

STAT 454: Knowledge Evaluation Sheet 4

Question 1:

Consider a data set of a binary time series $\{x_1, x_2, \dots, x_n\}$ with $x_i \in \{0, 1\}$. Suppose $x_i = 1$ if the observation is "active" and $x_i = 0$ otherwise.

Let the binary labels $\{x_1, x_2, \dots, x_n\}$ follow a process for following problem:

Let x_1 be a Bernoulli random variable for any $x_1 \in \{0, 1\}$. For $i = 2, 3, \dots, n$, let x_i be a Bernoulli random variable with parameter p_i and $p_i = \frac{1}{2}$ if $x_{i-1} = 0$ and $p_i = \frac{1}{3}$ if $x_{i-1} = 1$.

- What is the average of the sequence $\{x_1, x_2, \dots, x_n\}$ as $n \rightarrow \infty$? What is the variance of x_1 ?
- What is the long-run frequency of $x_i = 1$? What is the long-run frequency of $x_i = 0$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 1$?
- Let x_i be a Bernoulli random variable for any $x_i \in \{0, 1\}$. What is the long-run frequency of $x_i = 1$ if $x_1 = 1$ and $x_2 = 1$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 1$ and $x_2 = 0$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 0$ and $x_2 = 1$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 0$ and $x_2 = 0$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 1$ and $x_2 = 1$ and $x_3 = 1$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 1$ and $x_2 = 1$ and $x_3 = 0$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 1$ and $x_2 = 0$ and $x_3 = 1$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 1$ and $x_2 = 0$ and $x_3 = 0$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 0$ and $x_2 = 1$ and $x_3 = 1$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 0$ and $x_2 = 1$ and $x_3 = 0$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 0$ and $x_2 = 0$ and $x_3 = 1$?
- What is the long-run frequency of $x_i = 1$ if $x_1 = 0$ and $x_2 = 0$ and $x_3 = 0$?

Question 2:

Let the binary labels $\{x_1, x_2, \dots, x_n\}$ follow the following process: x_1 is a Bernoulli random variable with parameter p_1 and $p_1 = \frac{1}{2}$ if $x_0 = 0$ and $p_1 = \frac{1}{3}$ if $x_0 = 1$. For $i = 2, 3, \dots, n$, let x_i be a Bernoulli random variable with parameter p_i and $p_i = \frac{1}{2}$ if $x_{i-1} = 0$ and $p_i = \frac{1}{3}$ if $x_{i-1} = 1$. What is the long-run frequency of $x_i = 1$?

Solutions Manual and Supplementary Materials for Econometric Analysis of Cross Section and Panel Data

