Section one reviews the evolutionary and ontogenetic determinants of animal suffering and the assessment of well being. The second section examines biological responses to stress and methods of monitoring stress in animals. Section three shows how stress can threaten animal health, disrupt normal reproduction and influence growth and metabolism. The final section relates the importance of animal stress to developing guidelines on the use of animals in scientific research. This is an invaluable reference for exploring these complex responses.

What are a director's legal obligations to the producer, cast and crew and what are their obligations in return? This indispensable resource addresses the legal, financial and organizational questions that an independent or guerrilla filmmaker must face and the problems that will doom a project if left unanswered. It demystifies issues such as founding a film company, obtaining financing, preparing a budget, securing locations, shooting, granting screen credits and distributing, exhibiting and marketing a film. Newly updated and expanded this third edition explores concepts such as integrating social media, crowd funding and nonprofit status, funding, diversity, inclusion and compensation equity and distribution via streaming services.
