The Synchronic And Diachronic Phonology Of Ejectives Outstanding Dissertations In Linguistics:

The Synchronic and Diachronic Phonology of Ejectives Paul D. Fallon, 2013-12-16 This study is the first book length examination of ejectives and their phonological patterning deepening the empirical understanding of ejectives and contributing to both phonological theory and to typologies of sound change **The Synchronic and Diachronic Phonology of Ejectives** Paul Dennis Fallon, 1998

The Dynamics of Language Rajend Mesthrie, David Bradley, 2018-06-26 Linguistics the close study of language and languages is an indispensable foundation for all forms of knowledge The African continent is blessed with hundreds of languages which act as local repositories of culture and interaction South Africa alone has eleven official languages plus Sign Language many heritage languages and new languages of global movements and migration Part of the linguist s business is to document record and affirm languages and diversity Applied linguists use their training to understand and enhance the role of language in education and upliftment and the opportunities and challenges of new technologies of communication The International Congress of Linguists meets every five years to reflect the development of the field and 2018 is the first time that the congress is being held in Africa This book is a collection of the plenary and focus papers presented at the conference and thus represents current thinking in the major branches of language study as represented by leading local and international scholars The papers discuss the history of languages their structure acquisition diversity and use At the same time due regard is paid to the African continent in connection with its linguistic diversity multilingualism and educational and societal concerns The Congress is meant to affirm the value of the languages of Africa of languages and Linguistics in general as well as to inspire and equip younger scholars to undertake advanced research into language in its many facets **The Syntax of Possession in Japanese** Takae Tsujioka, 2013-12-16 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series The aim of this thesis is to investigate the syntax of possession expressions in Japanese at the sentential level It starts with a background of possessive syntax and illustrates how Japanese presents us with an interesting case study of possessive syntax ***Parallelism and Prosody in the Processing of Ellipsis Sentences*** Katy Carlson, 2013-12-16 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series This book investigates the processing of ellipsis sentences focusing on the following questions i are ellipsis sentences processed using special routines employed only for ellipsis or are they processed using the same principles needed for unelided sentences ii does parallelism influence sentence processing if so what kinds of similarities matter **Production, Perception, and Phonotactic Patterns** Alexei Kochetov, 2013-12-16 First Published in 2002 Production Perception and Phontactic Patterns presents the first experimental study of articulatory dynamics of Russian and of secondary articulents in general with a special focus on the nature of positional markedness scales one of the key concepts in the current phonological theory Optimality Theory Through a series of experiments the author questions the traditional assumption that positional markedness scales are directly encoded in Universal Grammar and provides an

alternative account based on gestural recoverability This study combines a sophisticated and in depth analysis of language particular phonetic detail with wide cross linguistic generalisations and contributes to the increasingly influential body of research that investigates phonetic factors in the search for explanations of phonological universals

The Typology of Parts of Speech Systems David Beck, 2013-01-11 This book presents rigorous and criterial definitions of the major parts of speech noun verb and adjective that account both for their syntactic behaviour and for their observed typological variation Based on an examination of languages from five different groups Salishan Cora Quechua Totonac and Hausa this book argues that parts of speech must be defined by combining the criteria of syntactic markedness which characterizes lexical classes in terms of unmarked syntactic roles and semantic prototypicality which delimits their prototypical meanings Adjectives are shown to be the marked and hence most variable class because of their inherent non iconicity at the semantics syntax interface The four member typology of parts of speech systems languages with three open classes those that group adjectives with verbs those that group adjectives with nouns and those that conflate all three current in the literature is easily generated by free recombination of these two criterial features Closer examination of the data however casts doubt on the existence of one of the four possible language types the noun adjective conflating inventory which is accounted here for by replacing free recombination of semantic and syntactic features with an algorithm for the subdivision of the lexicon that gives primacy to semantics over syntax

The Effects of Prosody on Articulation in English Taehong Cho, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company

The Sonority Controversy Steve Parker, 2012-08-31 Sonority has a long and contentious history It has often been invoked by linguists as an explanatory principle underlying various cross linguistic phonotactic generalizations especially within the domain of the syllable However many phonologists and phoneticians have expressed concerns about the adequacy of formal accounts based on sonority including even doubts about the very existence of sonority itself To date the topic of sonority has never been the focus of an entire book Consequently this is the first complete volume that explores diverging viewpoints about phonological phenomena rooted in sonority taken from numerous languages All of the contributors are well known and respected linguists who publish their research in leading academic outlets Furthermore each chapter in this collection contains new cutting edge results based on the latest trends in the field Hence no other extant piece of literature matches this volume in terms of its breadth and coverage of issues all converging on the common theme of sonority Given the wide variety of subtopics in this collection there is something to appeal to everyone the list of contributions encompasses areas such as Optimality Theory acquisition computational modeling acoustic phonetics typology syllable structure speech perception markedness connectionism psycholinguistics and even MRI technology What ties all of these issues together is a solid and consistent emphasis on sonority as a unified background phenomenon Furthermore a continuum of opinions about sonority is represented ranging from complete acceptance and enthusiasm on the one hand to moderate skepticism on the other hand