Jeffrey M. Wooldridge, 2003 Solutions manual for a widely used graduate econometrics text **Multilevel and Longitudinal Modeling Using Stata, Second Edition** Sophia Rabe-Hesketh, Anders Skrondal, 2008-02-07 This textbook looks specifically at Stata's treatment of generalized linear mixed models also known as multilevel or hierarchical models. These models are mixed because they allow fixed and random effects and they are generalized because they are appropriate for continuous Gaussian responses as well as binary count and other types of limited dependent variables **A Companion to Econometric Analysis of Panel Data** Badi H. Baltagi, 2009-06-22 This book is a companion to Baltagi's 2008 leading graduate econometrics textbook on panel data entitled *Econometric Analysis of Panel Data* 4th Edition. The book guides the student of panel data econometrics by solving exercises in a logical and pedagogical manner helping the reader understand, learn, and apply panel data methods. It is also a helpful tool for those who like to learn by solving exercises and running software to replicate empirical studies. It works as a complementary study guide to Baltagi 2008 and also as a stand-alone book that builds up the reader's confidence in working out difficult exercises in panel data econometrics and applying these methods to empirical work. The exercises start by providing some background information on partitioned regressions and the Frisch-Waugh-Lovell theorem. Then it goes through the basic material on fixed and random effects models in a one-way and two-way error components models, basic estimation, test of hypotheses, and prediction. This includes maximum likelihood estimation, testing for poolability of the data, testing for the significance of individual and time effects as well as Hausman's test for correlated effects. It also provides extensions of panel data techniques to serial correlation, spatial correlation, heteroskedasticity, seemingly unrelated regressions, simultaneous equations, dynamic panel models, incomplete panels, measurement error, count panels, rotating panels, limited dependent variables, and non-stationary panels *Analysis of Incidence Rates* Peter Cummings, 2019-04-16 Incidence rates are counts divided by person-time; mortality rates are a well-known example. *Analysis of Incidence Rates* offers a detailed discussion of the practical aspects of analyzing incidence rates. Important pitfalls and areas of controversy are discussed. The text is aimed at graduate students, researchers, and analysts in the disciplines of epidemiology, biostatistics, social sciences, economics, and psychology. Features: Compares and contrasts incidence rates with risks, odds, and hazards. Shows stratified methods including standardization, inverse variance weighting, and Mantel-Haenszel methods. Describes Poisson regression methods for adjusted rate ratios and rate differences. Examines linear regression for rate differences with an emphasis on common problems. Gives methods for correcting confidence intervals. Illustrates problems related to collapsibility. Explores extensions of count models for rates including negative binomial regression methods for clustered data and the analysis of longitudinal data. Also reviews controversies and limitations. Presents matched cohort methods in detail. Gives marginal methods for converting adjusted rate ratios to rate

differences and vice versa Demonstrates instrumental variable methods Compares Poisson regression with the Cox proportional hazards model Also introduces Royston Parmar models All data and analyses are in online Stata files which readers can download Peter Cummings is Professor Emeritus Department of Epidemiology School of Public Health University of Washington Seattle WA His research was primarily in the field of injuries He used matched cohort methods to estimate how the use of seat belts and presence of airbags were related to death in a traffic crash He is author or co author of over 100 peer reviewed articles

Stata Cross-sectional Time-series Stata Corporation,2003 *Student's Solutions Manual and Supplementary Materials for Econometric Analysis of Cross Section and Panel Data, second edition* Jeffrey M. Wooldridge,2011-06-24 This is the essential companion to the second edition of Jeffrey Wooldridge s widely used graduate econometrics text The text provides an intuitive but rigorous treatment of two state of the art methods used in contemporary microeconomic research The numerous end of chapter exercises are an important component of the book encouraging the student to use and extend the analytic methods presented in the book This manual contains advice for answering selected problems new examples and supplementary materials designed by the author which work together to enhance the benefits of the text Users of the textbook will find the manual a necessary adjunct to the book

Applied Regression Analysis Christer Thrane,2019-10-16 This book is an introduction to regression analysis focusing on the practicalities of doing regression analysis on real life data Contrary to other textbooks on regression this book is based on the idea that you do not necessarily need to know much about statistics and mathematics to get a firm grip on regression and perform it to perfection This non technical point of departure is complemented by practical examples of real life data analysis using statistics software such as Stata R and SPSS Parts 1 and 2 of the book cover the basics such as simple linear regression multiple linear regression how to interpret the output from statistics programs significance testing and the key regression assumptions Part 3 deals with how to practically handle violations of the classical linear regression assumptions regression modeling for categorical y variables and instrumental variable IV regression Part 4 puts the various purposes of or motivations for regression into the wider context of writing a scholarly report and points to some extensions to related statistical techniques This book is written primarily for those who need to do regression analysis in practice and not only to understand how this method works in theory The book s accessible approach is recommended for students from across the social sciences

