The New Workforce Challenge A. Hatum, 2013-03-27 Few books go into enough depth to really understand the differences between the future generations of professionals to come and the ones that have gone before This innovative book examines how new generations of the workplace and workforce will be shaped in the future and shows organizations the ways in which they will have to adapt to succeed **The Multigenerational Workplace** Jennifer Abrams, Valerie von Frank, 2013-10-29 Bridge the generation gap and achieve outstanding results You might expect the occasional age related

misunderstanding to find its way into the classroom after all if today's kids aren't exactly from another planet they're definitely from another generation. At least you and your colleagues are all on the same page, right? Not necessarily. In some schools as many as four generations work side by side and that means countless chances for crossed wires, miscommunication and perhaps even mistrust. Authors Jennifer Abrams and Valerie von Frank are attuned to these generational differences. In this book based on Abrams' popular workshop, the authors demonstrate how educators can look past their own generational filters to reap the benefits of seeing through a new lens. Focusing on the major contexts in which generational differences play out including recruitment, coaching, professional learning and succession planning, this book offers tools, checklists and recommendations for collaborating, evaluating and engaging in professional learning that meets multigenerational needs. Professional development activities that cultivate an understanding of generational differences and strengthen workplace culture. Real life stories and case studies that bring the topic to life. With this honest, practical and often amusing look at generations at work, you'll learn to improve communication, retain staff and look toward succession. A multigenerational plan for school success. Few people today are taking on this topic, particularly in the U.S. One of the greatest leadership challenges of this age is how to work across generations. Newer generations are not flawed versions of previous generations; each has its own compelling perspective to contribute. This is the best book to add to an issue that affects all educators and will open up many people's thinking about leadership.
