Worked Examples in Mathematics for Scientists and Engineers G. Stephenson, 1986-05-01 **Worked Examples in Mathematics for Scientists and Engineers** Geoffrey Stephenson, 1985-01-01 Foundation Mathematics for Engineers and Scientists with Worked Examples Shefiu Zakariyah, 2024-10-28 Foundation Mathematics for Engineers and Scientists with Worked Examples covers fundamental topics in mathematics required for science and engineering disciplines. It is primarily designed to provide a comprehensive straightforward and step by step presentation of mathematical concepts to engineers, scientists and general readers. It moves from simple to challenging areas with carefully tailored worked examples of different degrees of difficulty. Mathematical concepts are deliberately linked with appropriate engineering applications to reinforce their value and are aligned with topics taught in major overseas curriculums. This book is written primarily for students at levels 3 and 4 typically in the early stages of a degree in engineering or a related discipline or for those undertaking foundation degree, Higher National Certificate, HND, International Foundation Year, IFY and International Year One, IYO courses with math modules. It consists of seven parts: Basic concepts in Mathematics, Coordinate Geometry, Algebraic Expression and Equations, Surds, Indices and Logarithms, Polynomials, Trigonometry. Each chapter is devoted to a topic and can be used as a stand alone guide with no prior knowledge assumed. Additional exercises and resources for each chapter can be found online. To access this supplementary content please go to www.dszak.com. **Mathematical Methods for Scientists and Engineers** Donald Allan McQuarrie, 2003. Intended for upper level undergraduate and graduate courses in chemistry, physics, math and engineering, this book will also become a must have for the personal library of all advanced students in the physical sciences. Comprised of more than 2000 problems and 700 worked examples that detail every single step, this text is exceptionally well adapted for self study as well as for course use. From publisher description.
