreneurs Dorothy P. Moore, E. Holly Buttner, 1997-07-22 By analyzing the cases of 129 successful women entrepreneurs the authors of *Paths to Success* explore the reasons for the rising number and success of women entrepreneurs in the United States. The authors consider the driving forces which led the women to leave the organizational environment, the use of the organization as an incubator for entrepreneurship, the strategies employed immediately after making the move from the corporation, initial difficulties and entrepreneurial networking, and how these talented women measure success in their businesses. The book concludes with suggestions for future entrepreneurs and for organizations which wish to halt the mass exit of women from their corporate environments.

Womenpreneurs Dorothy P. Moore, 2012 *Womenpreneurs* 21st Century Success Strategies will appeal to three groups of interested readers. The first consists of higher education faculty teaching courses in management entrepreneurship and women's studies and directors of professional development workshops interested in acquiring a supplemental readings book. The second consists of women in the workplace, those contemplating entry, parents who want to provide daughters with the best guidance as well as men and significant others who want those they love to have a safer navigational journey and recognize that the work environment they will enter is not a level playing field. The third group includes intrapreneurial and entrepreneurial women in all stages of personal and venture development. For these people the book will serve as a valuable resource and guide. Major themes in the book include the nature of the changing workplace, the challenges of organizational life, career strategies, entrepreneurship, home and family balance, and tactics for navigating in a turbulent economic climate.

Women Entrepreneurs and the Global Environment for Growth Candida G. Brush, Anne de Bruin, Elizabeth J. Gatewood, Colette Henry, 2010-01-01 *Women's entrepreneurship research and the understanding of factors influencing the growth of women owned business advanced significantly over the last decade. Yet challenges remain. Women Entrepreneurs and the Global Environment for Growth provides wide ranging insights on the challenges women entrepreneurs face growing their businesses and how these may be addressed. This volume is rooted in research and considers growth challenges both contextually and firm specific, provoking current thought and enriching the current literature on gender and entrepreneurship. Part one highlights how contextual factors and especially social and familial settings of entrepreneurs have a differential impact on men and women. Part two examines strategies, constraints and enablers of growth and performance. The authors aptly demonstrate that a well focused gender lens is necessary to better explain the phenomenon of women's entrepreneurship. Extending previous studies about women's entrepreneurship, this volume is unique in its application of research from the Diana Project, a path breaking initiative dating from 1999 to study female entrepreneurial success. Contributions from an international cast of authors make this a comprehensive and broadly appealing reference work.*
