New Directions in Sexual Violence Scholarship Kate Gleeson, Yvette Russell, 2023-05-30 This edited collection brings together leading and emerging scholars in the important field of sexual violence scholarship The last ten years have witnessed an international reckoning on sexual violence typified in the mainstream imagination by the MeToo movement acknowledgement of the violence of university campus life and the overdue recognition of the enduring harms of child sexual abuse While the state has been forced to respond through law and other political processes at times revealing its agility and at other times its archaic investment in the past much of the real work responding to sexual violence and abuse has taken place within communities and in the personal responses of the individuals writing the scripts of their experiences This volume explores the nuances of these individual experiences and considers how they are shaped and reflected by intersecting axes of power including gender race class age and able bodied status It reflects on law and law reform in the area and suggests new modes and frames through which to explain and understand sexual violence and institutional responses to it Debates within this contested personal and political arena do not map onto longstanding binaries of liberal and radical feminism nor conservative and progressive politics This interdisciplinary volume traces that murky terrain and features some of the leading international scholars writing on sexual violence in English today This book will appeal to scholars and students across the broad disciplines of law and legal studies criminology gender studies political science and sociology

America today gated communities sprawl out from urban centers employers enforce mandatory drug testing and schools screen students with metal detectors Social problems ranging from welfare dependency to educational inequality have been reconceptualized as crimes with an attendant focus on assigning fault and imposing consequences Even before the recent terrorist attacks non citizen residents had become subject to an increasingly harsh regime of detention and deportation and prospective employees subjected to background checks How and when did our everyday world become dominated by fear every citizen treated as a potential criminal In this startlingly original work Jonathan Simon traces this pattern back to the collapse of the New Deal approach to governing during the 1960s when declining confidence in expert guided government policies sent political leaders searching for new models of governance The War on Crime offered a ready solution to their problem politicians set agendas by drawing analogies to crime and redefined the ideal citizen as a crime victim one whose vulnerabilities opened the door to overweening government intervention By the 1980s this transformation of the core powers of government had spilled over into the institutions that govern daily life Soon our schools our families our workplaces and our residential communities were being governed through crime This powerful work concludes with a call for passive citizens to become engaged partners in the management of risk and the treatment of social ills Only by coming together to produce security can we free ourselves from a logic of domination by others and from the fear that currently rules our everyday life

Brison, 2023-01-03 A powerful personal narrative of recovery and an illuminating philosophical exploration of trauma On July 4 1990 while on a morning walk in southern France Susan Brison was attacked from behind severely beaten sexually assaulted strangled to unconsciousness and left for dead She survived but her world was destroyed Her training as a philosopher could not help her make sense of things and many of her fundamental assumptions about the nature of the self and the world it inhabits were shattered At once a personal narrative of recovery and a philosophical exploration of trauma this bravely and beautifully written book examines the undoing and remaking of a

self in the aftermath of violence It explores from an interdisciplinary perspective memory and truth identity and self autonomy and community It offers imaginative access to the experience of a rape survivor as well as a reflective critique of a society in which women routinely fear and suffer sexual violence As Brison observes trauma disrupts memory severs past from present and incapacitates the ability to envision a future Yet the act of bearing witness she argues facilitates recovery by integrating the experience into the survivor s life s story She also argues for the importance as well as the hazards of using first person narratives in understanding not only trauma but also larger philosophical questions about what we can know and how we should live

Speaking Out Tanya Serisier, 2018-11-19 This is the first critical study of feminist practices of speaking out in response to rape This book argues that feminist anti rape politics are characterised by a belief in the transformative potential of women s personal narratives of sexual violence The political mobilisation of these narratives has been an incredibly successful strategy but one with unresolved ethical questions and political limitations The book explores both the successes and the unresolved questions through feminist archival materials published narratives of sexual violence and mass media and internet sources It argues that that a rethinking of the role and place of women s stories and the politics of speaking out is vital for a rethinking of feminist politics around sexual violence and key to fresh approaches to combating this violence
