Literature Amar Nath Prasad,M. B. Gaijan,2007 **The Inhuman Empire** Sadhana Naithani,2024-05-20 This book is a study of selected texts of British writings on Indian wildlife published between 1860 and 1960 Set in the context of British colonial rule in India this book also reflects on similar situations across the British Empire and other colonial empires The destruction of wildlife in the making of empires is a subject not yet fully explored in scholarship This book aims to speak to global concerns regarding the extinction of several species and shows that the crisis has international roots The Inhuman

Empire breaks new grounds as it juxtaposes colonial narratives to folk narratives These two types of narratives treat nonhuman animals very differently folk narrative considers them sentient beings while colonial narratives see them as game and do not care for their sentience Both types of narratives are further evaluated with reference to the contemporary position of natural sciences regarding animal sentience and of anthropologists and philosophers regarding the relationship between nature and culture Analyzing colonial accounts of hunting the author looks at the pain and suffering of nonhuman animals and combines statistics alongside narratives of British writers Indian populace and nonhuman animals in order to show narratives reflect and impact reality This book will be of great value to those interested in Animal Studies Folkloristics the history of Colonialism and India Planet Savers Kevin Desmond, 2017-09-08 Protecting the planet is everyone's work But we all have our own heroes in whatever area we are working Planet Savers brings together the varied stories of the hundreds of movers and shakers that have spoken up throughout history and taken action to defend the world from pollution deforestation species loss and climate change From Theodore Roosevelt to Al Gore from Francis of Assisi to David Attenborough and from hundreds more men and women that you will know little if anything about Scientists artists business people priests lawyers poets politicians activists and more from every continent of the world Their work has enthused us about the natural world and warned us that we must do much more to preserve it The Indian woman who became the world's first environmental martyr the Baptist Reverend who asked What Would Jesus Drive the Quaker big game hunter who set up the first conservation organisation the Shakespearian actor who revolutionised organic gardening and the housewife whose campaign against toxic waste forced a President to act The book is a cornucopia of people who from time immemorial have put their careers reputations and lives on the line to protect our planet from its governing inhabitants the human race Today as thousands of species of animals and plants are faced with extinction thousands of years of indigenous knowledge is lost in the face of technological advance and we become more and more aware of the potential doomsday scenario of a warming world we need Planet Savers more than ever Our inspiration can be the 301 environmental lives portrayed in this book These people cared enough to do something about it Planet Savers is both a tribute and a catalyst a tribute to the people that loved the planet enough to want to act to save it and a catalyst for the people who will be inspired to act after reading it New Planet Savers are at work right now in rainforests and megacities in community centres and boardrooms at road protests and in courtrooms all over the world If this book has one great aim it is to inspire you the reader to join them It is a book that every home should own **Dead Man's Fancy** Keith McCafferty, 2015-05-26 The third novel starring Montana's favorite fly fisherman cum detective Sean Stranahan for fans of Craig Johnson and C J Box Cold Hearted River the sixth in the series is forthcoming from Viking Wolves howl as a riderless horse returns at sunset to the Culpepper Dude Ranch in the Madison Valley The missing woman Nanika Martinelli is better known as the Fly Fishing Venus a red haired river guide who lures clients the way dry flies draw trout As Sheriff Martha Ettinger follows hoof tracks in the snow she finds one of the men who

Man the Hunted Donna Hart, 2018-04-17 *Man the Hunted* argues that primates including the earliest members of the human family have evolved as the prey of any number of predators including wild cats and dogs hyenas snakes crocodiles and even birds The authors studies of predators on monkeys and apes are supplemented here with the observations of naturalists in the field and revealing interpretations of the fossil record Eyewitness accounts of the man the hunted drama being played out even now give vivid evidence of its prehistoric significance This provocative view of human evolution suggests that countless adaptations that have allowed our species to survive from larger brains to speech stem from a considerably more vulnerable position on the food chain than we might like to imagine The myth of early humans as fearless hunters dominating the earth obscures our origins as just one of many species that had to be cautious depend on other group members communicate danger and come to terms with being merely one cog in the complex cycle of life
