Wonder When And Why The World Appears Radiant:

Wonder Paul R. Fleischman, 2013-07 What do a marigold starlight over South Africa and the birth of a child have in common Every person plant and star springs up from information compounded by interaction We are embedded in an ancient intricate world Changing combinations of atoms pass through the long filter of history and natural law to form planet Earth whales and our own thoughts Based on the growth of evidence explaining how the world is put together we have become the first generation to have a narrative that unites electron motion to our breath and that connects hydrogen fusion in the sun to the energy that powers our own minds We can describe how the proteins in our mitochondria pinch and place into perfect position metal ions that were forged in exploding stars We cohere for a moment suspended between information order and transformation of all things This book is a scientific and literary exploration of those discoveries that reveal our deepest identity Through our urge to understand and communicate we have uncovered new meanings that infuse our days with wonder

The Definition, Practice, and Psychology of Vedanā John Peacock, Martine Batchelor, 2020-06-09 This book examines the importance of the topic of feeling tone vedan as it appears in early Buddhist texts and practice and also within contemporary secular mindfulness based interventions The volume aims to highlight the crucial nature of the feeling tone or taste of experience in determining mental reactivity behaviour character and ethics In the history of Buddhism and in its reception in contemporary discourse vedan has often been a much neglected topic with greater emphasis being accorded to other meditational focuses such as body and mind However feeling tone vedan can be seen as a crucial pivotal point in understanding the cognitive process both in contemporary mindfulness and meditation practice within more traditional forms of Buddhism The taste of experience it is claimed comes as pleasant unpleasant and neither pleasant nor unpleasant and these tones or tastes inevitably follow from humans being embodied sensory beings That experience comes in this way is unavoidable but what follows can be seen in terms of reactivity or responsiveness This book was originally published as a special issue of Contemporary Buddhism

Vipassana Meditation and the Scientific Worldview (2nd Edition) Paul R. Fleischman, 2020 We have lived in an era during which the spirituality intrinsic to science has become obvious The universe is not random It contains patterns and paths This is called the information state of the universe and it organizes the materials and energies that form our bodies and minds We are each microcosms downloaded into our small selves are a vast array of directives and limits the laws of science that govern stars as well as our hearts and minds We can gain access to some of the wisdom of this universal lawful reality through meditation As we observe our body sensations with equanimity we come in contact with basic laws of physics like entropy or the decay of aggregates over time and we also encounter basic laws of psychology like the fact that social love Mett leaves us happier than anger or fear We may become self balanced to face contingencies It is science not mysticism or religion that reveals the value of Vipassana as a vestibule to ultimate realities and highlights it as a practical guide to the psychology of well lived lives We are each unique snowflakes patterns and lace
