The Sociolinguistics of Place and Belonging Leonie Cornips, Vincent A. de Rooij, 2018-03-15 This volume shows the relevance of the concepts of place and belonging for understanding the dynamics of identification through language It also opens up a new terrain for sociolinguistic and linguistic anthropological study namely the margins Rural as well as urbanized areas that are seen as marginal or peripheral to places that are overtly recognized as mixed and hybridized have received relatively little sociolinguistic attention Yet people living in these supposedly less spectacular margins are not immune to the effects of globalization and rapid technological change They too constantly form new ensembles from linguistic and cultural resources which they invest with novel instable often ambiguous meanings This volume focusses on the purportedly unspectacular in order to achieve a full understanding of the relation between language place and belonging The contributors to this volume therefore focus on language practices analyzing them as dialectically related to political economic processes and language ideologies

Durkheim and the Internet Jan Blommaert, 2018-07-12 Sociolinguistic evidence is an undervalued resource for social theory In this book Jan Blommaert uses contemporary sociolinguistic insights to develop a new sociological imagination exploring how we construct and operate in online spaces and what the implications of this are for offline social practice Taking mile Durkheim s concept of the social fact social behaviours that we all undertake under the influence of the society we live in as the point of departure he first demonstrates how the facts of language and social interaction can be used as conclusive refutations of individualistic theories of society such as Rational Choice Next he engages with theorizing the post Durkheimian social world in which we currently live This new social world operates offline as well as online and is

characterized by vernacular globalization Arjun Appadurai's term to summarise the ways that larger processes of modernity are locally performed through new electronic media Blommaert extrapolates from this rich concept to consider how our communication practices might offer a template for thinking about how we operate socially Above all he explores the relationship between sociolinguistics and social practice In *Durkheim and the Internet* Blommaert proposes new theories of social norms social action identity social groups integration social structure and power all of them animated by a deep understanding of language and social interaction In drawing on Durkheim and other classical sociologists including Simmel and Goffman this book is relevant to students and researchers working in sociolinguistics as well as offering a wealth of new insights to scholars in the fields of digital and online communications social media sociology and digital anthropology

Cécile B. Vigouroux, Salikoko S.

Mufwene,2008-11-05 This book discusses the effects of globalization on languages in Africa In contrast to previous studies the contributors examine whether or not globalization is affecting African languages in the same ways and at the same rate in different countries and how local experiences of language change vary from place to place Rather than seeing English as the killer language par excellence the contributors probe ways in which languages are being used side by side to complement each other in some contexts while competing against European colonial languages in others The result is a diverse canvas of language vitality in the African context including matters of endangerment and loss through the lense of globalization in its various interpretations This book is a must read for students and researchers interested in language change and death and in the fate of European languages in the rest of the world **Linguistic Superdiversity in Urban Areas** Joana Duarte,Ingrid Gogolin,2013-12-18

Rapidly increasing migration flows contribute to the development of multiple forms of social and cultural differentiation in urban areas or to super diversity Language diversity is an important part of the resulting new social and cultural constellations Although linguistic diversity is not a new phenomenon per se the response of individuals or education systems to it is still largely based on a monolingual habitus associating one nation or a region within a nation to one language Building on the top quality expertise of researchers from different academic fields the volume offers insights into the study of linguistic diversity from linguistic and education science perspectives The studies derive from different countries different disciplines different research traditions and methodological approaches all aiming towards a better understanding of actual linguistic reality and its consequences for individual language development and for education The book addresses an academic readership and experts who are interested in learning more about linguistic diversity as an inevitable effect of globalisation and on ways to deal with this reality in research as well as practise in urban areas **English in Business and Commerce** Tamah Sherman,Jiri Nekvapil,2018-05-07
