Wooden Ship The Art History And Revival Of Wooden Boatbuilding:

Wooden Ship Peter H. Spectre, David Larkin, Paul Rocheleau, 1991 Covers the art of wooden shipbuilding from the canoe to the pleasure craft of modern times A Boston Schooner in the Royal Navy, 1768-1772 Phillip Reid, 2023 Uses rare surviving records including fully intact logbooks to situate the customs enforcement interceptor Sultana within the wider picture of the British Atlantic in this crucial period HONORABLE MENTION 2023 Lyman Book Award for North American Naval History The small Boston built schooner Sultana served as a customs enforcement interceptor on the North American eastern seaboard in the period leading up to the American Declaration of Independence when British taxation of American trade was a hugely contentious issue As a typical workaday British American merchant ship taken into naval service Sultana offers a rare opportunity to understand a technology of paramount importance to this world where records for merchant ships are scarce but where in this case a wealth of information from plan drawings to the fully intact logbooks has survived The book provides a detailed narrative of the ship's activities and reveals the nature of life on board and the day to day business of operating a small sailing ship It explores the technology of the ship and her sailing qualities as revealed by the ship's logs and also by the performance of a modern replica In addition the book situates Sultana's role within the wider picture of the British Atlantic in this crucial period It is thereby both naval microhistory and also Atlantic history for all scholars interested in the formation and development of the British Atlantic world *Yachting*, 1992-05 **The Merchant Ship in the British Atlantic, 1600-1800** Phillip Reid, 2020-04-14 In *The Merchant Ship in the British Atlantic 1600-1800* Phillip Reid refutes the long held assumption that merchant ship technology in the British Atlantic during the two centuries of its development was static for all intents and purposes and that whatever incremental changes took place in it were inconsequential to the development of the British Empire and its offshoots Drawing on a unique combination of evidence from both traditional and unconventional sources Phillip Reid shows how merchants shipwrights and mariners used both proven principles and adaptive innovations in hulls rigs and steering systems to manage high physical and financial risks Listen also to the podcast where the author is interviewed about the book for New Books Network and the podcast with Liz Covart for Ben Franklin's World by clicking here **A Guide for Using *The Witch of Blackbird Pond* in the Classroom** Dona Rice, 1992-06 Presents lesson plans curriculum connections activities vocabulary help a related reading list and other materials for teaching *The witch of Blackbird Pond* by Elizabeth George Speare From Sail to Steam Richard V. Francaviglia, 2010-06-28 The story of the ships mariners and ports that formed a vital connection between Texas and the rest of the world A first stop reference The Journal of American History Second Place Presidio La Bahia Award Sons of the Republic of Texas The Gulf Coast has been a principal place of entry into Texas ever since Alonso Alvarez de Pineda explored these shores in 1519 Yet nearly five hundred years later the maritime history of Texas remains largely untold In this book Richard V Francaviglia offers a comprehensive overview of Texas merchant and military marine history drawn from his own

extensive collection of maritime history materials as well as from research in libraries and museums around the country Based on recent discoveries in nautical archaeology Francaviglia tells the stories of the Spanish flotilla that wrecked off Padre Island in 1554 and of La Salle s flagship Belle which sank in 1687 He explores the role of the Texas Navy in the Texas Revolution of 1835 1836 and during the years of the Texas Republic and also describes the Civil War battles at Galveston and Sabine Pass Finally he recounts major developments of the nineteenth century concluding with the disastrous Galveston Hurricane in 1900 More than one hundred illustrations many never before published complement the text Although there have been many excellent and valuable books published previously on specific topics in Texas maritime development e g the Texas Navy river trade the Civil War etc we have been waiting a long time for a single volume that ties all those loose threads together into a single cohesive whole Andrew W Hall specialist in Texas marine history and archaeology **1995** Massimo Mastrogregori,2014-02-21 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors **Proceedings - United States Naval Institute** United States Naval Institute,1992 **Air University Library Index to Military Periodicals** ,1992 **The Routledge Companion to Marine and Maritime Worlds 1400-1800** Claire Jowitt,Craig Lambert,Steve Mentz,2020-05-21 This book has been nominated for The Mountbatten Award for Best Book in the Maritime Media Awards 2021 The Routledge Companion to Marine and Maritime Worlds 1400 1800 explores early modern maritime history culture and the current state of the research and approaches taken by experts in the field Ranging from cartography to poetry and decorative design to naval warfare the book shows how once traditional and often Euro chauvinistic depictions of oceanic mastery during the early modern period have been replaced by newer global ideas This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus da Gama and Magellan with an awareness of the sophistication and maritime expertise in Asia the Arab world and the Americas By imparting riveting new stories and global perceptions of maritime history and culture the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast unpredictable ocean With maritime studies growing and the ocean s health in decline this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas
