Rotatune screw compressors

New variable speed-driven screw compressors

YORK Refrigeration has developed three new variable Rotatune screw compressors as a supplement to the existing range of scroll and YORK screw compressors.

The Rotatune concept is based on the use of a frequency converter and high-speed motors. This provides a number of distinct advantages. The new compressors have been developed on the basis of the existing YORK screw compressor programme and they will be delivered as complete factory-installed units. The variable compressor speed – i.e. the capacity – is controlled by the well-known YORK control system.

Advantages of the Rotatune concept

- Accurate control and indication of the capacity
- Increased COP compared with normal 3000/3600 rpm compressors
- Very high COP even at part load
- A low starting current and high power factor avoid heavy demands on the electrical system
- Low average noise level
- Fewer movable parts result in increased reliability and reduced maintenance costs
- Full vacuum effect at part load

York Refrigeration Screw Compressor Manual