Econometric Analysis of Panel Data Badi H. Baltagi,2021-03-16 This textbook offers a comprehensive introduction to panel data econometrics an area that has enjoyed considerable growth over the last two decades Micro and Macro panels are becoming increasingly available and methods for dealing with these types of data are in high demand among practitioners Software programs have fostered this growth including freely available programs in R and numerous user written programs in both Stata and EViews Written by one of the world s leading researchers and authors in the field *Econometric Analysis of Panel Data* has established itself as the leading textbook for graduate and postgraduate courses on panel data It provides up to

date coverage of basic panel data techniques illustrated with real economic applications and datasets which are available at the book's website on springer.com This new sixth edition has been fully revised and updated and includes new material on dynamic panels, limited dependent variables and nonstationary panels as well as spatial panel data The author also provides empirical illustrations and examples using Stata and EViews This is a definitive book written by one of the architects of modern panel data econometrics It provides both a practical introduction to the subject matter as well as a thorough discussion of the underlying statistical principles without taxing the reader too greatly Professor Kajal Lahiri, State University of New York Albany, USA This book is the most comprehensive work available on panel data It is written by one of the leading contributors to the field and is notable for its encyclopaedic coverage and its clarity of exposition It is useful to theorists and to people doing applied work using panel data It is valuable as a text for a course in panel data as a supplementary text for more general courses in econometrics and as a reference Professor Peter Schmidt, Michigan State University, USA Panel data econometrics is in its ascendancy combining the power of cross section averaging with all the subtleties of temporal and spatial dependence Badi Baltagi provides a remarkable roadmap of this fascinating interface of econometric method enticing the novice with technical gentleness the expert with comprehensive coverage and the practitioner with many empirical applications Professor Peter C. B. Phillips, Cowles Foundation, Yale University, USA

R for Political Data Science

Francisco Urdinez, Andres Cruz, 2020-11-17 R for Political Data Science: A Practical Guide is a handbook for political scientists new to R who want to learn the most useful and common ways to interpret and analyze political data It was written by political scientists thinking about the many real world problems faced in their work The book has 16 chapters and is organized in three sections The first on the use of R is for those users who are learning R or are migrating from another software The second section on econometric models covers OLS, binary and survival models, panel data and causal inference The third section is a data science toolbox of some of the most useful tools in the discipline: data imputation, fuzzy merge of large datasets, web mining, quantitative text analysis, network analysis, mapping, spatial cluster analysis and principal component analysis Key features: Each chapter has the most up to date and simple option available for each task assuming minimal prerequisites and no previous experience in R Makes extensive use of the Tidyverse, the group of packages that has revolutionized the use of R Provides a step by step guide that you can replicate using your own data Includes exercises in every chapter for course use or self study Focuses on practical based approaches to statistical inference rather than mathematical formulae Supplemented by an R package including all data As the title suggests this book is highly applied in nature and is designed as a toolbox for the reader It can be used in methods and data science courses at both the undergraduate and graduate levels It will be equally useful for a university student pursuing a PhD, political consultants or a public official all of whom need to transform their datasets into substantive and easily interpretable conclusions

Empirical Development Economics Måns Söderbom, Francis Teal, Markus Eberhardt, Simon Quinn, Andrew

Zeitlin, 2014-10-03 Understanding why so many people across the world are so poor is one of the central intellectual challenges of our time. This book provides the tools and data that will enable students, researchers, and professionals to address that issue. Empirical Development Economics has been designed as a hands-on teaching tool to investigate the causes of poverty. The book begins by introducing the quantitative approach to development economics. Each section uses data to illustrate key policy issues. Part One focuses on the basics of understanding the role of education, technology, and institutions in determining why incomes differ so much across individuals and countries. In Part Two, the focus is on techniques to address a number of topics in development, including how firms invest, how households decide how much to spend on their children's education, whether microcredit helps the poor, whether food aid works, who gets private schooling, and whether property rights enhance investment. A distinctive feature of the book is its presentation of a range of approaches to studying development questions. Development economics has undergone a major change in focus over the last decade with the rise of experimental methods to address development issues; this book shows how these methods relate to more traditional ones. Please visit the book's website at www.empiricalde.com for online supplements including Stata files and solutions to the exercises.
