The Story Of Big Creek:

The Story of Big Creek David H. Redinger, 1961 **The Story of Big Creek** David H. Redinger, 2018-12-05 Nature never intended Southern California to be anything but desert so they said But settlers turned it into farms factories and living areas for millions of people The key to that development was 300 miles north in the High Sierra where the company that became the Southern California Edison Company undertook the creation of one of the great water power developments in the world They called it Big Creek Completed in 1929 this work of engineering art involved six dams eight tunnels one 13 miles long three major artificial lakes and five powerhouses all created to ensure electric power for a rapidly growing Los Angeles and suburbs Author David H Redinger was Resident Engineer for the Big Creek Hydroelectric Project one of the most extensive in the world In this fascinating book he recounts the obstacles encountered in building a railroad in the High Sierra from carving roads and tunnels through rough terrain to enduring snowstorms at high altitudes and generally accomplishing near miracles with brainpower mulepower steampower and manpower *Building the Ultimate Dam* Donald C. Jackson, 2005 Offers compelling insight into how designer Eastwood battled government bureaucrats corporate patrons and fellow hydraulic engineers to build seventeen dams in the western U S during the early twentieth century based on his innovative multiple arch design Reprint **Dams** Donald C. Jackson, 2017-05-15 Dams have been used to control water for thousands of years with the oldest known dam being a small earthen structure in present day Jordan dating to c 4000 BCE Since then cultures throughout the world have practised the art of dam building and the technology has evolved in myriad ways The papers selected here examine the key technical issues influencing dam construction from ancient times to the early 20th century In addition they illustrate why various human societies have built dams and how social or seemingly non technical factors have influenced the process of dam design Though hydraulic engineering is the primary focus of the book it also reveals a keen interest in questions of water resources and environmental history **This Day and Time** Anne W. Armstrong, 2025-05-23 Considered by many scholars to be the first novel to realistically depict the Appalachian region and its people Anne Armstrong s *This Day and Time* 1930 follows a resilient young woman named Ivy deserted by her husband and raising a young son in the mountains after having tried working factory jobs in town With lyrical descriptions of the landscape and careful if archaic use of dialect Armstrong explores both timeless and contemporaneous themes including the impact of industrialization the deep connection between mountaineers and their land the roles and victimization of women and the cycle of life through the changing seasons Agrarian critic Donald Davidson called it as true a novel of the mountains as has been written For this new edition of Armstrong s work editor Linda Behrend has written a critical introduction that discusses these literary themes and other components of the text including biographical information an analysis of Armstrong s style and technique and connections to other literary works of the time An extensive bibliography includes archival and primary sources book reviews from *This Day and Time* s original appearance in 1930 reviews of stage adaptations of the book

and sources that shed light on its unique linguistic style Almost a century after This Day and Time was first published this edition offers both an engaging narrative and an insightful study for a new generation of readers Amendments to Alaska Native Claims Settlement Act United States. history of Indiana.-v.3 The story of Indianapolis. Biographical.-v.4. Biographical (continued) Logan Esarey,1918 **The Wide World Magazine** ,1925 **The Poco Field** Talmage A. Stanley,2012-03-15 In this beautifully written meditation on identity and place Talmage A Stanley tells the story of his grandparents middle class aspirations from the 1920s to the 1940s in the once booming Pocahontas coalfields of southern West Virginia Part lyrical family memoir and part social study *The Poco Field An American Story of Place* addresses a long standing gap in Appalachian and American studies illustrating the lives and choices of the middle class in the mid twentieth century and delving into questions of place based identity Exploring the natural and built environments of the towns of Keystone West Virginia and Newbern Virginia Stanley delineates the history of conflict and control of local industry and development Through his grandparents struggle for upward mobility into the middle class Stanley narrates a history that counters ideas of Appalachia as an exception to American culture and history presenting instead an image of the region as an emblem of America at large Stanley builds out

from family and local history to examine broad structures of values and practices as they reflect and relate to place showing how events such as the development of extensive mineworks the ghettoization of the area s black residents the catastrophic flooding of the Elkhorn Creek and the fraud induced failure of Keystone National Bank signal values that erode a place both literally and figuratively Giving voice to activists now working to break down boundaries and assumptions that long have defined and restricted the middle class in the global economy The Poco Field also champions the creative potential of place for reinvigorating democratic society for the twenty first century **Southern California Metropolis** Winston W. Crouch, Beatrice Dinerman, 2023-04-28 The concept of the metropolitan area as best exemplified by Los Angeles has highlighted two contradictory characteristics of the current urban scene the dispersion of political power among a number of centers and the presence of issues and problems whose impact transcends the jurisdiction of any one local government In this book the author have focused their attention of the process by which organized groups have sought to identify public issues and to reach decision on them within one of the most rapidly developing and most complex metropolitan areas of the United States Los Angeles Beginning with a discussion of the setting and framework of the Los Angeles metropolitan area the authors attempt to clarify the nature of the legal political social and economic forces tha have shaped the present system The second part of this work is concerned with the contenders for leadership within the area the central city the urban county and the suburbs On the basis of the collected information the authors next pose the hypothesis that democratic ideology and group interests have combined to produce competing power centers from which groups operate while at the same time lacking sufficient resources to dominate decision making In the final section of a number of possible alternatives that might produce decision on area wide issues are examined and suggestions for bringing together the various political groupings are given Research for this work was carried out under a grant from the John Randolph Haynes and Dora Haynes Foundation This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1963 **Combined History of Edwards, Lawrence and Wabash Counties, Illinois** ,1883
