Nelson, Ronnie Ramlogan, 2015-10-05 This book brings together a collection of empirical case studies featuring a wide spectrum of medical innovation While there is no unique pathway to successful medical innovation recurring and distinctive features can be observed across different areas of clinical practice This book examines why medical practice develops so unevenly across and within areas of disease and how this relates to the underlying conditions of innovation across areas of practice The contributions contained in this volume adopt a dynamic perspective on medical innovation based on the notion that scientific understanding technology and clinical practice co evolve along the co ordinated search for solutions to medical problems The chapters follow an historical approach to emphasise that the advancement of medical know how is a contested nuanced process and that it involves a variety of knowledge bases whose evolutionary paths are rooted in the contexts in which they emerge This book will be of interest to researchers and practitioners concerned with medical innovation management studies and the economics of innovation Chapter 5 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license

**The Woman Who Decided to Die** Ronald Munson, 2009 Advances in medical technology force us to struggle with new and often gut wrenching decisions How do we know when someone is dead and not just in a coma Should a convicted felon qualify for a new heart In *The Woman Who Decided to Die* novelist and medical ethicist Ronald Munson takes readers to the very edges of medicine where treatments fail and where people must cope with helplessness mortality and doubt Using personal narratives that place us right next to doctors patients and care givers as they make decisions Munson explores ten riveting case based stories told with a writer s eye for illuminating detail These include a young woman with terminal leukemia more worried about her family than herself a stepfather asked to donate a liver segment to his stepson a student who believes she is being controlled by invisible Agents and a psychiatrist patient who prizes his autonomy until the end Raising fundamental questions about human relationships this is an essential book about the very nature of life and death

**A Rabble of Dead Money** Charles R. Morris, 2017-03-07 The Great Crash of 1929 profoundly disrupted the United States confident march toward becoming the world s superpower The breakneck growth of 1920s America with its boom in automobiles electricity credit lines radio and movies certainly presaged a serious recession by the decade s end but not a depression The totality of the collapse shocked the nation and its duration scarred generations to come In this lucid and fast paced account of the cataclysm award winning writer Charles R Morris pulls together the intricate threads of policy ideology international hatreds and sheer individual cantankerousness that finally pushed the world economy over the brink and into a depression While

Morris anchors his narrative in the United States he also fully investigates the poisonous political atmosphere of postwar Europe to reveal how treacherous the environment of the global economy was It took heroic financial mismanagement a glut induced global collapse in agricultural prices and a self inflicted crash in world trade to cause the Great Depression Deeply researched and vividly told *A Rabble of Dead Money* anatomizes history s greatest economic catastrophe while noting the uncanny echoes for the present

*Comeback* Charles R. Morris,2013-05-07 Charles R Morris s *The Trillion Dollar Meltdown* 2008 was the first book to warn of the impending financial crash in all its horrific scale and speed Now with *Comeback* Morris reveals that the United States is on the brink of a strong recovery that could last for twenty years or more The great economic boom times in American history have come because of fortuitous discoveries Natural resources coal first then oil fueled vast economic and industrial expansions which in turn helped create and supply new markets The last genuine economic game changer was the technology boom of the 1990s which gave the U S a global competitive advantage for a while based on electronics and silicon One of the first writers and analysts in the U S to predict that the tech boom would lead to a period of sustained economic growth was Charles Morris In defiance of the recessionary times in 1990 he saw the coming boom Now in 2013 he sees the threshold of another This time the gift is natural gas The amount and distribution of gas in American shale is so vast that it has the potential to transform the manufacturing economy creating jobs across the country and requiring a new infrastructure that will benefit the nation as a whole Because of fracking jobs that once would have been outsourced abroad will return home America can become a net exporter of energy and cheap energy will provide the opportunity for innovation and competition In light of this new opportunity and other complementary developments Morris explores in this book the U S ought to be approaching the future with a robust self confidence it has not experienced in a while But we could fumble it away The gold rush style of shale boom companies does not make them good neighbors A counter reaction could put their industry and the new era of national prosperity at risk We also have a political system that has the capacity to spoil the benefits of this huge boon If the wealth locked in the continental shelf is not shared for the general economic good but is instead exploited in short term profiteering then many of the opportunities that exist will be choked off by a few very rich corporations Managing the great bonus of the vast store of cheap energy is going to become a defining political challenge in the years ahead At the threshold of a thrilling opportunity Morris is a brilliantly perceptive guide

*The Dawn of Innovation* Charles R. Morris,2012-10-23 In the thirty years after the Civil War the United States blew by Great Britain to become the greatest economic power in world history That is a well known period in history when titans like Andrew Carnegie John D Rockefeller and J P Morgan walked the earth But as Charles R Morris shows us the platform for that spectacular growth spurt was built in the first half of the century By the 1820s America was already the world s most productive manufacturer and the most intensely commercialized society in history The War of 1812 jumpstarted the great New England cotton mills the iron centers in Connecticut and Pennsylvania and the forges around the Great Lakes In the

decade after the War the Midwest was opened by entrepreneurs In this beautifully illustrated book Morris paints a vivid panorama of a new nation buzzing with the work of creation He also points out the parallels and differences in the nineteenth century American British standoff and that between China and America today **The Two Trillion Dollar Meltdown**
