Progress Unchained Peter J. Bowler,2021-03-04 Bowler traces ideas about progress using evolutionary biology to throw light on parallel changes in the understanding of social development Humanities ,2002-11 **"Better Living"** William L. Bird,1999 Better Living Advertising Media and the New Vocabulary of Business Leadership 1935 1955 is a history of how big business learned to be both entertaining and persuasive when talking to the public Examining the years from the Depression to postwar prosperity Better Living follows the dissemination of a politically competitive claim of more new and better in industry and in life Beginning with the changes in business government relations during the New Deal this study looks at the ways in which politically active corporations and their leaders learned how to speak at a time when speaking was not enough Using archival sources such as the NBC Ford Motor Company DuPont and Franklin Delano Roosevelt collections William L Bird Jr establishes the importance of industrial films and their role in public relations and employee relations as well as the

use of dramatic radio productions in corporate public relations The author examines the interplay between general mass radio and print advertising radio program sponsorship and scriptwriting sponsored motion pictures and television entertainment as well as exhibitions and industrial fairs and the role these media played in shaping ideas about American business and political and cultural institutions in this country for the decades to come Book Jacket **Architecture and Science-Fiction Film** David T. Fortin,2016-12-05 The home is one of our most enduring human paradoxes and is brought to light tellingly in science fiction SF writing and film However while similarities and crossovers between architecture and SF have proliferated throughout the past century the home is often overshadowed by the spectacle of otherness The study of the familiar home within the alien SF creates a unique cultural lens through which to reflect on our current architectural condition SF has always been linked with alienation however the conditions of such alienation and hence notions of home have evidently changed There is often a perceived comprehension of the familiar that atrophies the inquisitive and interpretive processes commonly activated when confronting the unfamiliar Thus by utilizing the estranging qualities of SF to look at a concept inherently linked to its perceived opposite the home a unique critical analysis with particular relevance for contemporary architecture is made possible Imagining Flight A. Bowdoin Van Riper,2004 Imagining Flight is a history of the air age as the rest of us have experienced it on the pages of books the screens of movie theaters and the front pages of newspapers It focuses on the United States but also contrasts American ideas and attitudes with those of other air minded nations including Britain France Germany and Japan Architecture in the United States Dell Upton,1998 From Native American sites in New Mexico and Arizona to the ancient earthworks of the Mississippi Valley to the most fashionable contemporary buildings of Chicago and New York American architecture is incredibly varied In this revolutionary interpretation Upton examines American architecture in relation to five themes community nature technology money and art 109 illustrations 40 linecuts Map **The Mouse Machine** J P. Telotte,2010-10-01 Throughout Disney s phenomenally successful run in the entertainment industry the company has negotiated the use of cutting edge film and media technologies that J P Telotte argues have proven fundamental to the company s identity Disney s technological developments include the use of stereophonic surround sound for Fantasia experimentation with wide screen technology inaugural adoption of three strip Technicolor film and early efforts at fostering depth in the animated image Telotte also chronicles Disney s partnership with television development of the theme park and depiction of technology in science fiction narratives An in depth discussion of Disney s shift into digital filmmaking with its Pixar partnership and an emphasis on digital special effects in live action films such as the Pirates of the Caribbean series also highlight the studio s historical investment in technology By exploring the technological context for Disney creations throughout its history The Mouse Machine illuminates Disney s extraordinary growth into one of the largest and most influential media and entertainment companies in the world Hardback is unjacketed **Destined for the Stars** Catherine L. Newell,2019-06-05 Where did humanity get the idea that outer space

is a frontier waiting to be explored *Destined for the Stars* unravels the popularization of the science of space exploration in America between 1944 and 1955 arguing that the success of the US space program was due not to technological or economic superiority but was sustained by a culture that had long believed it was called by God to settle new frontiers and prepare for the inevitable end of time and God's final judgment Religious forces Newell finds were in no small way responsible for the crescendo of support for and interest in space exploration in the early 1950s well before Project Mercury the United States first human spaceflight program began in 1959 In this remarkable history Newell explores the connection between the art of Chesley Bonestell the father of modern space art whose paintings drew inspiration from depictions of the American West and the popularity of that art in Cold War America Bonestell's working partnership with science writer and rocket expert Willy Ley and Ley and Bonestell's relationship with Wernher von Braun father of both the V 2 missile and the Saturn V rocket whose millennial conviction that God wanted humankind to leave Earth and explore other planets animated his life's work Together they inspired a technological and scientific faith that awoke a deep seated belief in a sense of divine destiny to reach the heavens The origins of their quest Newell concludes had less to do with the Cold War strife commonly associated with the space race and everything to do with the religious culture that contributed to the invention of space as the final frontier

Challenges of Individualization Nikolai Genov, 2018-07-16 This book critically engages with a series of provocative questions that ask: Why are contemporary societies so dependent on constructive and destructive effects of individualization? Is this phenomenon only related to the second or late modernity? Can the concept of individualization be productively used for developing a sociological diagnosis of our time? The innovative answers suggested in this book are focused on two types of challenges accompanying the rise of individualization. First, that it is caused by controversial changes in social structures and action patterns. Second, that the effects of individualization question varieties of the common good. Both challenges have a long history but reached critical intensity in advanced contemporary societies in the context of current globalization.
