Ichimura, T. Sato, W. James, 2009-10-21 20 years after the collapse of communism in Central Eastern European countries and 30 years after the start of market oriented reforms in China this book provides a framework for understanding the differing emphasis and sequencing of two reforms and explores in depth these issues in the demise of communism and the triumph of the market economy China's Industrial State-owned Enterprises: Between Profitability And Bankruptcy Carsten A Holz, 2003-07-29 After decades of declining profitability China's industrial state owned enterprises appear to be obsolete This book utilizes extensive data and qualitative as well as quantitative analyses to examine the reasons for the decline in the profitability of these industrial state owned enterprises to determine their current profitability patterns across various dimensions and to account for profitability gaps between these enterprises and those managed under other ownership forms China's recent enterprise reform measures are also evaluated A differentiated picture emerges that clarifies past developments and illuminates future prospects of the reform of industrial state owned enterprises in China **China's Developmental Miracle** Alvin Y. So, 2016-07-08 In contrast to the failure to economic reforms in Eastern Europe China's economic reforms have been quite successful Decollectivization marketization state enterprise reforms and reintegration into the world economy have led to very rapid economic development in China over the past two decades These economic reforms in turn triggered profound social and political changes This collection examines the origins nature and impact as well as the future prospects of these reforms and changes The contributors are all active researchers from a variety of disciplines including economics sociology political science and geography *Environment and Resettlement Politics in China* Gørild Heggelund, 2017-07-05 The Three Gorges dam currently being constructed on the Yangtze River in China is controversial both inside and outside China particularly because of the large number of people to be resettled officially 1.2 million and the environmental impacts Using material previously unavailable in any Western language it analyses the Chinese discussions over policy making for the resettlement process and impacts It concludes that the environment and resettlement policies have been linked in a new way in this project However despite these positive developments it argues that the social impacts from resettlement have not yet reached a high level of political attention and that the Chinese authorities need to acknowledge that resettlement has social costs The book provides an understanding of the social political and economic factors of one of the largest and most controversial development projects currently being implemented It also sheds light on China's policy making procedures and political priorities over the past decade *Iran, Iraq and the Arab Gulf States* J.

China's Civil Service Reform Wang Xiaoqi,2012-05-04 A market economy and a more liberal society have brought great challenges to China s outdated governance structure and personnel management To improve decision making in government and reshape the management system in face of a more complex economy post Mao authorities have implemented a number of administrative reforms including civil service reform which emphasized on selecting and promoting public officials based on their capability and work performance Thousands of positions have been filled since the civil service system was implemented nationwide in 1993 The Chinese civil service reform is of far reaching significance because it had the potential

to be a departure from the established structure of cadre personnel management system developed in the 1950s. However, after several years of policy development, scholars observe that the new reforms have done little to undermine the old cadre system. Is this true? Or does this conclusion oversimplify the complicated implementation of the reforms? This book examines the implementation and performance of the on-going civil service reforms in China. Using the principal-agent framework, the author draws upon key case studies showing how the reforms affect civil servants' incentives and behavior in the local context and the Chinese leadership's control over the bureaucracy. China's reform experience speaks directly to many Asian countries facing urgent need to improve state capacity as the global financial crisis unfolds.

Rethinking China's Provinces John Fitzgerald, 2003-09-02. This is the third volume in a series examining the political importance of China's provinces under reform. The present book provides a survey of provinces as echelons of the People's Republic of China. It seeks to locate the province as an administrative level in the Chinese state through an examination of history, economic, social, and political developments of these units. By situating the province's history, this volume identifies new developments in the territorial administration of the People's Republic over the reform era. It also charts the consequent emergence of the city as an intermediate unit situated between the province and the country and providing challenges to the hierarchy of the bureaucratic state. This book includes detailed analyses of Chongqing, Henan, Guangdong, Anhui, Yunnan, and Heilongjiang. It contains extensively researched empirical data collected from these provinces and user-friendly maps of these regions.

Japan and the Reconstruction of East Asia D. Kelly, 2001-12-17. Dominic Kelly has written a fascinating study of Japanese policies designed to lead to the reconstruction of East Asia. He presents a detailed picture of Japanese activity in East Asia in the areas of production, finance, security, and knowledge and maps out the historical context upon which this activity rests. In doing so, Kelly sheds light on the increasingly powerful but imperfectly understood phenomenon of regionalism. He goes on to identify the major fault line situated beneath both theoretical accounts of Japanese regionalism and real-world predictions of its success or failure.

China's Embedded Activism Peter Ho, Richard Edmonds, 2007-10-19. The contributors to China's Embedded Activism focus on the environmental realm, one of the most active areas of civil society in modern China.

Urban Poverty, Housing and Social Change in China Ya Ping Wang, 2004-10-21. There is a close association between urban poverty and housing in transitional societies. Along with job security, housing was the most important element of the socialist welfare system. Housing privatisation has far-reaching economic implications.
