The Spirit Of Education

John Fentress Gardner

The Spirit Of Education:

Education in Search of the Spirit John Fentress Gardner, 1996 Real education will always seek to strengthen what is best in the human soul its longing for the experience of spiritual truth that brings into the self an objective appreciation of the noble aspects of its own nature together with a subjective sense of real affinity with the rest of humanity the earth planet as a whole and the great cosmos above and beyond The premise of this book is that a human being is a being of body soul and spirit whose core is eternal spirit from which center one should strive to live From this perspective the aim of true education is to help our children activate this deepest center in themselves For this living intuitive thinking must be brought to life in a new way The organ for such thinking is the heart where will and feeling join in uniting self and world morality and truth love and action This book is in three parts The first poses the problem the second describes the Waldorf approach as a solution and the third deals with questions of special interest to parents and educators alike such as authority discipline and freedom the nature of genius and the question of cultural pluralism The first edition of this book was titled *The Experience of Knowledge* in response to a clear call for experience in education Certainly if the sole purpose of education is to acquire information learning becomes dry abstract and deadening To have meaningful consequence in a person's life coming to know must become an experience Too often however such experience is understood simply as doing field trips class projects and so on But doing if unconnected to the whole person is just activity To become true experience it must speak out of and toward a student's secret center the spirit Hence the author affirms that authentic education is always in search of the spirit

The Spirit of Education Jeff White, 2006 What is education It's a term we use every day to describe the process of putting 25 or 30 young souls into a cinder block room and filling their heads with what all over the course of the first quarter of their lives But is that education If it's not what is it And what are its consequences Education true education is not a process of pouring in from without but of calling forth what is within It's not a process of memorization or socialization or instillation but a process of nurturing of allowing of evoking It's a process of bringing forth the person one is meant to be The Spirit of Education attempts to begin anew our conversations about education what it is and where it might take us

Educational Ministry in the Logic of the Spirit James E. Loder, 2018-07-20 In November 2001 James E Loder Jr Professor of the Philosophy of Christian Education for forty years at Princeton Theological Seminary suddenly died He was a creative and profound thinker who had just completed a promising book In it he developed a compelling interdisciplinary model to disclose how the divine Spirit affirms reconstitutes and transforms the human spirit to bring new energy and creativity into human experience He called it redemptive transformation You now hold that book in your hands Those who know Loder's work are confident that Educational Ministry in the Logic of the Spirit though delayed for over fifteen years will

still become the best introduction to his complex thought More important it offers the imaginative means by which we may learn to attune ourselves and our faith communities to what God is doing in our fractured distracted and self destructive world to bring about a revolution of love the fruit of Christ s Spirit and the center of our human vocation **The Spirit of Education (Classic Reprint)** Amable Beesau,2015-07-08 Excerpt from The Spirit of Education The volume of which an English translation is now for the first time offered has for some years been considered at once the most eloquent and the most practical treatise upon education in the French language The long experience of the author his earnest piety and his felicity of illustration rendered him eminently fit to prepare a volume to which Catholics might look with confidence and which they can not fail to read with interest and profit In these days of rapid change and almost morbid mental activity we can not too zealously guard the education of our children and the translator feels sure she offers to the English speaking public a work which can not fail to assist all parents who will read it a work which is fervent and yet conservative Catholic yet unsectarian and universal Hoping that teachers and parents and especially mothers may find in this work as much help as she has herself derived the translator commends it to the public About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Education and the Spirit of Time* Olli-Pekka Moisio,Juha Suoranta,2006 The aim of this book is to raise current social political and moral issues in social theory by taking a critical stance towards historical global and educational themes in the context of culture politics and technology Thus the focus of the book is critical Zeitgeist analysis and its potential in addressing various social maladies of the present era Methodologically critical Zeitgeist analysis is argued to be of value in demonstrating how to both utilize and expand the possibilities of writing normative social theory The Spirit of Education E M Tr McCarthy,2016-05-24 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and

Gordon** Ambrosius Joseph STAPF,1851 *Educating in the Spirit* Eric J. Kyle,2019-05-16 This book is an attempt to address two struggles for theistic educators e g those who approach their educational vocation from a religious perspective whether they are working in secular or faith based institutions The first struggle is that while numerous guidelines on teaching excellence have been compiled the resulting checklists can contain more than a hundred criteria to consider This book therefore identifies the evidence based guidelines that are likely to have the highest impact on student achievement thereby empowering educators to focus their efforts in more substantial ways The second struggle is related to the lack of resources which can help educators to view and approach their vocation from a theistic perspective While there are texts that discuss the relationship of spirituality and or theology to education few to date have sought to bring evidence based educational literature into dialogue with the western Christian tradition and thereby develop a bottom up theology of education This book addresses this historical and theological gap Overall this book is therefore intended to not only provide theistic educators with high impact guidelines that can significantly improve the quality of education in their school systems but it also strives to do so from a thoroughly theistic perspective Cultivating the Spirit Alexander W.