Grammatical

Features and the Acquisition of Reference Sergio Baauw, 2013-12-16 This book discusses to what extent errors young children make with their interpretation of definite articles and pronouns are due to their immature pragmatic skills and to what extent incomplete syntactic development plays a role

The Phonetics and Phonology of Gutturals Amanda Miller-Ockhuizen, 2004-06-01 This book is the first detailed investigation and description of phonotactic sound patterns affecting Khoesan click consonant inventories It also includes the first quantitative study of phonation types in Khoesan languages and the first study of phonation types associated with pharyngeal consonants all around Although bases of OCP constraints have been presumed to be perceptual this is the first quantitative study showing the acoustic basis of a particular OCP constraint in a specific language Amanda L Miller Ockhuizen describes the phonetics and phonology of gutturals in the Khoesan language of Ju hoansi Hers is the first study of voice quality cues associated with epiglottalized vowels Thus it is the first study to show that laryngeal and pharyngeal vowels are unified phonetically by non modal voice qualities associated with them It is also the first study to show that in addition to laryngeal coarticulation whereby voice quality cues associated with laryngeal consonants are spread to a following vowel pharyngeal coarticulation also involves spreading of voice quality cues Thus guttural consonants are united in that they all spread voice quality cues onto a following vowel Voice quality cues found on vowels following guttural consonants are as large as similar cues associated with guttural vowels This acoustic similarity is shown to be the basis of a novel Guttural OCP constraint found in the language which is demonstrated to exist via co occurrence patterns found over a recorded database of all of the known roots Thus this is the first book to provide a detailed perceptual basis of an OCP constraint The database study also reports several other novel phonotactic constraints involving gutturals as well as a reanalysis of the well known Back Vowel Constraint This book describes both phonetics and phonology of the natural class of guttural consonants and shows through a quantitative acoustic investigation how the phonetic cues associated with these sounds are the bases of phonotactic constraints involving them

Vietnamese Tone Andrea Hoa Pham, 2004-06 This new book offers research that will affect further study of tone in Vietnamese and other tonal languages

Proceedings from the Main Session of the Chicago Linguistic Society's ... Meeting Chicago Linguistic Society. Meeting, 1998

Input-based Phonological Acquisition Tania Zamuner, 2004-11-23 This book provides an analysis of two theories of language acquisition the theory that acquisition is primarily mediated by innate properties of language provided by universal grammar and the opposing theory that language is acquired based on the patterns in the ambient language A problem not often considered is that these two theories are confounded because the structures that are frequent across languages are also typically the most frequent within a specific language In addition the innate theory of language acquisition is difficult to quantify and qualify Using cross linguistic corpus and experimental approaches this book attempts to contrast these theories through an examination of the acquisition of word final consonants in English

Raddoppiamento Sintattico in Italian Doris Angel Borrelli, 2013-12-16 First Published in 2002 The Italian

phenomenon known as raddoppiamento sintattico or sometimes raddoppiamento fonosintattico has received a vast amount of attention Long recognized in Italian grammar books the process consists of the gemination of a word initial consonant in certain environments The word raddoppiamento means doubling and it is deemed syntactic or phonosyntactic because the process spans word boundaries This offers a synchronic and diachronic cross dialectal study of this phenomenon The Effects of Duration and Sonority on Countour Tone Distribution Jie Zhang,2013-12-16 First Published in 2002 Part of the Outstanding Dissertations in Linguistics series this is an in depth investigation of the effects of duration and sonority on contour tone distribution The term tone language usually refers to languages in which the pitch of a syllable serves lexical or grammatical functions In some tone languages the contrastive functions of pitch are sometimes played by pitch changes within a syllable Pitch changes of this kind are called contour tones The distribution of contour tones in a language are when under what phonological contexts contour tones are more readily realized **Auditory Representations in Phonology** Edward S. Flemming,2013-10-08 This book provides evidence for the importance of auditory properties of speech sounds in phonology **Compensatory Lengthening** Darya Kavitskaya,2014-06-03 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series and focuses on phonetics phonology and diachrony of compensatory lengthening The term compensatory lengthening CL refers to a set of phonological phenomena wherein the disappearance of one element of a representation is accompanied by a corresponding lengthening of another element This study focuses on descriptive and formal similarities and divergences between CL of vowels triggered by consonant and by vowel loss **Proceedings of the Annual Meeting of the Berkeley Linguistics Society** Berkeley Linguistics Society,2001 **Existential Faithfulness** Caro Struijke,2014-04-23 First Published in 2003 Initially a doctoral dissertation submitted to the University of Maryland at College Park in August 2000 this book is a revised version with an expanded discussion on dissimilation as well as looking at existential faithfulness relations in reduplicative TETU and feature movement
